DEMANDES AU PARLEMENT.

RÈGLES *in re* AVIS DE BILLS PRIVÉS.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos "Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.

JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

—

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

The ship's surgeon should satisfy himself of such fact in the case of every passenger early during the voyage or at the time of embarkation if possible, in order to be able to answer the questions put to him by the quarantine officer.

26. In the event of small-pox having occurred on any vessel every person on board not showing satisfactory evidence of having been vaccinated within seven previous years, or of having had the small-pox within that period, shall be vaccinated by or under the supervision of the quarantine officer; or in the event of refusal, shall be landed at the quarantine station, subject to detention for observation, and the expense of maintenance of such person or persons during such detention shall be a charge against the vessel.

Examination.

27. The quarantine officer shall examine the surgeon or any officer of any vessel, under oath, touching the state of health of such vessel and of every person on board, in the form of the questions appended to these regulations.

Isolation.

28. Every vessel provided with an isolated hospita, for men, and another for women, on the upper deck ventilated from above and not by the door only may, if the quarantine officer is furnished with satisfactory evidence that such hospital accommodation has been promptly and intelligently made use of, be allowed to proceed after the landing of the sick and the disinfection of such hospital as has been used; any vessel, however, arriving with any infectious disease, without having such special isolated and ventilated hospital accommodation, or, if having it, without satisfactory evidence that it has been promptly and intelligently made use of, shall be liable to be detained for disinfection at a quarantine station.

(*b.*) The supervising officer of such disinfection to count the immigrants as they land, and if he finds the number tallies with that marked on the clearance of the quarantine officer and has satisfactory evidence that all their luggage has been landed with them, he shall punch the clearance at the place marked for that purpose, which shall then become valid for customs entry.

Passengers' Certificates.

Unorganized Quarantine Stations.

32. At every port at which there is no regular quarantine station the Collector of Customs at each port shall be the quarantine officer for the purposes of these regulations; and every such port shall be designated an Unorganized Quarantine Station.

33. Every vessel arriving at an unorganized station from an infected port, or on board of which any death from infections disease or outbreak of infectious disease has occurred during the voyage, shall remain outside until it receives permission to enter from the quarantine officer.

34. All the regulations applicable to regularly organized quarantine stations shall also apply to every unorganized quarantine station in so far as circumstances will admit, and particularly the provisions relating to inspection, anchoring or mooring, disinfecting, customs clearance, putting back to sea before breaking bulk, questions to ship's surgeon or officers, and penalties.

35. Any Collector or Sub-Collector of Customs in his quality of quarantine officer at any unorganized quarantine station in Canada, if he is informed of or has reason to suspect the presence of any of the grosser quarantinable diseases recited in section 21 of these regulations, shall order a medical inspection to be made of the vessel bringing such disease;

(*b.*) If no sickness is found on board a vessel arriving at an unorganized quarantine station and ordered to be inspected by the quarantine officer, the cost of such inspection shall not be a charge against the vessel, but will be defrayed by the Government.

Steam Tugs.

36. Any steam tug or other vessel which shall have towed or otherwise communicated with any vessel of the class of vessels subject to quarantine or quarantine inspection shall thereby be held to the same regulations and requirements as apply to the vessel communicated with;

(*a.*) If the communication between the vessel and the steam tug is confined to attachment of a rope, afterwards loosed, the quarantine officer may decide to release such tug from quarantine detention.

Rags.

37. Rags coming from a port or country in which infectious disease prevails, may be prohibited, and the name of any port or country so infected shall, from time to time, be published in the *Canada Gazette*;

(*a.*) Rags arriving from prohibited ports at a quarantine station shall be liable to be burnt or otherwise treated on the order of the Minister of Agriculture based on a report of the quarantine officer.

New Merchandise.

38. New merchandise in general may be accepted without question.

In times of Epidemics.

39. Passengers during a period of epidemic disease should be notified by steamship agents to dispense as far as possible with luggage that may be injured by wetting, in case of having to undergo disinfection—such as fabrics, of which the dyes are likely to run, as the owners will be compelled to assume all risks of injury.

40. Vessels during a period of epidemic disease should dispense as far as possible with woollen hangings, curtains, carpets and upholstering, substituting non-absorbing coverings.

41. Every vessel carrying cargo, and liable to be disinfected, should have provided a plain frame shaft allowing a clear inside space of 12 inches each way, placed in the main hatch, in a sailing vessel; and one in each hatch of a steamship, divided by bulkheads. The frame-work in this shaft to be set before loading and to extend from the hatchway to the bottom of the vessel. This simple arrangement would receive the fumigating pipe and avoid shifting cargo.

Passengers.

42. Passengers, for the purpose of these regulations are divided into two classes: cabin and steerage. Steerage passengers are those occupying compartments other than those of first and second cabin.

Methods of Disinfection.

43. The methods of disinfection at the Quarantine Stations of Canada shall be as follow:—

(*a.*) Exposure to steam not less than 30 minutes, steam to be of the temperature of not less than 100° Centigrade (212° Fahrenheit) nor greater than 115° Centigrade (239° Fahrenheit);

(*b.*) Articles that would be destroyed by the above method to be disinfected by thoroughly wetting with a solution of mercuric chloride, of one part to one thousand, or approximately one drachm to one gallon, wine measure, applied by means of a brush, or by drenching, or by immersion.

(*c.*) Where sulphur dioxide is used it is to be provided by burning not less than 3 pounds of rolled sulphur per 1000 cubic feet of space, or if it is used in liquid form, in the same proportionate strength, and the period of exposure to be not less than 6 hours.

44. The disinfection of iron vessels shall be as follows, as may be required:—

(*a.*) *Holds*—After mechanical cleansing, the hold to be thoroughly washed with an acid solution of mercuric chloride, 1 to 800 (mercuric chloride 1 part, hydrochloric acid 2 parts, water 800 parts), applied to all surfaces by means of a hose. If danger is apprehended from the poisonous effects of the mercury deposited on the surfaces, it can be subsequently washed down with clean water;

(*b.*) *Steerage*—The same treatment should be given the steerage as to the hold, but when there is a steam-pipe provided for each compartment (for the prevention of fire), steam disinfection of the steerage should be practised. The temperature in all parts of each compartment to be not less than 100° C. (212° Fahr.);

(*c.*) *The forecastle or apartment for crew*—After mechanical cleansing the application of mercuric chloride in the manner hereinbefore prescribed, or sulphurous fumes, or steam disinfection, if facilities are provided for the same;

(*d.*) *Officers' quarters, cabin, staterooms, etc.*—Each compartment to receive the same treatment, under the same conditions as hereinbefore specified, it being borne in mind that the decorative metal work in cabins, saloons, &c., would be injured by the use of the mercuric chloride solution, and therefore in such cases other forms of disinfection are to be used as determined by the Quarantine Officer.

45. The disinfection of wooden vessels shall be as follows, as may be required:—

(*a.*) Fumigation by sulphur dioxide made by burning not less than 3 pounds of rolled sulphur to each 1,000 cubic feet of space; or by the use of liquid sulphur dioxide in the same proportionate strength;

and the period of exposure to be not less than 24 hours.

(*b.*) Washing or flushing with acid solution of mercuric chloride (1 to 800). Cabins, forecastle and other apartments to be thoroughly washed with bichloride solution, and all clothing, bedding, curtains, etc., to be subjected to steam for 30 minutes at from 100° C. (212° Fahr.) to 115° C. (239° Fahr.)

46. In all classes of vessels the bilges to be first flushed with sea or river water, pumped out, and then treated with acid solution of mercuric chloride in large quantity, and allowed to remain in long contact.

Unorganized Inland Quarantine Stations.

47. Every inland port on the frontier of Canada between the Atlantic and the Pacific Oceans, at which there is a Collector or a Sub-Collector of Customs, shall, for the purpose of these regulations, be constituted an Unorganized Inland Quarantine Station.

48. Every Collector or Sub-Collector of Customs at every such inland frontier port shall be the Quarantine Officer.

49. E. L. NEWCOMBE,
Sous-ministre de la
Justice, Canada.

CONSIDÉRANT qu'en vertu des Statuts Revisés du Canada, chapitre soixante-huit, il est entre autres choses en substance décrété, que le Gouverneur en conseil peut établir au besoin les règlements—pour la mise à exécution de toutes les prescriptions du dit acte—et concernant l'arrivée et le départ des navires aux différents ports ou lieux du Canada, le débarquement de leurs passagers ou de leurs cargaisons, ou l'embarquement sur ces navires de passagers ou de cargaisons—qu'il juge convenables pour la conservation de la santé publique ; et pour assurer l'observation de la quarantaine par et en ce qui concerne les navires, passagers, marchandises ou choses arrivant en Canada, à un port ou lieu ou dans le voisinage d'un port ou lieu, auquel il croit bon, dans l'intérêt de la salubrité publique, d'appliquer les dits règlements, et pour purifier et désinfecter parfaitement les dits navires, passagers, marchandises ou choses, ou concernant l'arrivée ou le départ à quelque lieu que ce soit en Canada de personnes, marchandises ou choses transportées par terre, et pour assurer la stricte observation de la quarantaine par et en ce qui concerne les dites personnes, marchandises et choses, en Canada, en un lieu ou dans le voisinage d'un lieu auquel il croit bon, pour la conservation de la salubrité publique, d'appliquer les dits règlements—et pour purifier et désinfecter parfaitement les dites personnes, marchandises et choses, afin de prévenir autant que possible l'introduction ou la propagation de maladies en Canada, le tout selon qu'il le jugera à propos ; et peut aussi nommer et déplacer les personnes qu'il croit nécessaires pour l'exécution de ce service, et leur assigner respectivement les pouvoirs qu'il juge nécessaires pour exécuter les dispositions des dits règlements ; et il peut imposer des peines, confiscations et punitions pour leur infraction ; et ces règlements seront rendus publics par proclamation insérée au moins deux fois dans la *Gazette du Canada ;* Et, de plus, ces règlements auront force de loi ; et toute personne qui désobéit à quelqu'un de ces règlements est coupable de délit et passible d'aménde ou d'emprisonnement ou des deux peines, selon que la cour l'ordonnera, ou elle peut être poursuivie pour les peines portées aux dits règlements ;

ET CONSIDÉRANT qu'il a plu à Notre Gouverneur Général en conseil d'ordonner qu'une proclamation soit émise rescindant les règlements de quarantaine établis par arrêté de Notre Gouverneur Général en conseil, en date du 20 de juin A.D. 1893, de même que tous autres règlements de quarantaine faits et publiés jusqu'à la dite date, et leur substituant et mettant en force les Règlements revisés et modifiés qui suivent, relatifs à la quarantaine des navires arrivant en Canada ;

EN CONSÉQUENCE, en vertu du pouvoir qui Nous est conféré par les Statuts Revisés du Canada, chapitre soixante-huit, et intitulé "Acte concernant la quarantaine," et par et avec l'avis de Notre Conseil privé pour le Canada, Nous proclamons et déclarons que les Règlements de quarantaine établis par arrêté de Notre Gouverneur Général en conseil en date du 20e jour de juin A.D. 1893, de même que tous règlements de quarantaine antérieurs, soient, et ils sont par le présent rescindés, et que les Règlements de quarantaine suivants établis par arrêté de Notre Gouverneur Général en conseil le 10e jour de septembre A.D. 1894, soient et ils sont par le présent substitués et mis en force, savoir :—

RÈGLEMENTS DE QUARANTAINE CANADIENS.

Stations et service de quarantaine.

1. Les stations de quarantaine du Canada, sur la côte de l'Atlantique, sont,—

(*a.*) Grosse-Ile, dans le fleuve Saint-Laurent, avec Rimouski, la levée Louise et le quai du Grand-Tronc à Lévis, comme stations auxiliaires, province de Québec ;

(*b.*) Halifax, le havre et l'île Lawlor, dans la province de la Nouvelle-Ecosse ;

(*c.*) Saint-Jean, le havre et l'île aux Perdrix, dans la province du Nouveau-Brunswick ;

(*d.*) Sydney, Cap Breton, dans la province de la Nouvelle-Ecosse ;

(*e.*) Pictou, dans la province de la Nouvelle-Ecosse ;

(*f.*) Hawkesbury, dans la province de la Nouvelle-Ecosse ;

(*g.*) Chatham, dans la province du Nouveau-Brunswick ;

(*h.*) Charlottetown, dans la province de l'Ile du Prince-Edouard.

2. Sur la côte du Pacifique,—

(*a.*) William's Head, y compris Albert Head, dans le détroit de Fuca, province de la Colombie-Britannique, et comprenant aussi le port de Victoria comme station auxiliaire ; et

3. Tout autre port, sur les deux océans, chaque tel port étant désigné comme Station de quarantaine non organisée.

4. Et tout port douanier intérieur sur la frontière canadienne, entre les océans Pacifique et Atlantique, chaque tel port étant désigné comme Station de quarantaine intérieure non organisée.

5. Chaque station de quarantaine est sous le contrôle immédiat d'un médecin quarantenaire spécialement nommé.

(*a.*) A chaque station de quarantaine non organisée et à chaque station de quarantaine intérieure non organisée le percepteur des douanes de l'endroit est l'officier quarantenaire pour les fins des présents règlements ;

(*b.*) Tout le service de quarantaine du Canada est sous l'administration du Ministre de l'Agriculture.

6. Tout officier de quarantaine à une station de quarantaine en Canada, et tout percepteur des douanes en sa capacité d'officier de quarantaine, seront, pour les fins des présents règlements, juges de paix en vertu des dispositions de l'article 5 de l'Acte concernant la quarantaine, chap. 68 des Statuts Revisés.

Dispositions générales.

7. Tout navire arrivant d'un port en dehors du Canada à une station de quarantaine organisée sera inspecté par un officier de quarantaine dûment nommé, à l'endroit dûment fixé pour cette inspection, et il ne lui sera pas permis de faire une déclaration à la douane à aucun port du Canada tant qu'il n'aura pas reçu une patente de santé.

8. Il ne sera permis à aucune personne de débarquer d'un navire tant que cette personne n'aura pas été déclarée par un officier de quarantaine exempte de maladie contagieuse, ni tant que cet officier ne sera pas satisfait que ce débarquement peut s'effectuer sans danger pour la salubrité publique.

9. Tout navire venant d'un port en dehors du Canada, et ayant besoin d'une inspection quarantenaire, devra, en arrivant à un port quelconque du Canada, hisser un pavillon jaune à l'avant comme signal distinct de quarantaine, de façon à informer l'officier de quarantaine que ses services sont requis, et tout navire arrivant de nuit exhibera un feu rouge à l'avant comme tel signal.

10. Les cabotiers de Terreneuve et de ports des Etats-Unis contigus au Canada, et exempts de maladie contagieuse pourront, de temps à autre, être exceptés des présents règlements par ordre du Ministre de l'Agriculture.

11. Tout navire de guerre de Sa Majesté ou tout transport portant des troupes de Sa Majesté, accompagné d'un médecin, et n'ayant pas de maladie à bord, est exempt de l'inspection et de la détention quarantenaires.

Détention quarantenaire.

12. Chaque officier de quarantaine devra s'assurer de la présence ou de l'absence d'une maladie infectieuse par une inspection personnelle des personnes à bord, ou par la déclaration assermentée du capitaine ou du chirurgien, en la formule ci-jointe, ou par les deux.

13. Tout navire ayant de la maladie contagieuse à bord, ou venant d'un port ou pays infecté, sera sujet à être détenu à une station de quarantaine pour y être désinfecté, ainsi que ses passagers, son équipage et son pilote, et le bagage des passagers et la cargaison.

(*a.*) Un navire pourra être détenu à la quarantaine pour être désinfecté pendant tout le temps que la chose sera nécessaire ;

(*b.*) Le temps pendant lequel un navire pourra être détenu en quarantaine d'observation, est la période acceptée de l'incubation de la maladie contre laquelle l'on se garde à compter de la date constatée de la dernière exposition possible.

14. Tout navire ainsi détenu par ordre de l'officier de quarantaine sera sans délai ancré ou mouillé à l'endroit que fixera l'officier de quarantaine.

15. Et tant que ce navire est ainsi détenu, personne ne quittera le navire, ni n'aura de communication avec tel navire, sans la permission de l'officier de quarantaine.

16. L'officier de quarantaine qui détiendra un navire comme susdit, devra immédiatement avertir le Ministre de l'Agriculture, énonçant la cause de cette détention.

17. D'après l'interprétation des présents règlements, un port ou pays infecté est un port ou pays où le choléra asiatique ou autre maladie épidémique a été communiqué à une ou plusieurs personnes par la voie d'une personne ou d'effets d'habillement infectés ou autrement. Un port ou pays n'est pas considéré infecté lorsqu'il ne s'est déclaré qu'un simple cas ou un petit nombre de cas et que la maladie n'a pas été communiquée par ces cas.

Heures d'inspection—Retour en mer—Frais.

18. Tout navire pourra être inspecté en tout temps pendant les vingt-quatre heures ;

(*a.*) Sauf que dans les temps d'épidémie le Ministre de l'Agriculture pourra ordonner que l'inspection ne se fasse que pendant les heures de jour.

19. Tout navire aura le droit, avant de rompre son chargement, de retourner en mer au lieu de se mettre en quarantaine, tel que prévu par l'article 9 de l'acte intitulé "Acte concernant la quarantaine," chap. 68, Statuts Revisés.

20. Tous les frais encourus pour l'entretien des personnes en santé qui pourraient avoir été exposées à l'infection, et sont détenues en quarantaine d'observation, seront à la charge du navire ;

(*a.*) Et le capitaine d'un navire pourra faire des arrangements avec l'officier de quarantaine pour débarquer les provisions nécessaires et les serviteurs ou économes pour les distribuer ;

(*b.*) Les personnes actuellement malades sont traitées et soignées dans les hôpitaux de quarantaine, aux frais du gouvernement ;

(*c.*) S'il est permis à un navire de continuer sa route et de laisser ses passagers en quarantaine, le transport subséquent de tels passagers de la quarantaine au port de destination sera à la charge du navire.

Maladies quarantenaires.

21. Les principales maladies quarantenaires sont : le choléra asiatique, la petite vérole, le typhus, la fièvre jaune et la peste. Les maladies secondaires, sont la fièvre scarlatine, les fièvres entériques (typhoïdes), la diphtérie, la rougeole et la varicelle (petite vérole volante.)

(*a.*) En sus de ce qui précède il est du devoir de tout officier de quarantaine de s'assurer de la présence ou de l'absence de toute autre maladie contagieuse ou infectieuse ;

(*b.*) Et quant à la lèpre il est du devoir de chaque officier de quarantaine, surtout sur la côte du Pacifique, de bien s'assurer de la présence ou de l'absence de cette maladie parmi les passagers, et advenant la découverte de quelque cas de cette maladie, la personne atteinte n'aura pas la permission de descendre à terre, mais elle devra être ramenée par le navire à l'endroit d'où elle vient.

Les pilotes fourniront les règlements.

22. Chaque pilote devra fournir au capitaine de tout navire arrivant à un port en Canada, un exemplaire des présents règlements sous peine de l'amende ci-après prescrite.

Vaccination.

23. Chaque passager sera tenu de prouver à la satisfaction de l'officier de quarantaine qu'il a été vacciné ou qu'il a déjà eu la petite vérole.

24. La production d'un certificat par le chirurgien du navire, appelé "Carte de protection," et sa déclaration sous serment à l'appui de la vérité de ce certificat, seront considérées par l'officier de quarantaine comme preuve de cette vaccination et de cette protection. Toutefois, l'officier de quarantaine pourra, de temps à autre, faire un examen personnel des porteurs de ces certificats, afin de s'assurer de la manière que ces certificats ont été émis.

25. Toute personne qui ne donnera pas une preuve satisfaisante d'avoir été vaccinée ou d'avoir eu la petite vérole, sera vaccinée par un officier de quarantaine, ou, dans le cas de refus, sera débarquée à la station de quarantaine, pour y subir une quarantaine d'observation ; et les frais d'entretien de cette personne pendant cette quarantaine d'observation seront une dette sur le navire.

(*a.*) Un navire qui arrive à une station de quarantaine en Canada sera moins sujet d'être détenu si la vaccination de tous les passagers d'entrepont qui n'offrent aucune preuve d'avoir été vaccinés dans les derniers sept ans, est exigée avant l'embarquement. Le chirurgien du navire devrait s'assurer du fait vis-à-vis de chaque passager au début de la traversée, ou au temps de l'embarquement si possible, afin d'être en état de répondre aux questions que lui posera l'officier de quarantaine.

26. Si la petite vérole s'est déclarée sur un navire, chaque passager à bord qui n'offre aucune preuve satisfaisante d'avoir été vacciné dans le cours des derniers sept ans, ou d'avoir eu la petite vérole durant cette période, sera vacciné par ou sous la surveillance de l'officier de quarantaine ; ou, dans le cas de refus, il sera débarqué à la station de quarantaine, sujet à la détention pour observation, et les frais d'entretien de cette personne ou de ces personnes pendant cette détention sera une dette sur le navire.

Examen.

27. L'officier de quarantaine examinera le chirurgien ou tout officier d'un navire, sous serment, touchant l'état de santé de ce navire et de chaque personne à bord, dans la forme de questions annexées aux présents règlements.

Isolement.

28. Tout navire muni d'un hôpital isolé pour les hommes, et un autre pour les femmes, sur le pont supérieur, ventilé d'en haut et non par la porte seulement, pourra, s'il est prouvé à la satisfaction de l'officier de quarantaine que cet hôpital a été promptement et intelligemment employé, continuer sa route après avoir mis à terre les malades, et après la désinfection de l'hôpital qui aura servi ; néanmoins, tout navire qui arrivera avec quelque maladie infectieuse, sans être muni de ces hôpitaux spéciaux isolés et ventilés, ou, étant muni de ces hôpitaux, sans preuve satisfaisante qu'ils ont été promptement et intelligemment employés, sera sujet à être détenu pour être désinfecté à une station de quarantaine.

Malles à Rimouski.

29. Dans le cas d'un navire portant les malles de Sa Majesté et arrivant par la voie du Saint-Laurent, le certificat d'acquit sera accordé par un officier de quarantaine à Rimouski ou Grosse-Ile, et dans le cas de tout autre navire à la Grosse-Ile seulement.

(*a.*) Sauf que durant un temps de choléra ou autre épidémie, la permission accordée à un paquebot-poste venant d'un port ou pays infecté, de débarquer des passagers à Rimouski, pourra être suspendue par ordre du Ministre de l'Agriculture ;

(*b.*) Et dans ces conditions les malles seules seront débarquées à Rimouski, le navire continuant sa route à la Grosse-Ile pour inspection ;

(*c.*) Si le choléra s'était déclaré à bord de ce navire dans le cours de la traversée, les sacs extérieurs contenant les matières postales seront laissés à bord du vapeur pour être désinfectés à la Grosse-Ile.

Désinfection du bagage.

30. En temps de choléra ou autre épidémie, le bagage des immigrants ou passagers sur un navire arrivant à un port du Canada, que ce navire vienne ou non d'un port ou pays infecté, pourra, par ordre du Ministre de l'Agriculture, être désinfecté dans chaque cas.

(*a.*) Lorsque cette désinfection est faite à une station auxiliaire, subséquemment à l'inspection et acquit à la station principale, l'acquit accordé par l'officier quarantenaire portera comme condition que les immigrants et leur bagage seront débarqués pour être désinfectés.

(*b.*). L'officier surveillant cette désinfection comptera les immigrants à mesure qu'ils débarquent, et s'il trouve que le nombre s'accorde avec le nombre marqué sur l'acquit de l'officier de quarantaine, et a une preuve satisfaisante que tout leur bagage a été débarqué avec eux, il poinçonnera l'acquit à l'endroit marqué à cette fin, et cet acquit sera alors reçu à la douane.

Certificats de passage.

31. Chaque officier de quarantaine maritime poinçonnera le "Certificat de passage International" d'immigrants, quand ce certificat est en usage, de manière à faire connaître aux officiers de santé à l'intérieur le résultat de l'inspection quarantenaire, tel que prévu par cette carte ou certificat.

(*a.*) Chaque officier de quarantaine maritime poinçonnera la liste des immigrants par destination, province, ou Etat (s'ils sont en destination des Etats-Unis), quand de telles listes sont en usage, que fournira le chirurgien du navire sur des formules fournies par le gouvernement, et transmettra ces listes sans délai au secrétaire du bureau d'hygiène dans la province ou Etat où ces immigrants sont destinés.

Stations de quarantaine non organisées.

32. A tout port où il n'y aura pas de station de quarantaine régulière, le percepteur des douanes à ce port sera l'officier de quarantaine pour les fins des présents règlements ; et chaque tel port sera désigné comme Station de quarantaine non organisée.

33. Tout navire arrivant d'un port infecté à une station de quarantaine non organisée, ou à bord duquel serait survenu quelque décès d'une maladie infectieuse ou se serait déclarée quelque maladie infectieuse pendant la traversée, restera au large jusqu'à ce qu'il reçoive de l'officier de quarantaine la permission d'entrer.

34. Tous les règlements applicables aux stations de quarantaine régulièrement organisées s'appliqueront aussi à chaque station de quarantaine non organisée en tant que les circonstances le permettront, et surtout les dispositions touchant l'inspection, l'ancrage et le mouillage, la désinfection, les acquits de douane, le retour en mer avant de rompre le chargement, les questions au chirurgien ou aux officiers du navire, et les amendes.

35. Tout percepteur ou sous-percepteur des douanes en sa capacité d'officier de quarantaine à une station de quarantaine non organisée en Canada, qui apprend ou a raison de soupçonner la présence d'aucune des principales maladies quarantenaires citées à l'article 21 des présents règlements, ordonnera qu'il soit fait une inspection médicale du navire apportant cette maladie ;

(*a.*) Si un navire arrive à une station de quarantaine non organisée avec de la maladie sujette à quarantaine à bord, le capitaine paiera un honoraire de $4 pour chaque inspection médicale ordonnée par l'officier de quarantaine, et cet honoraire devra être payé avant que l'acquit de douane ne soit accordé ;

(*b.*) S'il ne se trouve pas de maladie à bord d'un navire arrivant à une station de quarantaine non organisée et que l'officier de quarantaine a ordonné d'inspecter, les frais de cette inspection ne seront pas une charge contre le navire, mais seront défrayés par le gouvernement.

Remorqueurs à vapeur.

36. Tout remorqueur ou autre navire à vapeur qui aura remorqué ou autrement communiqué avec un navire de la classe de ceux sujets à la quarantaine ou l'inspection quarantenaire, sera, par ce fait, soumis aux mêmes règlements et exigences qui s'appliquent au navire avec lequel il y aura eu communication.

(*a.*) Si la communication entre le navire et le remorqueur à vapeur se borne à l'amarrage d'un câble, et ensuite relâché, l'officier de quarantaine pourra décider d'exempter ce remorqueur de la détention quarantenaire.

Guenilles.

37. Les guenilles venant d'un port ou pays où sévit une maladie infectieuse, pourront être prohibées, et le nom de tout port ou pays ainsi infecté sera, de temps à autre, publié dans la *Gazette du Canada ;*

(*a.*) Les guenilles venant de ports prohibés à une station de quarantaine, seront sujettes à être brûlées ou autrement traitées sur l'ordre du Ministre de l'Agriculture basé sur un rapport de l'officier de quarantaine.

Nouvelles marchandises.

38. Les nouvelles marchandises en général pourront être acceptées sans question.

Périodes d'épidémie.

39. Pendant une période de maladie épidémique les passagers devraient être avertis par les agents de vapeurs de se dispenser, autant que possible, de bagage que l'eau pourrait gâter, dans le cas où il leur faudrait subir la désinfection—tels que les tissus dont les couleurs pourraient déteindre—vu que les propriétaires seront obligés de supporter tous les risques de dommages.

40. Durant une période de maladie épidémique les navires devraient se dispenser, autant que possible, des tentures, rideaux, tapis, etc., de laine, et y substituer des couvertures non absorbantes.

41. Chaque navire portant cargaison, et sujet à être désinfecté, devrait être muni d'un conduit en charpente uni, donnant un espace libre de 12 pouces partout à l'intérieur, placé dans la grande écoutille, pour un navire à voiles ; et un dans chaque écoutille d'un vapeur, divisé par des cloisons. La charpente de ce conduit serait posée avant le chargement, et s'étendrait de l'écoutille au fond de cale. Ce simple arrangement recevrait le tuyau de fumigation et éviterait de déranger la cargaison.

Passagers.

42. Pour les fins des présents règlements, les passagers sont divisés en deux classes : cabine et entrepont. Les passagers d'entrepont sont ceux qui occupent des compartiments autres que ceux de premières et de secondes.

Méthodes de désinfection.

43. Les méthodes de désinfection aux stations de quarantaine du Canada seront comme suit :—

(*a.*) Exposition à la vapeur pas moins que 30 minutes, température de la vapeur pas moindre que 100° centigrade (212° Fahrenheit) ni plus élevée que 115° centigrade (239° Fahrenheit) ;

(*b.*) Les articles susceptibles d'être détruits par la susdite méthode seront désinfectés en les mouillant parfaitement avec une solution de chlorure de mercure, dans la proportion d'une partie dans mille, ou disons un drachme dans un gallon, mesure de vin, ce qui peut se faire par le moyen d'une brosse, ou par l'arrosage ou le trempage.

(*c.*) Si l'on emploie du dioxyde de soufré, on l'obtient en brûlant pas moins de 3 livres de soufre en canon par 1,000 pieds cubes d'espace, ou si on l'emploie sous forme liquide, de la même force proportionnée, et la période d'exposition sera d'au moins 6 heures.

43. La désinfection des navires en fer se fera comme suit, selon le cas :—

(*a.*) *Cales.*—Après le nettoyage mécanique, la cale sera parfaitement lavée avec une solution acidique de chlorure de mercure, 1 dans 800 (chlorure de mercure, 1 partie, acide hydrochlorique 2 parties, eau 800 parties), appliquée à toutes les surfaces au moyen d'un boyau. Si l'on redoute les effets dangereux du mercure déposé sur les surfaces, on pourra les laver plus tard avec de l'eau nette ;

(*b.*) *Entrepont.*—Le même traitement devrait être appliqué à l'entrepont qu'à la cale, mais quand le navire est muni d'un tuyau à vapeur pour chaque compartiment (en cas d'incendie), la désinfection à la vapeur de l'entrepont sera pratiquée. La température dans toutes les parties de chaque compartiment ne sera pas moindre que 100° C. (212° Fahr.) ;

(*c.*) *Gaillard d'avant ou département de l'équipage.*—Après le nettoyage mécanique, l'application du chlorure de mercure de la manière ci-dessus décrite, ou les fumées sulfureuses, ou la désinfection à la vapeur, si des facilités sont fournies à cette fin ;

(*d.*) *Quartiers des officiers, cabines, etc.*—Chaque compartiment recevra le même traitement, dans les mêmes conditions que ci-dessus, mais il faudra se rappeler que les décorations en métal dans les cabines, salons, etc., seraient gâtées par l'usage de la solution de chlorure de mercure, et en conséquence, il faudra employer d'autre forme de désinfection, selon que le décidera l'officier de quarantaine.

45. La désinfection des navires de bois se fera comme suit, selon le cas :—

(*a.*) Fumigation au moyen de dioxyde de soufre obtenu en brûlant pas moins que 3 livres de soufre en canon pour chaque 1,000 pieds cubes d'espace ; ou au moyen du dioxyde de soufre liquide dans la même proportion ; et la durée de l'exposition sera d'au moins 24 heures ;

(*b.*) Lavage ou arrosage avec une solution acidique de chlorure de mercure (1 dans 800). Cabines, gaillard d'avant et autres appartements seront parfaitement lavés avec une solution de bichlorure, et tous les vêtements, literie, rideaux, etc., seront exposés à la vapeur pendant 30 minutes, à une température de 100° C. (212° Fahr.) à 115° C. (239° Fahr.)

46. Dans toutes les classes de navires les fonds de cales seront d'abord remplis d'eau de mer ou de rivière, vidés par les pompes et ensuite traités d'une solution de chlorure de mercure en grande quantité, laissée en contact longtemps.

Stations de quarantaine non organisées de l'intérieur.

47. Chaque port de l'intérieur, sur la frontière du Canada, entre les océans Atlantique et Pacifique, où il se trouve un percepteur ou un sous-percepteur des douanes, sera, pour les fins des présents règlements, constitué en station de quarantaine non organisée de l'intérieur.

48. Chaque percepteur ou sous-percepteur de douanes à tout tel point de frontière, sera l'officier de quarantaine.

49. Tout percepteur ou sous-percepteur des douanes, en sa capacité d'officier de quarantaine à une station

de quarantaine non organisée de l'intérieur en Canada, s'il est informé ou s'il a raison de soupçonner la présence d'une des principales maladies quarantenaires citées à l'article 21 des présents règlements, devra, en temps de choléra ou autre maladie épidémique, faire faire une inspection médicale du char, wagon, véhicule, bateau ou chose apportant cette maladie ;

(*a.*) Et cet officier de quarantaine est autorisé à détenir ce char, wagon, véhicule, bateau ou chose, jusqu'à ce que cette inspection médicale ait été faite à sa satisfaction ;

(*b.*) Tout médecin faisant cette inspection par ordre de l'officier de quarantaine, sera, tant qu'il sera ainsi engagé, le médecin de quarantaine.

50. L'honoraire payable à cet officier de quarantaine pour chaque telle inspection n'excèdera pas la somme de $4, et dans le cas où il se découvrirait une maladie sujette à la quarantaine, cet honoraire sera payable par la compagnie ou propriétaire du char, wagon, véhicule, bateau ou chose apportant la maladie.

51. Le percepteur ou sous-percepteur des douanes, en sa capacité d'officier de quarantaine devra, sur le rapport du médecin de quarantaine, dans un temps de maladie épidémique, s'il découvrait quelqu'une des principales maladies quarantenaires, faire détenir le char, wagon, véhicule, bateau ou chose apportant une personne atteinte de cette maladie infectieuse, jusqu'à ce que les exigences des présents règlements aient été remplies à sa satisfaction ;

(*a.*) Toute telle personne malade ne pourra pas entrer au Canada tant que le médecin de quarantaine ne jugera pas sûr de le lui permettre ;

(*b.*) Tout char, wagon, véhicule, bateau ou chose apportant cette personne malade à la frontière pourra s'en retourner plutôt que de subir la détention quarantenaire ; ou

DEMANDES AU PARLEMENT.

RÈGLES *in re* AVIS DE BILLS PRIVÉS.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos "Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.

JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b* Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

—

Ordre spécial de la Chambre des Communes.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

Substance des règles et formes de procéder du Sénat concernant les bills de divorce.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

36. Any steam tug or other vessel which shall have towed or otherwise communicated with any vessel of the class of vessels subject to quarantine or quarantine inspection shall thereby be held to the same regulations and requirements as apply to the vessel communicated with;

39. 40. Vessels during a period of epidemic disease should dispense as far as possible with woollen hangings, curtains, carpets and upholstering, substituting non-absorbing coverings.

41. Every vessel carrying cargo, and liable to be disinfected, should have provided a plain frame shaft allowing a clear inside space of 12 inches each way, placed in the main hatch, in a sailing vessel; and one in each hatch of a steamship, divided by bulkheads. The frame-work in this shaft to be set before loading and to extend from the hatchway to the bottom of the vessel. This simple arrangement would receive the fumigating pipe and avoid shifting cargo.

Passengers.

42. Passengers, for the purpose of these regulations are divided into two classes: cabin and steerage. Steerage passengers are those occupying compartments other than those of first and second cabin.

Methods of Disinfection.

43. The methods of disinfection at the Quarantine Stations of Canada shall be as follow:—

(*b.*) Articles that would be destroyed by the above method to be disinfected by thoroughly wetting with a solution of mercuric chloride, of one part to one thousand, or approximately one drachm to one gallon, wine measure, applied by means of a brush, or by drenching, or by immersion.

(*c.*) Where sulphur dioxide is used it is to be provided by burning not less than 3 pounds of rolled sulphur per 1000 cubic feet of space, or if it is used in liquid form, in the same proportionate strength, and the period of exposure to be not less than 6 hours.

44. The disinfection of iron vessels shall be as follows, as may be required:—

(*a.*) *Holds*—After mechanical cleansing, the hold to be thoroughly washed with an acid solution of mercuric chloride, 1 to 800 (mercuric chloride 1 part, hydrochloric acid 2 parts, water 800 parts), applied to all surfaces by means of a hose. If danger is apprehended from the poisonous effects of the mercury deposited on the surfaces, it can be subsequently washed down with clean water;

(*b.*) *Steerage*—The same treatment should be given the steerage as to the hold, but when there is a steampipe provided for each compartment (for the prevention of fire), steam disinfection of the steerage should be practised. The temperature in all parts of each compartment to be not less than 100° C. (212° Fahr.);

(*c.*) *The forecastle or apartment for crew*—After mechanical cleansing the application of mercuric chloride in the manner hereinbefore prescribed, or sulphurous fumes, or steam disinfection, if facilities are provided for the same;

(*d.*) *Officers' quarters, cabin, staterooms, etc.*—Each compartment to receive the same treatment, under the same conditions as hereinbefore specified, it being borne in mind that the decorative metal work in cabins, saloons, &c., would be injured by the use of the mercuric chloride solution, and therefore in such cases other forms of disinfection are to be used as determined by the Quarantine Officer.

45. The disinfection of wooden vessels shall be as follows, as may be required:—

(*a.*) Fumigation by sulphur dioxide made by burning not less than 3 pounds of rolled sulphur to each 1,000 cubic feet of space; or by the use of liquid sulphur dioxide in the same proportionate strength;

and the period of exposure to be not less than 24 hours.

(*b.*) Washing or flushing with acid solution of mercuric chloride (1 to 800). Cabins, forecastle and other apartments to be thoroughly washed with bichloride solution, and all clothing, bedding, curtains, etc., to be subjected to steam for 30 minutes at from 100° C. (212° Fahr.) to 115° C. (239° Fahr.)

46. In all classes of vessels the bilges to be first flushed with sea or river water, pumped out, and then treated with acid solution of mercuric chloride in large quantity, and allowed to remain in long contact.

48. Every Collector or Sub-Collector of Customs at every such inland frontier port shall be the Quarantine Officer.

49. Any Collector or Sub-Collector of Customs in his quality of quarantine officer at any inland unorganized quarantine station in Canada, if he is informed of or has reason to suspect the presence of any of the graver quarantinable diseases recited in section 21 of these regulations shall, in time of cholera or other epidemic disease, order a medical inspection to be made of the car, carriage, vehicle, boat or thing bringing such disease;

51. The Customs Collector or Sub-Collector in his quality of quarantine officer shall, on the report of the medical quarantine officer, in a time of epidemic disease, in the event of any of the graver quarantinable diseases being found, cause the detention of the car, carriage, vehicle, boat or thing, bringing any person ill with such infectious disease until the requirements of these regulations are in his judgment satisfied.

(*a.*) Any such sick person shall not be allowed to enter Canada until in the opinion of the medical quarantine officer he or she can safely do so;

(*b.*) Any car, carriage, vehicle, boat or thing, bringing such sick person to the frontier shall have the option of returning as an alternative to quarantine detention; or

(*c.*) The Customs Collector or Sub-Collector in his quality of quarantine officer shall in his discretion, on the report of the quarantine medical officer, cause the removal and isolation of such sick person in any car or boat, set apart for the purpose, or in any suitable building sufficiently separated from other buildings to prevent contact;

(*d.*) And such quarantine officer may cause the disinfection of the car, carriage, vehicle, boat or thing bringing such sick person, by means of sulphurous fumes, or any other mode of disinfection prescribed in these regulations adapted to the circumstances of the particular case.

52. In the event of cholera or other epidemic disease prevailing in any part of the United States through which a railway crossing the frontier of Canada runs, the Governor in Council may, on an order published in the *Canada Gazette* or in an extra of the *Canada Gazette*, made on a report of the Minister of Agriculture, and where there may not happen to be at that point of the frontier any adequate quarantine arrangements and apparatus to cope with an inroad of such epidemic disease, direct the complete cessation of passenger traffic at such point; or such restriction thereof, as may in the circumstances be deemed advisable.

Quarantine Officers give all necessary Orders—Prohibited from Receiving Fees or Gratuities.

53. Every quarantine officer is empowered to give any necessary order, or do any necessary act, to enforce these regulations, and it is his duty to report any breach of them, or any attempted breach, immediately to the Minister of Agriculture;

1. Manufacturers desiring to avail themselves of the drawback permitted by the Act above quoted, shall set aside some certain portion of their premises, approved by the Collector of Inland Revenue, and under the control of the Inland Revenue Department, and licenced as an Excise Bonding Warehouse, wherein the duty-paid spirits shall be used in the manufacture of the desired products.

2. The manufacturer shall record the various transactions in such books as may be determined by the Department of Inland Revenue.

I. ROCK IN DEPARTURE BAY.

Captain J. T. Walbran, master of the Dominion steamer "Quadra," reports having found a rock on the north side of the channel between Jesse Island and Horsewell Bluff, Departure Bay, on the Eastern Coast of Vancouver Island, British Columbia.

The rock is an isolated boulder of very small extent, and has two feet water over it at extreme low tide. Alongside the rock on the channel, or south side, is $5\frac{1}{4}$ fathoms, deepening rapidly to 6, 7 and 13; and on the north side $4\frac{1}{2}$ fathoms. The rock is on the 5-fathom line of Admiralty chart No. 2512, and bears from the extreme of Horsewell Bluff S. by E. (S. 11° W. true), and from the westernmost bluff of Jesse Island N.E. by N. (N. 58° E. true); distant from the nearest shore $\frac{3}{4}$ cable.

Captain Walbran reports that the spot with 2 fathoms about $\frac{3}{4}$ cable eastward of the east point of Jesse Island, and the shoal with 3 fathoms about the same distance S.E. of the east point of the island S.W. of Jesse Island, do not exist.

This notice affects Admiralty charts Nos. 579 and 2512.

Captain Smith, lately in command of the steamer "Etta White," states that the sounding marked 2 fathoms on Admiralty chart No. 585, in the narrow passage between Garden Bay and Gunboat Bay, Pender Harbour, Malaspina Strait, British Columbia, should be $1\frac{1}{2}$ fathoms, he having found that depth upon sounding the channel at extreme low water. He also reports that the fairway of the channel is very narrow, caused by rocks jutting out on each side, and should only be used with great caution. The tide sets strongly through the passage.

CONSIDÉRANT qu'en vertu des Statuts Revisés du Canada, chapitre soixante-huit, il est entre autres choses en substance décrété, que le Gouverneur en conseil peut établir au besoin les règlements—pour la mise à exécution de toutes les prescriptions du dit acte—et concernant l'arrivée et le départ des navires aux différents ports ou lieux du Canada, le débarquement de leurs passagers ou de leurs cargaisons, ou l'embarquement sur ces navires de passagers ou de cargaisons—qu'il juge convenables pour la conservation de la santé publique; et pour assurer l'observation de la quarantaine par et en ce qui concerne les navires, passagers, marchandises ou choses arrivant en Canada, à un port ou lieu ou dans le voisinage d'un port ou lieu, auquel il croit bon, dans l'intérêt de la salubrité publique, d'appliquer les dits règlements, et pour purifier et désinfecter parfaitement les dits navires, passagers, marchandises ou choses, ou concernant l'arrivée ou le départ à quelque lieu que ce soit en Canada de personnes, marchandises ou choses transportées par terre, et pour assurer la stricte observation de la quarantaine par et en ce qui concerne les dites personnes, marchandises et choses, en Canada, en un lieu ou dans le voisinage d'un lieu auquel il croit bon, pour la conservation de la salubrité publique, d'appliquer les dits règlements—et pour purifier et désinfecter parfaitement les dites personnes, marchandises et choses, afin de prévenir autant que possible l'introduction ou la propagation de maladies en Canada, le tout selon qu'il le jugera à propos; et peut aussi nommer et déplacer les personnes qu'il croit nécessaires pour l'exécution de ce service, et leur assigner respectivement les pouvoirs qu'il juge nécessaires pour exécuter les dispositions des dits règlements; et il peut imposer des peines, confiscations et punitions pour leur infraction; et ces règlements seront rendus publics par proclamation insérée au moins deux fois dans la *Gazette du Canada;* Et, de plus, ces règlements auront force de loi; et toute personne qui désobéit à quelqu'un de ces règlements est coupable de délit et passible d'amende ou d'emprisonnement ou des deux peines, selon que la cour l'ordonnera, ou elle peut être poursuivie pour les peines portées aux dits règlements;

ET CONSIDÉRANT qu'il a plu à Notre Gouverneur Général en conseil d'ordonner qu'une proclamation soit émise rescindant les règlements de quarantaine établis par arrêté de Notre Gouverneur Général en conseil, en date du 20 de juin A.D. 1893, de même que tous autres règlements de quarantaine faits et publiés jusqu'à la dite date, et leur substituant et mettant en force les Règlements revisés et modifiés qui suivent, relatifs à la quarantaine des navires arrivant en Canada;

EN CONSÉQUENCE, en vertu du pouvoir qui Nous est conféré par les Statuts Revisés du Canada, chapitre soixante-huit, et intitulé "Acte concernant la quarantaine," et par et avec l'avis de Notre Conseil privé pour le Canada, Nous proclamons et déclarons que les Règlements de quarantaine établis par arrêté de Notre Gouverneur Général en conseil en date du 20e jour de juin A.D. 1893, de même que tous règlements de quarantaine antérieurs, soient, et ils sont par le présent rescindés, et que les Règlements de quarantaine suivants établis par arrêté de Notre Gouverneur Général en conseil le 10e jour de septembre A.D. 1894, soient et ils sont par le présent substitués et mis en force, savoir :—

4. Et tout port douanier intérieur sur la frontière canadienne, entre les océans Pacifique et Atlantique, chaque tel port étant désigné comme Station de quarantaine intérieure non organisée.

5. Chaque station de quarantaine est sous le contrôle immédiat d'un médecin quarantenaire spécialement nommé.

(*a.*) A chaque station de quarantaine non organisée et à chaque station de quarantaine intérieure non organisée le percepteur des douanes de l'endroit est l'officier quarantenaire pour les fins des présents règlements ;

(*b.*) Tout le service de quarantaine du Canada est sous l'administration du Ministre de l'Agriculture.

6. Tout officier de quarantaine à une station de quarantaine en Canada, et tout percepteur des douanes en sa capacité d'officier de quarantaine, seront, pour les fins des présents règlements, juges de paix en vertu des dispositions de l'article 5 de l'Acte concernant la quarantaine, chap. 68 des Statuts Revisés.

Dispositions générales.

7. Tout navire arrivant d'un port en dehors du Canada à une station de quarantaine organisée sera inspecté par un officier de quarantaine dûment nommé, à l'endroit dûment fixé pour cette inspection, et il ne lui sera pas permis de faire une déclaration à la douane à aucun port du Canada tant qu'il n'aura pas reçu une patente de santé.

8. Il ne sera permis à aucune personne de débarquer d'un navire tant que cette personne n'aura pas été déclarée par un officier de quarantaine exempte de maladie contagieuse, ni tant que cet officier ne sera pas satisfait que ce débarquement peut s'effectuer sans danger pour la salubrité publique.

9. Tout navire venant d'un port en dehors du Canada, et ayant besoin d'une inspection quarantenaire, devra, en arrivant à un port quelconque du Canada, hisser un pavillon jaune à l'avant comme signal distinct de quarantaine, de façon à informer l'officier de quarantaine que ses services sont requis, et tout navire arrivant de nuit exhibera un feu rouge à l'avant comme tel signal.

10. Les cabotiers de Terreneuve et de ports des Etats-Unis contigus au Canada, et exempts de maladie contagieuse pourront, de temps à autre, être exceptés des présents règlements par ordre du Ministre de l'Agriculture.

11. Tout navire de guerre de Sa Majesté ou tout transport portant des troupes de Sa Majesté, accompagné d'un médecin, et n'ayant pas de maladie à bord, est exempt de l'inspection et de la détention quarantenaires.

Détention quarantenaire.

12. Chaque officier de quarantaine devra s'assurer de la présence ou de l'absence d'une maladie infectieuse par une inspection personnelle des personnes à bord, ou par la déclaration assermentée du capitaine ou du chirurgien, en la formule ci-jointe, ou par les deux.

13. Tout navire ayant de la maladie contagieuse à bord, ou venant d'un port ou pays infecté, sera sujet à être détenu à une station de quarantaine pour y être désinfecté, ainsi que ses passagers, son équipage et son pilote, et le bagage des passagers et la cargaison.

(*a.*) Un navire pourra être détenu à la quarantaine pour être désinfecté pendant tout le temps que la chose sera nécessaire ;

(*b.*) Le temps pendant lequel un navire pourra être détenu en quarantaine d'observation, est la période acceptée de l'incubation de la maladie contre laquelle l'on se garde à compter de la date constatée de la dernière exposition possible.

14. Tout navire ainsi détenu par ordre de l'officier de quarantaine sera sans délai ancré ou mouillé à l'endroit que fixera l'officier de quarantaine.

15. Et tant que ce navire est ainsi détenu, personne ne quittera le navire, ni n'aura de communication avec tel navire, sans la permission de l'officier de quarantaine.

16. L'officier de quarantaine qui détiendra un navire comme susdit, devra immédiatement avertir le Ministre de l'Agriculture, énonçant la cause de cette détention.

17. D'après l'interprétation des présents règlements, un port ou pays infecté est un port ou pays où le choléra asiatique ou autre maladie épidémique a été communiqué à une ou plusieurs personnes par la voie d'une personne ou d'effets d'habillement infectés ou autrement. Un port ou pays n'est pas considéré infecté lorsqu'il ne s'est déclaré qu'un simple cas ou un petit nombre de cas et que la maladie n'a pas été communiquée par ces cas.

Heures d'inspection—Retour en mer—Frais.

18. Tout navire pourra être inspecté en tout temps pendant les vingt-quatre heures ;

(*a.*) Sauf que dans les temps d'épidémie le Ministre de l'Agriculture pourra ordonner que l'inspection ne se fasse que pendant les heures de jour.

19. Tout navire aura le droit, avant de rompre son chargement, de retourner en mer au lieu de se mettre en quarantaine, tel que prévu par l'article 9 de l'acte intitulé "Acte concernant la quarantaine," chap. 68, Statuts Revisés.

20. Tous les frais encourus pour l'entretien des personnes en santé qui pourraient avoir été exposées à l'infection, et sont détenues en quarantaine d'observation, seront à la charge du navire ;

(*a.*) Et le capitaine d'un navire pourra faire des arrangements avec l'officier de quarantaine pour débarquer les provisions nécessaires et les serviteurs ou économes pour les distribuer ;

(*b.*) Les personnes actuellement malades sont traitées et soignées dans les hôpitaux de quarantaine, aux frais du gouvernement ;

(*c.*) S'il est permis à un navire de continuer sa route et de laisser ses passagers en quarantaine, le transport subséquent de tels passagers de la quarantaine au port de destination sera à la charge du navire.

Maladies quarantenaires.

21. Les principales maladies quarantenaires sont : le choléra asiatique, la petite vérole, le typhus, la fièvre jaune et la peste. Les maladies secondaires, sont la fièvre scarlatine, les fièvres entériques (typhoïdes), la diphtérie, la rougeole et la varicelle (petite vérole volante.)

(*a.*) En sus de ce qui précède il est du devoir de tout officier de quarantaine de s'assurer de la présence ou de l'absence de toute autre maladie contagieuse ou infectieuse ;

(*b.*) Et quant à la lèpre il est du devoir de chaque officier de quarantaine, surtout sur la côte du Pacifique, de bien s'assurer de la présence ou de l'absence de cette maladie parmi les passagers, et advenant la découverte de quelque cas de cette maladie, la personne atteinte n'aura pas la permission de descendre à terre, mais elle devra être ramenée par le navire à l'endroit d'où elle vient.

Les pilotes fourniront les règlements.

22. Chaque pilote devra fournir au capitaine de tout navire arrivant à un port en Canada, un exemplaire des présents règlements sous peine de l'amende ci-après prescrite.

Vaccination.

23. Chaque passager sera tenu de prouver à la satisfaction de l'officier de quarantaine qu'il a été vacciné ou qu'il a déjà eu la petite vérole.

24. La production d'un certificat par le chirurgien du navire, appelé "Carte de protection," et sa déclaration sous serment à l'appui de la vérité de ce certificat, seront considérées par l'officier de quarantaine comme preuve de cette vaccination et de cette protection. Toutefois, l'officier de quarantaine pourra, de temps à autre, faire un examen personnel des porteurs de ces certificats, afin de s'assurer de la manière que ces certificats ont été émis.

25. Toute personne qui ne donnera pas une preuve satisfaisante d'avoir été vaccinée ou d'avoir eu la petite vérole, sera vaccinée par un officier de quarantaine, ou, dans le cas de refus, sera débarquée à la station de quarantaine, pour y subir une quarantaine d'observation ; et les frais d'entretien de cette personne pendant cette quarantaine d'observation seront une dette sur le navire.

(*a.*) Un navire qui arrive à une station de quarantaine en Canada sera moins sujet d'être détenu si la vaccination de tous les passagers d'entrepont qui n'offrent aucune preuve d'avoir été vaccinés dans les derniers sept ans, est exigée avant l'embarquement. Le chirurgien du navire devrait s'assurer du fait vis-à-vis de chaque passager au début de la traversée, ou au temps de l'embarquement si possible, afin d'être en état de répondre aux questions que lui posera l'officier de quarantaine.

26. Si la pétite vérole s'est déclarée sur un navire, chaque passager à bord qui n'offre aucune preuve satisfaisante d'avoir été vacciné dans le cours des derniers sept ans, ou d'avoir eu la petite vérole durant cette période, sera vacciné par ou sous la surveillance de l'officier de quarantaine ; ou, dans le cas de refus, il sera débarqué à la station de quarantaine, sujet à la détention pour observation, et les frais d'entretien de cette personne ou de ces personnes pendant cette détention sera une dette sur le navire.

Examen.

27. L'officier de quarantaine examinera le chirurgien ou tout officier d'un navire, sous serment, touchant l'état de santé de ce navire et de chaque personne à bord, dans la forme de questions annexées aux présents règlements.

Isolement.

28. Tout navire muni d'un hôpital isolé pour les hommes, et un autre pour les femmes, sur le pont supérieur, ventilé d'en haut et non par la porte seulement, pourra, s'il est prouvé à la satisfaction de l'officier de quarantaine que cet hôpital a été promptement et intelligemment employé, continuer sa route après avoir mis à terre les malades, et après la désinfection de l'hôpital qui aura servi ; néanmoins, tout navire qui arrivera avec quelque maladie infectieuse, sans être muni de ces hôpitaux spéciaux isolés et ventilés, ou, étant muni de ces hôpitaux, sans preuve satisfaisante qu'ils ont été promptement et intelligemment employés, sera sujet à être détenu pour être désinfecté à une station de quarantaine.

Malles à Rimouski.

29. Dans le cas d'un navire portant les malles de Sa Majesté et arrivant par la voie du Saint-Laurent, le certificat d'acquit sera accordé par un officier de quarantaine à Rimouski ou Grosse-Ile, et dans le cas de tout autre navire à la Grosse-Ile seulement.

(*a.*) Sauf que durant un temps de choléra ou autre épidémie, la permission accordée à un paquebot-poste venant d'un port ou pays infecté, de débarquer des passagers à Rimouski, pourra être suspendue par ordre du Ministre de l'Agriculture ;

(*b.*) Et dans ces conditions les malles seules seront débarquées à Rimouski, le navire continuant sa route à la Grosse-Ile pour inspection ;

(*c.*) Si le choléra s'était déclaré à bord de ce navire dans le cours de la traversée, les sacs extérieurs contenant les matières postales seront laissés à bord du vapeur pour être désinfectés à la Grosse-Ile.

Désinfection du bagage.

30. En temps de choléra ou autre épidémie, le bagage des immigrants ou passagers sur un navire arrivant à un port du Canada, que ce navire vienne ou non d'un port ou pays infecté, pourra, par ordre du Ministre de l'Agriculture, être désinfecté dans chaque cas.

(*a.*) Lorsque cette désinfection est faite à une station auxiliaire, subséquemment à l'inspection et acquit à la station principale, l'acquit accordé par l'officier quarantenaire portera comme condition que les immigrants et leur bagage seront débarqués pour être désinfectés.

(*b.*). L'officier surveillant cette désinfection comptera les immigrants à mesure qu'ils débarquent, et s'il trouve que le nombre s'accorde avec le nombre marqué sur l'acquit de l'officier de quarantaine, et a une preuve satisfaisante que tout leur bagage a été débarqué avec eux, il poinçonnera l'acquit à l'endroit marqué à cette fin, et cet acquit sera alors reçu à la douane.

Certificats de passage.

31. Chaque officier de quarantaine maritime poinçonnera le "Certificat de passage International" d'immigrants, quand ce certificat est en usage, de manière à faire connaître aux officiers de santé à l'intérieur le résultat de l'inspection quarantenaire, tel que prévu par cette carte ou certificat.

(*a.*) Chaque officier de quarantaine maritime poinçonnera la liste des immigrants par destination, province, ou Etat (s'ils sont en destination des Etats-Unis), quand de telles listes sont en usage, que fournira le chirurgien du navire sur des formules fournies par le gouvernement, et transmettra ces listes sans délai au secrétaire du bureau d'hygième dans la province ou Etat où ces immigrants sont destinés.

Stations de quarantaine non organisées.

32. A tout port où il n'y aura pas de station de quarantaine régulière, le percepteur des douanes à ce port sera l'officier de quarantaine pour les fins des présents règlements ; et chaque tel port sera désigné comme Station de quarantaine non organisée.

33. Tout navire arrivant d'un port infecté à une station de quarantaine non organisée, ou à bord duquel serait survenu quelque décès d'une maladie infectieuse ou se serait déclarée quelque maladie infectieuse pendant la traversée, restera au large jusqu'à ce qu'il reçoive de l'officier de quarantaine la permission d'entrer.

34. Tous les règlements applicables aux stations de quarantaine régulièrement organisées s'appliqueront aussi à chaque station de quarantaine non organisée en tant que les circonstances le permettront, et surtout les dispositions touchant l'inspection, l'ancrage et le mouillage, la désinfection, les acquits de douane, le retour en mer avant de rompre le chargement, les questions au chirurgien ou aux officiers du navire, et les amendes.

35. Tout percepteur ou sous-percepteur des douanes en sa capacité d'officier de quarantaine à une station de quarantaine non organisée en Canada, qui apprend ou a raison de soupçonner la présence d'aucune des principales maladies quarantenaires citées à l'article 21 des présents règlements, ordonnera qu'il soit fait une inspection médicale du navire apportant cette maladie ;

(*a.*) Si un navire arrive à une station de quarantaine non organisée avec de la maladie sujette à quarantaine à bord, le capitaine paiera un honoraire de $4 pour chaque inspection médicale ordonnée par l'officier de quarantaine, et cet honoraire devra être payé avant que l'acquit de douane ne soit accordé ;

(*b.*) S'il ne se trouve pas de maladie à bord d'un navire arrivant à une station de quarantaine non organisée et que l'officier de quarantaine a ordonné d'inspecter, les frais de cette inspection ne seront pas une charge contre le navire, mais seront défrayés par le gouvernement.

Remorqueurs à vapeur.

36. Tout remorqueur ou autre navire à vapeur qui aura remorqué ou autrement communiqué avec un navire de la classe de ceux sujets à la quarantaine ou l'inspection quarantenaire, sera, par ce fait, soumis aux mêmes règlements et exigences qui s'appliquent au navire avec lequel il y aura eu communication.

(*a.*) Si la communication entre le navire et le remorqueur à vapeur se borne à l'amarrage d'un câble, et ensuite relâché, l'officier de quarantaine pourra décider d'exempter ce remorqueur de la détention quarantenaire.

Guenilles.

37. Les guenilles venant d'un port ou pays où sévit une maladie infectieuse, pourront être prohibées, et le nom de tout port ou pays ainsi infecté sera, de temps à autre, publié dans la *Gazette du Canada ;*

(*a.*) Les guenilles venant de ports prohibés à une station de quarantaine, seront sujettes à être brûlées ou autrement traitées sur l'ordre du Ministre de l'Agriculture basé sur un rapport de l'officier de quarantaine.

Nouvelles marchandises.

38. Les nouvelles marchandises en général pourront être acceptées sans question.

Périodes d'épidémie.

39. Pendant une période de maladie épidémique les passagers devraient être avertis par les agents de vapeurs de se dispenser, autant que possible, de bagage que l'eau pourrait gâter, dans le cas où il leur faudrait subir la désinfection—tels que les tissus dont les couleurs pourraient déteindre—vu que les propriétaires seront obligés de supporter tous les risques de dommages.

40. Durant une période de maladie épidémique les navires devraient se dispenser, autant que possible, des tentures, rideaux, tapis, etc., de laine, et y substituer des couvertures non absorbantes.

41. Chaque navire portant cargaison, et sujet à être désinfecté, devrait être muni d'un conduit en charpente uni, donnant un espace libre de 12 pouces partout à l'intérieur, placé dans la grande écoutille, pour un navire à voiles ; et un dans chaque écoutille d'un vapeur, divisé par des cloisons. La charpente de ce conduit serait posée avant le chargement, et s'étendrait de l'écoutille au fond de cale. Ce simple arrangement recevrait le tuyau de fumigation et éviterait de déranger la cargaison.

Passagers.

42. Pour les fins des présents règlements, les passagers sont divisés en deux classes : cabine et entrepont. Les passagers d'entrepont sont ceux qui occupent des compartiments autres que ceux de premières et de secondes.

Méthodes de désinfection.

43. Les méthodes de désinfection aux stations de quarantaine du Canada seront comme suit :—

(*a.*) Exposition à la vapeur pas moins que 30 minutes, température de la vapeur pas moindre que 100° centigrade (212° Fahrenheit) ni plus élevée que 115° centigrade (239° Fahrenheit) ;

(*b.*) Les articles susceptibles d'être détruits par la susdite méthode seront désinfectés en les mouillant parfaitement avec une solution de chlorure de mercure, dans la proportion d'une partie dans mille, ou disons un drachme dans un gallon, mesure de vin, ce qui peut se faire par le moyen d'une brosse, ou par l'arrosage ou le trempage.

(*c.*) Si l'on emploie du dioxyde de soufre, on l'obtient en brûlant pas moins de 3 livres de soufre en canon par 1,000 pieds cubes d'espace, ou si on l'emploie sous forme liquide, de la même force proportionnée, et la période d'exposition sera d'au moins 6 heures.

43. La désinfection des navires en fer se fera comme suit, selon le cas :—

(*a.*) *Cales.*—Après le nettoyage mécanique, la cale sera parfaitement lavée avec une solution acidique de chlorure de mercure, 1 dans 800 (chlorure de mercure, 1 partie, acide hydrochlorique 2 parties, eau 800 parties), appliquée à toutes les surfaces au moyen d'un boyau. Si l'on redoute les effets dangereux du mercure déposé sur les surfaces, on pourra les laver plus tard avec de l'eau nette ;

(*b.*) *Entrepont.*—Le même traitement devrait être appliqué à l'entrepont qu'à la cale, mais quand le navire est muni d'un tuyau à vapeur pour chaque compartiment (en cas d'incendie), la désinfection à la vapeur de l'entrepont sera pratiquée. La température dans toutes les parties de chaque compartiment ne sera pas moindre que 100° C. (212° Fahr.) ;

(*c.*) *Gaillard d'avant ou département de l'équipage.*—Après le nettoyage mécanique, l'application du chlorure de mercure de la manière ci-dessus décrite, ou les fumées sulfureuses, ou la désinfection à la vapeur, si des facilités sont fournies à cette fin ;

(*d.*) *Quartiers des officiers, cabines, etc.*—Chaque compartiment recevra ~~le~~ même traitement, dans les mêmes conditions que ci-dessus, mais il faudra se rappeler que les décorations en métal dans les cabines, salons, etc., seraient gâtées par l'usage de la solution de chlorure de mercure, et en conséquence, il faudra employer d'autre forme de désinfection, selon que le décidera l'officier de quarantaine.

45. La désinfection des navires de bois se fera comme suit, selon le cas :—

(*a.*) Fumigation au moyen de dioxyde de soufre obtenu en brûlant pas moins que 3 livres de soufre en canon pour chaque 1,000 pieds cubes d'espace ; ou au moyen du dioxyde de soufre liquide dans la même proportion ; et la durée de l'exposition sera d'au moins 24 heures ;

(*b.*) Lavage ou arrosage avec une solution acidique de chlorure de mercure (1 dans 800). Cabines, gaillard d'avant et autres appartements seront parfaitement lavés avec une solution de bichlorure, et tous les vêtements, literie, rideaux, etc., seront exposés à la vapeur pendant 30 minutes, à une température de 100° C. (212° Fahr.) à 115° C. (239° Fahr.)

46. Dans toutes les classes de navires les fonds de cales seront d'abord remplis d'eau de mer ou de rivière, vidés par les pompes et ensuite traités d'une solution de chlorure de mercure en grande quantité, laissée en contact longtemps.

Stations de quarantaine non organisées de l'intérieur.

47. Chaque port de l'intérieur, sur la frontière du Canada, entre les océans Atlantique et Pacifique, où il se trouve un percepteur ou un sous-percepteur des douanes, sera, pour les fins des présents règlements, constitué en station de quarantaine non organisée de l'intérieur.

48. Chaque percepteur ou sous-percepteur de douanes à tout tel point de frontière, sera l'officier de quarantaine.

49. Tout percepteur ou sous-percepteur des douanes, en sa capacité d'officier de quarantaine à une station de quarantaine non organisée de l'intérieur en Canada, s'il est informé ou s'il a raison de soupçonner la présence d'une des principales maladies quarantenaires citées à l'article 21 des présents règlements, devra, en temps de choléra ou autre maladie épidémique, faire faire une inspection médicale du char, wagon, véhicule, bateau ou chose apportant cette maladie ;

(*a.*) Et cet officier de quarantaine est autorisé à détenir ce char, wagon, véhicule, bateau ou chose, jusqu'à ce que cette inspection médicale ait été faite à sa satisfaction ;

(*b.*) Tout médecin faisant cette inspection par ordre de l'officier de quarantaine, sera, tant qu'il sera ainsi engagé, le médecin de quarantaine.

50. L'honoraire payable à cet officier de quarantaine pour chaque telle inspection n'excèdera pas la somme de $4, et dans le cas où il se découvrirait une maladie sujette à la quarantaine, cet honoraire sera payable par la compagnie ou propriétaire du char, wagon, véhicule, bateau ou chose apportant la maladie.

51. Le percepteur ou sous-percepteur des douanes, en sa capacité d'officier de quarantaine devra, sur le rapport du médecin de quarantaine, dans un temps de maladie épidémique, s'il découvrait quelqu'une des principales maladies quarantenaires, faire détenir le char, wagon, véhicule, bateau ou chose apportant une personne atteinte de cette maladie infectieuse, jusqu'à ce que les exigences des présents règlements aient été remplies à sa satisfaction ;

(*a.*) Toute telle personne malade ne pourra pas entrer au Canada tant que le médecin de quarantaine ne jugera pas sûr de le lui permettre ;

(*b.*) Tout char, wagon, véhicule, bateau ou chose apportant cette personne malade à la frontière pourra s'en retourner plutôt que de subir la détention quarantenaire ; ou

(*c.*) Le percepteur ou sous-percepteur des douanes, en sa capacité d'officier de quarantaine devra, à sa discrétion, sur le rapport du médecin de quarantaine, faire enlever et isoler cette personne malade dans un char ou bateau mis à part dans ce but, ou dans une bâtisse convenable, assez éloignée des autres bâtiments pour prévenir tout contact ;

(*d.*) Et cet officier de quarantaine pourra faire désinfecter le char, wagon, véhicule, bateau ou chose apportant cette personne malade, au moyen des fumées sulfureuses, ou tout autre mode de désinfection prescrite par les présents règlements adapté aux circonstances du cas.

52. Dans le cas où le choléra ou autre maladie épidémique sévirait dans une partie des Etats-Unis par où passe une voie ferrée qui traverse la frontière du Canada, le Gouverneur en conseil pourra, par arrêté publié dans la *Gazette du Canada*, ou dans un extra de la *Gazette du Canada*, basé sur un rapport du Ministre de l'Agriculture, et dans le cas où il n'y aurait pas à ce point de la frontière d'arrangements et d'appareils propices pour enrayer la marche de cette maladie épidémique, ordonner la cessation complète du trafic des passagers à cet endroit ; ou y apporter telle restriction que les circonstances justifieront.

Les officiers de quarantaine donneront les ordres nécessaires—ne pourront recevoir d'honoraire ou de gratification.

53. Chaque officier de quarantaine est autorisé à donner tout ordre nécessaire, ou faire tout acte nécessaire pour l'exécution des présents règlements, et il est de son devoir de signaler toute infraction à ces règlements, immédiatement au Ministre de l'Agriculture ;

(*a.*) Aucun officier de quarantaine ni autre personne employée au service quarantenaire du Canada ne devra, directement ou indirectement, recevoir ou prendre d'honoraire ou de gratification ou récompense pour services rendus à toute compagnie, ou propriétaire, capitaine, ou équipage, passager ou autre personne détenue à une quarantaine, soit maritime, soit de l'intérieur. Toute personne qui connaîtra de quelque infraction aux présents règlements devrait de suite en faire rapport au Ministre de l'Agriculture.

Amendes imposées aux officiers de douanes, pilotes, capitaines, chirurgiens et officiers de navires.

54. Chaque pilote sera muni d'exemplaires imprimés des présents règlements, et il en donnera un au capitaine de tout navire venant d'un port en dehors du Canada, aussitôt en montant à bord, sous peine d'une amende de $50.

55. Chaque percepteur des douanes, ou officier des douanes, sera passible d'une amende de $400, et de l'emprisonnement pendant six mois, s'il permet la déclaration en douane d'un navire qui n'aura pas un acquit de quarantaine conformément aux prescriptions des présents règlements.

56. Chaque capitaine d'un navire sera passible d'une amende de $400 et d'un emprisonnement de six mois, s'il contrevient à aucun des susdits règlements. Le navire répondra de l'amende imposée au capitaine.

57. Tout chirurgien de navire ou autre officier qui manquera de répondre avec exacte vérité aux questions contenues dans la formule ci-jointe, sera passible d'une amende de $400, ou d'un emprisonnement de six mois.

58. Toute infaction au paragraphe *a* de l'article 53 des présents règlements sera considérée être un manquement de devoirs entraînant la démission, l'amende ou l'emprisonnement.

Questions posées par les officiers de quarantaine, auxquelles les capitaines, chirurgiens ou officiers de navires devront répondre sous serment.

Mercredi, le 17e jour d'octobre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

IL plaît à Son Excellence, en vertu des dispositions de l'article 119 de l'Acte du Revenu de l'Intérieur, chapitre 34 des Statuts Revisés, tel que modifié par l'article 2 de l'acte 57-58 Victoria, chapitre 35, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de faire les règlements suivants concernant le remboursement de droits payés sur des spiritueux employés dans la manufacture d'articles qui sont subséquemment exportés :—

RÈGLEMENTS concernant le remboursement de droits payés sur des spiritueux employés dans la manufacture d'articles qui sont subséquemment exportés.—57-58 Victoria, chapitre 35.

1. Les fabricants qui désirent se prévaloir du drawback permis par l'acte précité, mettront à part une certaine partie de leur propriété, approuvée par le percepteur du revenu de l'intérieur, et sous le contrôle du ministère du Revenu de l'Intérieur, et licencié comme entrepôt d'accise, dans laquelle les spiritueux acquittés seront employés dans la manufacture des produits voulus.

2. Les spiritueux seront transportés à ce local en entrepôt, et après que la quantité en aura été constatée, et que les droits imposables sur ces spiritueux auront été payés, ils seront employés en présence d'un officier du revenu de l'intérieur qui gardera un registre de tous spiritueux acquittés ainsi employés, et la proportion de ces spiritueux qui est entrée dans les divers articles manufacturés. Le fabricant enregistrera les diverses transactions dans les livres que le ministère du Revenu de l'Intérieur prescrira.

3. Le produit fini sera emmagasiné dans un compartiment fermé par un cadenas de la couronne, et livré au fabricant par l'officier en charge, pour être expédié à certains points du Canada selon le besoin.

4. Quand un tel produit fini est requis pour être exporté à un pays étranger, il sera livré avec les mêmes précautions que s'il était exporté en entrepôt, des déclarations d'exportation *pro forma* étant faites, mais aucune obligation exécutée.

5. Quand un produit fini est sorti pour l'exportation, le ministère pourra, au besoin, exiger qu'un échantillon de chaque description du produit fini soit expédié à Ottawa, à l'effet de contrôler le percentage de spiritueux acquittés que ce produit contient.

6. Sur production d'un certificat du principal officier des douanes ou du revenu colonial à l'endroit où les articles ont été exportés, ou, si cet endroit est un pays étranger autre que les Etats-Unis, de tout consul ou vice-consul britannique ou étranger résidant là énonçant que les articles ont été réellement débarqués et laissés à quelque endroit (*le nommant*) en dehors du Canada, et sur la déclaration assermentée du fabricant quant à la quantité de spiritueux acquittés employés dans la manufacture des dits articles et y contenus, le ministère du Revenu de l'Intérieur pourra rembourser un montant égal au droit payé sur les spiritueux ainsi employés. Chaque telle réclamation de drawback sera accompagnée du certificat de l'officier en charge quant à la quantité et description des produits finis livrés pour exportation, et le percentage et la quantité totale des spiritueux acquittés qui y est contenue.

7. Chaque fabricant employant des spiritueux acquittés, tel que prévu au présent, paiera au percepteur du revenu de l'intérieur, pendant sa durée de service, comme honoraire de surveillance, la somme de $100 par mois ; cette somme formera partie du Fonds consolidé du revenu.

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT qu'il est représenté que le taux de quaiage exigé sur le bois scié sur les quais contrôlés par le Ministère de la Marine et des Pêcheries, savoir 10 centins par mille pieds, mesure de planche, est excessif lorsqu'il s'agit de madriers exportés,—

Il plaît à Son Excellence, par et avec l'avis du Conseil privé de la Reine pour le Canada, d'ordonner, et il est par le présent ordonné que le taux de quaiage prélevé sur les madriers placés sur les quais, jetées et brise-lames de l'Etat pour être exportés du Canada, sera de 10 centins par 1000 pieds mesure de madriers.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

SUR un mémoire, daté le 16 d'octobre 1894, du Ministre de la Marine et des Pêcheries, soumettant pour approbation le règlement ci-joint concernant l'abandon, la destruction par le feu et le démolissement de navires dans le havre de Québec, passé le 27e jour de juillet 1894, à une réunion des Commissaires du Havre de Québec, en vertu des pouvoirs qui leur sont conférés par les actes 12 Victoria, chapitre 114, article 6, et 40 Victoria, chapitre 51, article 5.

Le Ministre dit que l'ingénieur en chef du ministère de la Marine et des Pêcheries lui a fait rapport que le règlement faciliterait l'enlèvement des épaves dans les limites du havre de Québec, qui sont de nature à obstruer la navigation.

Le Ministre fait observer de plus que le Ministre de la Justice a fait rapport qu'il n'existe pas d'objection au règlement en vertu des actes mentionnés.

Le comité, sur la recommandation du Ministre de la Marine et des Pêcheries, conseille que le dit règlement soit approuvé.

JOHN J. McGEE,
Greffier du Conseil privé.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

IL plaît à Son Excellence, en vertu des dispositions du 19e article de "l'Acte des falsifications," et par et avec l'avis du Conseil privé de la Reine pour le Canada, de faire le règlement ci-dessous, déclarant en quel temps le thé sera réputé falsifié :—

DEMANDES AU PARLEMENT.

Règles *in re* Avis de bills privés.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos " Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer a traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.

JOHN GEORGE BOURINOT,
Greffier des Communes.

Règles additionnelles de la Chambre des Communes concernant les bills privés.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a.*) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b.*) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c.*) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

ORDERS IN COUNCIL.

[3073]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 11th day of October, 1894.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

HIS Excellency, in virtue of the provisions of section 45 of "The North West Irrigation Act," 57-58 Victoria, chapter 30, and by and with the advice of the Queen's Privy Council for Canada, is pleased to prescribe the following forms to be used in proceedings under the said Act which are necessary to carry out the provisions thereof, and the same are hereby prescribed accordingly:—

1. Memorandum of instructions for the guidance of Dominion Land Surveyors employed in surveying and preparing returns of right of way for irrigation ditches and works in connection therewith.

2. Memorandum of instructions regarding the preparation of plans, profiles and specifications, showing works and structures erected by companies or individuals under the provisions of the North West Irrigation Act.

3. A form of license to be issued to persons who apply for permission to do the necessary preliminary work in connection with the location of the ditches which they propose to make.

JOHN J. McGEE,
Clerk of the Privy Council.

No. 1.

MEMORANDUM of instructions regarding the manner of surveying and preparing the returns of surveys of right of way for irrigation ditches, and works in connection therewith.

To prevent confusion or misunderstanding regarding the manner of effecting the field work, and to provide for uniformity in returns of right of way surveys for irrigating ditches, and works in connection therewith, the following instructions are laid down for the official guidance of those performing this class of work:—

1. Right of way surveys for irrigating ditches are of two kinds: preliminary surveys, and final surveys. The first mentioned are made in connection with proposed locations staked out for main ditches and laterals, to enable companies or individuals to file the preliminary plans required by their Acts of incorporation, or the General Irrigation Act, and the latter, or final surveys, are made when the ditch routes, &c., have been finally located and construction begun, to enable final plans and books of reference to be filed, and title to right of way to be conveyed.

2. The preliminary surveys for right of way are to be made in manner provided by clause 3 of these instructions, and the plan showing the same is to be signed by the promoter, manager, or engineer of the company and certified in accordance with form C of these instructions.

The final surveys of right of way must be made by a duly authorized Dominion Land Surveyor, and all plans and books of reference of such surveys must be signed by the surveyor, and contain the certificates given in forms A and B of these instructions.

Preliminary surveys.

3. Preliminary surveys are to be made by retracing the proposed centre line of main and lateral ditches, and determining, by measurement, the position of such lines with reference to the boundaries of sections, quarter-sections or other registered parcels of land intersected.

Where it is proposed to create reservoirs, or to flood lands by erections of dams, the approximate boundaries of the area to be flooded are to be determined.

Should the preliminary location of main ditch contemplate the utilization of the dry beds of old watercourses, or other natural channels, as a portion of the scheme, the position and boundaries of such watercourses, or other channels, are to be determined with sufficient accuracy to enable them to be laid down on a plan.

In all cases where it is proposed to increase the width of the right of way, for the purposes of borrow pits, headworks, buildings, or other causes, the limits of the increased area are to be approximately located and shown on plan.

Final surveys.

4. The final survey of the right of way is to be made after the final location of main and lateral ditches, and prior to or during the work of construction. The survey must be made in such a manner as to determine accurately the boundaries of right of way with reference to boundaries of sections, quarter-sections, and other registered parcels of land. To accomplish this it will be necessary to determine, by measurement, the distance from the intersection of centre line of ditch to all section and quarter-section corners, and corners of other registered parcels of land, and the angles between such boundaries and centre line.

Where it is necessary to do so the boundaries of quarter-sections must be first surveyed in accordance with provisions of the Dominion Lands Act, so that angles and distances from ditch line can be properly determined on these boundaries.

In cases where it is desired to increase the limits of right of way for borrow pits, headworks, buildings, &c., the limits of such increased area are to be determined by actual survey.

Where it is proposed to utilize the dry beds of old watercourses, or other natural channels, for main or lateral ditches, the boundaries of such watercourse, swamp, or other natural channel are to be determined by offsets from main traverse lines. The traverse lines are to be so laid down that no offset therefrom will be of greater length than 300 feet, and the offsets are to be at such distances from each other as to provide that the area of the feature traversed will be determined within a close approximation of the actual area.

Where reservoirs are to be created, or land flooded by erection of dams, the area and limits of such reservoirs, or flooded area, are to be accurately determined by traverse lines and offsets as provided above.

The lengths and radii of all curves on ditch lines are to be determined.

Returns of survey.

5. In the case of preliminary surveys the returns will consist of a plan (on tracing linen, or blue print)

rawn to a scale of 1,000 feet to one inch. This plan ; to contain all the information furnished by the rvey made in accordance with instructions regarding reliminary surveys, and is to be certified in accor-ance with form C of these instructions.

The returns of final surveys for right of way, will onsist of a plan, prepared in all cases on tracing inen, and a book of reference.

The plan will be drawn to a scale of 1,000 feet to ne inch, and must contain all the information suplied by the surveys made in accordance with instrucions regarding final surveys, and in addition must how the width and area of right of way included vithin the boundaries of each quarter-section, or ther registered parcel of land : the plans must be fair pecimens of draughtsmanship, and all figures and eferences must be clear and distinct. The plan is to e certified in accordance with forms A and B of these nstructions.

The book of reference is to be made of the same ize and in accordance with sample accompanying hese instructions. The right of way across each uarter-section, or other registered parcel of land, is o be accurately plotted on form, and all the infornation given on general plan is to be shown on secion forms in book of reference.

The descriptions will be given for each quarter-secion, or other registered parcel of land separately, and nust be in such form, and sufficiently complete, to e used in a conveyance of the land described.

In all cases where traverses are made to determine he limits of old watercourses, or land to be flooded, vhich are to become a portion of the right of way, he sectional form in book of reference will be accomanied by a traverse table for each section separately, iving lengths and bearings of courses and offsets. This table is to be made in accordance with form hown.

The book of reference shall contain the certificates iven in forms A and B of these instructions.

6. It is to be distinctly understood that the Governnent will in no wise be responsible for payments of ccounts for services of the surveyor, or any other xpense incurred in connection with these surveys, or eturns thereof, it being the duty of irrigation companies, or individuals constructing private ditches, to nake these surveys, and file with the department the eturns thereof, at their own cost.

Form A.

I, Dominion Land Surveyor, do solemnly leclare, that this plan (or book of reference, as the ase may be) accurately shows the manner in which the land included therein has been surveyed and subdivided by me, and that the said plan is prepared in accordance with the provisions of " The Territories Real Property Act," chapter fifty-one of the Revised Statutes of Canada.

No. 2.

MEMORANDUM of instructions regarding the preparation of the plans, profiles and specifications required by the North West Irrigation Act.

It is provided by the North West Irrigation Act that companies or individuals applying for a license or authorization under its provisions, must file certain plans, profiles, cross-sections and specifications showing the proposed location of canals and ditches, and giving details of the structures to be erected in connection therewith.

The Act is explicit regarding the scale of, and general information to be furnished by, these plans, profiles, &c., but to prevent misunderstanding and delay, it is thought expedient to issue, in convenient form for reference, these detailed instructions regarding the manner of preparing the different plans, profiles, cross-sections and specifications, required by the Act, and the information which they will be expected to provide.

For convenience of reference the sections or portions of sections are given in the same order, regarding maps, plans, profiles, &c., as in the Act, with the necessary additional instructions added thereto.

Section 12, subsection 4.—"Attached to the memorial shall be a general map or plan on a scale of not less than one inch to half a mile, showing the tract to be served by such water, the location of all rivers, streams and other sources of water supplied therein, and the probable location of the proposed works, also the position and area of all ponds, reservoirs or basins intended to be created for the purpose of storing water or which may have that effect."

This map should be on tracing linen, the general topographical features may be laid down from a late edition of any general map issued by the Department of the Interior.

The proposed location of canals or ditches should be shown by a bold line, and the tract of country to be served, and areas of reservoirs, ponds or basins, should be designated with a wash of different colours, with suitable references.

The map or plan should be dated and signed by the engineer, individual, or some official of the company, as the case may be.

Section 12, subsection 5.—"(5.) There shall also be filed with the memorial plans in detail of all bridges or culverts necessary for road or farm crossings over or under the works of the company, also plans in detail of flumes, headworks, dams or other structures for the diversion or use of water, such plan to be on a scale of not less than one inch equal to four feet."

The plans called for by this subsection should be prepared on tracing linen : they must contain full information in the way of plan, elevation and cross-section showing the details of, and the materials to be used in, the proposed structures, so that all loads, strains, or pressure may be understood and checked.

The plans should be accompanied by a detailed specification regarding the manner of erecting the proposed structures, and both plan and specification should be signed by the Engineer, individual owner or some officer of the company, as the case may be.

Section 12, subsection 6.—"(6.) In the case of all ditches or canals carrying more than twenty-five cubic feet of water per second, in addition to the above information the applicants shall furnish the following maps or plans.

"(*a*.) A longitudinal profile of the ditch, showing the bottom and the proposed surface water line. The horizonal scale of this plan shall be not less than one inch to four hundred feet, and the vertical scale not less than one inch to twenty feet.

"(*b*.) A plan showing cross-sections at a sufficient number of points to fully illustrate all the different forms which the ditch when constructed will take particularly on side hills or elsewhere where any portion of the water is to be conveyed in fill. When water is to be conveyed in cut there shall also be shown on this plan cross-sections at points where the shortest horizontal distance from either side of the bottom of the ditch to the surface of the ground is less than double the bottom width of the ditch at

" that point. The plan shall be drawn on a horizontal " and vertical scale of one inch to twenty feet."

The plans required by these subsections are to be prepared on tracing linen. The profile must give the datum used, and must contain elevations at a sufficient number of points to enable the proposed location to be carefully checked; the proposed grade of canal or ditch must be laid down with a clear and well defined line, and must be shown also in figures along such grade line. The position of all dams, headworks, flumes, bridges, road crossings or other structures must be noted on profile. The elevations given must be from instrumental levels along the proposed location, and a sufficient number of bench marks must be established, and their position and elevation shown on profile, so that levels on portions of location between bench marks may be checked by the inspecting officer if he desires to do so.

The cross-sections required by subsection (*b*) may be plotted on the profile opposite the points where they have been taken; they must be so placed and plotted as to enable a ready determination of the slope and contents to be made. Particular attention is directed to the provisions of this subsection regarding information to be given at cross-section where water is to be conveyed in cut. The kind of material to be moved at each cross-section should be shown. The profile is to be signed by the Engineer who has made the location survey and measured the cross-sections given.

Section 12, Subsection 7.—"(7.) Plans of any dams, " cribs, embankments or other works proposed to " obstruct any river, stream, lake or other source of " water supply, or in order to create a pond, reservoir " or basin of water anywhere, or which may have that " effect, shall be prepared on a longitudinal scale of " not less than one inch to one hundred feet, and for " cross-sections on a scale of not less than one inch to " twenty feet, and shall show what material is intended " to be used and how placed in such works. The " timber, brush, stone, brick or other material used in " such works shall be shown in detail on a plan, the " scale of which shall not be less than one inch to " four feet."

The plans called for by this subsection are to be prepared on tracing linen, and in their preparation particular care is to be taken to give such information by plan, elevation and cross-section as will enable the size, style and location of any proposed structure to be thoroughly understood, and all strains, loads and pressure carefully checked; the kind of material to be used and manner of placing the same must be clearly shown.

It is important that the proposed method of placing the footings of any dam, crib or embankment should be given in detail drawings, and that these drawings should show the high water line on such dam, crib or embankment.

When cribs or piers are to be erected in any river or stream the proposed method of protecting them from ice must be shown.

These plans must be signed by the Engineer who designs the proposed structures, and should be accompanied by a general specification regarding the manner of erecting the same.

Section 12, subsection 8.—"(8.) Cross-section " maps or plans showing the surface of the ground " under such pond, reservoir or basin of water, and " also the surface of the water proposed to be " held therein; the horizontal scale of said maps " or plans shall be not less than one inch to " one hundred feet; and the vertical scale shall be " not less than one inch to twenty feet, and a sufficient " number of lines of levels shall be shown, so that the " contents of the pond, reservoir or basin of water, " may be accurately determined. If the maps or plans " show the levels by contour lines, they shall be on a " scale sufficiently large, so that the contour line, " showing a vertical distance between them not " exceeding one foot, can be accurately delineated. " The maps or plans shall have sufficient information " to show clearly the property likely to be affected by " the creation of such ponds, reservoirs or basins of " water and the manner in which affected, and shall " show in detail such other particulars as the Minister " or Governor in Council sees fit to order, and there " shall also be furnished a plan, on a scale of not less " than one inch to four feet, showing the proposed " manner of controlling and drawing off the water " from any such pond, reservoir, or basin."

The cross-section maps required by this subsection are to be prepared on tracing linen or cross-section paper. If the area of the proposed pond, reservoir or basin is shown by cross-sections, they shall be at sufficient intervals to enable the contents of the pond, reservoir or basin, which must be shown on the plan in cubic or acre feet, to be carefully checked.

If the pond, reservoir or basin is to be shown by contour lines they shall be clearly and distinctly defined and the datum used distinctly set forth.

The information regarding the property likely to be affected by the creation of such pond, reservoir or basin, and the manner in which affected, may be given by contour lines, or by elevations at a sufficient number of points to show the result of the bursting of any dam controlling the waters in such pond, reservoir or basin.

The size, style and material composing all gates, valves, flumes or other contrivance for controlling and drawing off the water from such pond, reservoir or basin must be given on plan, with suitable elevations and cross-sections, and any further detail necessary to enable the suitability and safety of the proposed contrivance to be decided upon.

These plans must be signed by the Engineer who designs the proposed works.

Section 13.—The method of preparing the plans to be signed by a Dominion Land Surveyor required by this section, is clearly set forth in the memorandum of instructions regarding the preparation of returns of right of way surveys in connection with irrigation enterprises, copies of which can be had from the Department or at the office of the Superintendent of Mines at Calgary, Alberta.

Section 22.—The same remarks as in the preceding paragraph apply in this case.

General Remarks.

All maps, plans, profiles, &c., must be fair specimens of draughtsmanship, and all figures and references must be clear and distinct.

Each map or plan should have a concise and legible title, and in all cases the scale or scales, as the case may be, must be clearly set forth.

In cases where maps or plans are referred to in any memorial or petition, they should be distinguished by a letter or number which should be clearly marked thereon.

When it is proposed to erect a bridge for the purpose of carrying a flume across any stream or ravine, or for any other purpose in connection with irrigation enterprises, the plan and elevations of such bridge must be so prepared as to clearly set forth the size and style of the proposed structure, and the form of any truss used in the construction of such bridge shall be such, and will be so shown on such plan and elevation, that the stress in every member will admit of exact calculation.

The plan must be accompanied by a general specification giving sizes and kind of material to be used, the manner of placing the same, and the load and strains for which the proposed structure is designed. Both plan and specification must be signed by the Engineer designing the structure.

I. ROCK IN DEPARTURE BAY.

Captain J. T. Walbran, master of the Dominion steamer "Quadra," reports having found a rock on the north side of the channel between Jesse Island and Horsewell Bluff, Departure Bay, on the Eastern Coast of Vancouver Island, British Columbia.

The rock is an isolated boulder of very small extent, and has two feet water over it at extreme low tide. Alongside the rock on the channel, or south side, is 5¼ fathoms, deepening rapidly to 6, 7 and 13; and on the north side 4½ fathoms. The rock is on the 5-fathom line of Admiralty chart No. 2512, and bears from the extreme of Horsewell Bluff S. by E. (S. 11° W. true), and from the westernmost bluff of Jesse Island N.E. by N. (N. 58° E. true); distant from the nearest shore ¾ cable.

Captain Walbran reports that the spot with 2 fathoms about ¾ cable eastward of the east point of Jesse Island, and the shoal with 3 fathoms about the same distance S.E. of the east point of the island S.W. of Jesse Island, do not exist.

Captain Smith, lately in command of the steamer "Etta White," states that the sounding marked 2 fathoms on Admiralty chart No. 585, in the narrow passage between Garden Bay and Gunboat Bay, Pender Harbour, Malaspina Strait, British Columbia, should be 1½ fathoms, he having found that depth upon sounding the channel at extreme low water. He also reports that the fairway of the channel is very narrow, caused by rocks jutting out on each side, and should only be used with great caution. The tide sets strongly through the passage.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Il plaît à Son Excellence, en vertu des dispositions de l'article 119 de l'Acte du Revenu de l'Intérieur, chapitre 34 des Statuts Revisés, tel que modifié par l'article 2 de l'acte 57-58 Victoria, chapitre 35, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de faire les règlements suivants concernant le remboursement de droits payés sur des spiritueux employés dans la manufacture d'articles qui sont subséquemment exportés :—

RÈGLEMENTS concernant le remboursement de droits payés sur des spiritueux employés dans la manufacture d'articles qui sont subséquemment exportés.—57-58 Victoria, chapitre 35.

1. Les fabricants qui désirent se prévaloir du drawback permis par l'acte précité, mettront à part une certaine partie de leur propriété, approuvée par le percepteur du revenu de l'intérieur, et sous le contrôle du ministère du Revenu de l'Intérieur, et licencié comme entrepôt d'accise, dans laquelle les spiritueux acquittés seront employés dans la manufacture des produits voulus.

2. Les spiritueux seront transportés à ce local en entrepôt, et après que la quantité en aura été constatée, et que les droits imposables sur ces spiritueux auront été payés, ils seront employés en présence d'un officier du revenu de l'intérieur qui gardera un registre de tous spiritueux acquittés ainsi employés, et la proportion de ces spiritueux qui est entrée dans les divers articles manufacturés. Le fabricant enregistrera les diverses transactions dans les livres que le ministère du Revenu de l'Intérieur prescrira.

3. Le produit fini sera emmagasiné dans un compartiment fermé par un cadenas de la couronne, et livré au fabricant par l'officier en charge, pour être expédié à certains points du Canada selon le besoin.

4. Quand un tel produit fini est requis pour être exporté à un pays étranger, il sera livré avec les mêmes précautions que s'il était exporté en entrepôt, des déclarations d'exportation *pro forma* étant faites, mais aucune obligation exécutée.

5. Quand un produit fini est sorti pour l'exportation, le ministère pourra, au besoin, exiger qu'un échantillon de chaque description du produit fini soit expédié à Ottawa, à l'effet de contrôler le percentage de spiritueux acquittés que ce produit contient.

6. Sur production d'un certificat du principal officier des douanes ou du revenu colonial à l'endroit où les articles ont été exportés, ou, si cet endroit est un pays étranger autre que les Etats-Unis, de tout consul ou vice-consul britannique ou étranger résidant là énonçant que les articles ont été réellement débarqués et laissés à quelque endroit (*le nommant*) en dehors du Canada, et sur la déclaration assermentée du fabricant quant à la quantité de spiritueux acquittés employés dans la manufacture des dits articles et y contenus, le ministère du Revenu de l'Intérieur pourra rembourser un montant égal au droit payé sur les spiritueux ainsi employés. Chaque telle réclamation de drawback sera accompagnée du certificat de l'officier en charge quant à la quantité et description des produits finis livrés pour exportation, et le percentage et la quantité totale des spiritueux acquittés qui y est contenue.

7. Chaque fabricant employant des spiritueux acquittés, tel que prévu au présent, paiera au percepteur du revenu de l'intérieur, pendant sa durée de service, comme honoraire de surveillance, la somme de $100 par mois ; cette somme formera partie du Fonds consolidé du revenu.

DEMANDES AU PARLEMENT.

RÈGLES *in re* AVIS DE BILLS PRIVÉS.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos " Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer a traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.

JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

SUBSTANCE DES RÈGLES ET FORMES DE PROCÉDER DU SÉNAT CONCERNANT LES BILLS DE DIVORCE.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

HIS Excellency, in virtue of the provisions of section 45 of "The North West Irrigation Act," 57-58 Victoria, chapter 30, and by and with the advice of the Queen's Privy Council for Canada, is pleased to prescribe the following forms to be used in proceedings under the said Act which are necessary to carry out the provisions thereof, and the same are hereby prescribed accordingly :—

1. Memorandum of instructions for the guidance of Dominion Land Surveyors employed in surveying and preparing returns of right of way for irrigation ditches and works in connection therewith.

2. Memorandum of instructions regarding the preparation of plans, profiles and specifications, showing works and structures erected by companies or individuals under the provisions of the North West Irrigation Act.

3. A form of license to be issued to persons who apply for permission to do the necessary preliminary work in connection with the location of the ditches which they propose to make.

JOHN J. McGEE,
Clerk of the Privy Council.

No. 1.

MEMORANDUM of instructions regarding the manner of surveying and preparing the returns of surveys of right of way for irrigation ditches, and works in connection therewith.

To prevent confusion or misunderstanding regarding the manner of effecting the field work, and to provide for uniformity in returns of right of way surveys for irrigating ditches, and works in connection therewith, the following instructions are laid down for the official guidance of those performing this class of work :—

1. Right of way surveys for irrigating ditches are of two kinds: preliminary surveys, and final surveys. The first mentioned are made in connection with proposed locations staked out for main ditches and laterals, to enable companies or individuals to file the preliminary plans required by their Acts of incorporation, or the General Irrigation Act, and the latter, or final surveys, are made when the ditch routes, &c., have been finally located and construction begun, to enable final plans and books of reference to be filed, and title to right of way to be conveyed.

2. The preliminary surveys for right of way are to be made in manner provided by clause 3 of these instructions, and the plan showing the same is to be signed by the promoter, manager, or engineer of the company and certified in accordance with form C of these instructions.

The final surveys of right of way must be made by a duly authorized Dominion Land Surveyor, and all plans and books of reference of such surveys must be signed by the surveyor, and contain the certificates given in forms A and B of these instructions.

Preliminary surveys.

3. Preliminary surveys are to be made by retracing the proposed centre line of main and lateral ditches, and determining, by measurement, the position of such lines with reference to the boundaries of sections, quarter-sections or other registered parcels of land intersected.

Where it is proposed to create reservoirs, or to flood lands by erections of dams, the approximate boundaries of the area to be flooded are to be determined.

Should the preliminary location of main ditch contemplate the utilization of the dry beds of old watercourses, or other natural channels, as a portion of the scheme, the position and boundaries of such watercourses, or other channels, are to be determined with sufficient accuracy to enable them to be laid down on a plan.

In all cases where it is proposed to increase the width of the right of way, for the purposes of borrow pits, headworks, buildings, or other causes, the limits of the increased area are to be approximately located and shown on plan.

Final surveys.

4. The final survey of the right of way is to be made after the final location of main and lateral ditches, and prior to or during the work of construction. The survey must be made in such a manner as to determine accurately the boundaries of right of way with reference to boundaries of sections, quarter-sections, and other registered parcels of land. To accomplish this it will be necessary to determine, by measurement, the distance from the intersection of centre line of ditch to all section and quarter-section corners, and corners of other registered parcels of land, and the angles between such boundaries and centre line.

Where it is necessary to do so the boundaries of quarter-sections must be first surveyed in accordance with provisions of the Dominion Lands Act, so that angles and distances from ditch line can be properly determined on these boundaries.

In cases where it is desired to increase the limits of right of way for borrow pits, headworks, buildings, &c., the limits of such increased area are to be determined by actual survey.

Where it is proposed to utilize the dry beds of old watercourses, or other natural channels, for main or lateral ditches, the boundaries of such watercourse, swamp, or other natural channel are to be determined by offsets from main traverse lines. The traverse lines are to be so laid down that no offset therefrom will be of greater length than 300 feet, and the offsets are to be at such distances from each other as to provide that the area of the feature traversed will be determined within a close approximation of the actual area.

Where reservoirs are to be created, or land flooded by erection of dams, the area and limits of such reservoirs, or flooded area, are to be accurately determined by traverse lines and offsets as provided above.

The lengths and radii of all curves on ditch lines are to be determined.

Returns of survey.

5. In the case of preliminary surveys the returns will consist of a plan (on tracing linen, or blue print)

drawn to a scale of 1,000 feet to one inch. This plan is to contain all the information furnished by the survey made in accordance with instructions regarding preliminary surveys, and is to be certified in accordance with form C of these instructions.

The returns of final surveys for right of way, will consist of a plan, prepared in all cases on tracing linen, and a book of reference.

The plan will be drawn to a scale of 1,000 feet to one inch, and must contain all the information supplied by the surveys made in accordance with instructions regarding final surveys, and in addition must show the width and area of right of way included within the boundaries of each quarter-section, or other registered parcel of land: the plans must be fair specimens of draughtsmanship, and all figures and references must be clear and distinct. The plan is to be certified in accordance with forms A and B of these instructions.

The book of reference is to be made of the same size and in accordance with sample accompanying these instructions. The right of way across each quarter-section, or other registered parcel of land, is to be accurately plotted on form, and all the information given on general plan is to be shown on section forms in book of reference.

The descriptions will be given for each quarter-section, or other registered parcel of land separately, and must be in such form, and sufficiently complete, to be used in a conveyance of the land described.

In all cases where traverses are made to determine the limits of old watercourses, or land to be flooded, which are to become a portion of the right of way, the sectional form in book of reference will be accompanied by a traverse table for each section separately, giving lengths and bearings of courses and offsets. This table is to be made in accordance with form shown.

The book of reference shall contain the certificates given in forms A and B of these instructions.

6. It is to be distinctly understood that the Government will in no wise be responsible for payments of accounts for services of the surveyor, or any other expense incurred in connection with these surveys, or returns thereof, it being the duty of irrigation companies, or individuals constructing private ditches, to make these surveys, and file with the department the returns thereof, at their own cost.

Form A.

I, Dominion Land Surveyor, do solemnly declare, that this plan (or book of reference, as the case may be) accurately shows the manner in which the land included therein has been surveyed and subdivided by me, and that the said plan is prepared in accordance with the provisions of "The Territories Real Property Act," chapter fifty-one of the Revised Statutes of Canada.

Dated at 18

A.B.
Dominion Land Surveyor.

Form B.

I of the of Dominion Land Surveyor, make oath and say, that I have, in my own proper person, according to law and the instructions of the Surveyor General, faithfully and correctly executed the survey shown by this plan and book of reference, and that the said plan and book of reference are correct and true to the best of my knowledge and belief. So help me God.

Dominion Land Surveyor.
Sworn before me at this day of 18

Form C.

I do hereby certify that this plan accurately shows the manner in which the preliminary surveys, for the proposed right of way, for the Irrigation Company have been made, and that the information therein contained is from actual measurements on the ground.

No. 2.

MEMORANDUM of instructions regarding the preparation of the plans, profiles and specifications required by the North West Irrigation Act.

It is provided by the North West Irrigation Act that companies or individuals applying for a license or authorization under its provisions, must file certain plans, profiles, cross-sections and specifications showing the proposed location of canals and ditches, and giving details of the structures to be erected in connection therewith.

The Act is explicit regarding the scale of, and general information to be furnished by, these plans, profiles, &c., but to prevent misunderstanding and delay, it is thought expedient to issue, in convenient form for reference, these detailed instructions regarding the manner of preparing the different plans, profiles, cross-sections and specifications, required by the Act, and the information which they will be expected to provide.

For convenience of reference the sections or portions of sections are given in the same order, regarding maps, plans, profiles, &c., as in the Act, with the necessary additional instructions added thereto.

Section 12, subsection 4.—"Attached to the memorial shall be a general map or plan on a scale of "not less than one inch to half a mile, showing the "tract to be served by such water, the location of all "rivers, streams and other sources of water supplied "therein, and the probable location of the proposed "works, also the position and area of all ponds, reser- "voirs or basins intended to be created for the pur- "pose of storing water or which may have that "effect."

This map should be on tracing linen, the general topographical features may be laid down from a late edition of any general map issued by the Department of the Interior.

The proposed location of canals or ditches should be shown by a bold line, and the tract of country to be served, and areas of reservoirs, ponds or basins, should be designated with a wash of different colours, with suitable references.

The map or plan should be dated and signed by the engineer, individual, or some official of the company, as the case may be.

Section 12, subsection 5.—"(5.) There shall also be "filed with the memorial plans in detail of all bridges "or culverts necessary for road or farm crossings over "or under the works of the company, also plans in "detail of flumes, headworks, dams or other structures "for the diversion or use of water, such plan to be on "a scale of not less than one inch equal to four feet."

The plans called for by this subsection should be prepared on tracing linen: they must contain full information in the way of plan, elevation and cross-section showing the details of, and the materials to be used in, the proposed structures, so that all loads, strains, or pressure may be understood and checked.

The plans should be accompanied by a detailed specification regarding the manner of erecting the proposed structures, and both plan and specification should be signed by the Engineer, individual owner or some officer of the company, as the case may be.

Section 12, subsection 6.—"(6.) In the case of all "ditches or canals carrying more than twenty-five "cubic feet of water per second, in addition to the "above information the applicants shall furnish the "following maps or plans.

"(*a.*) A longitudinal profile of the ditch, showing "the bottom and the proposed surface water line. "The horizontal scale of this plan shall be not less "than one inch to four hundred feet, and the vertical "scale not less than one inch to twenty feet.

"(*b.*) A plan showing cross-sections at a sufficient "number of points to fully illustrate all the different "forms which the ditch when constructed will take "particularly on side-hills or elsewhere where any "portion of the water is to be conveyed in fill. When "water is to be conveyed in cut there shall also be "shown on this plan cross-sections at points where "the shortest horizontal distance from either side of "the bottom of the ditch to the surface of the ground "is less than double the bottom width of the ditch at "that point. The plan shall be drawn on a horizontal "and vertical scale of one inch to twenty feet."

The plans required by these subsections are to be prepared on tracing linen. The profile must give the datum used, and must contain elevations at a sufficient number of points to enable the proposed location to be carefully checked; the proposed grade of canal or ditch must be laid down with a clear and well defined line, and must be shown also in figures along such grade line. The position of all dams, headworks, flumes, bridges, road crossings or other structures must be noted on profile. The elevations given must be from instrumental levels along the proposed location, and a sufficient number of bench marks must be established, and their position and elevation shown on profile, so that levels on portions of location between bench marks may be checked by the inspecting officer if he desires to do so.

The cross-sections required by subsection (*b*) may be plotted on the profile opposite the points where they have been taken; they must be so placed and plotted as to enable a ready determination of the slope and contents to be made. Particular attention is directed to the provisions of this subsection regarding information to be given at cross-sections where water is to be conveyed in cut. The kind of material to be moved at each cross-section should be shown. The profile is to be signed by the Engineer who has made the location survey and measured the cross-sections given.

Section 12, Subsection 7.—"(7.) Plans of any dams, "cribs, embankments or other works proposed to "obstruct any river, stream, lake or other source of "water supply, or in order to create a pond, reservoir "or basin of water anywhere, or which may have that "effect, shall be prepared on a longitudinal scale of "not less than one inch to one hundred feet, and for "cross-sections on a scale of not less than one inch to "twenty feet, and shall show what material is intended "to be used and how placed in such works. The "timber, brush, stone, brick or other material used in "such works shall be shown in detail on a plan, the "scale of which shall not be less than one inch to "four feet."

The plans called for by this subsection are to be prepared on tracing linen, and in their preparation particular care is to be taken to give such information by plan, elevation and cross-section as will enable the size, style and location of any proposed structure to be thoroughly understood, and all strains, loads and pressure carefully checked; the kind of material to be used and manner of placing the same must be clearly shown.

It is important that the proposed method of placing the footings of any dam, crib or embankment should be given in detail drawings, and that these drawings should show the high water line on such dam, crib or embankment.

When cribs or piers are to be erected in any river or stream the proposed method of protecting them from ice must be shown.

These plans must be signed by the Engineer who designs the proposed structures, and should be accompanied by a general specification regarding the manner of erecting the same.

Section 12, subsection 8.—"(8.) Cross-section "maps or plans showing the surface of the ground "under such pond, reservoir or basin of water, and "also the surface of the water proposed to be "held therein; the horizontal scale of said maps "or plans shall be not less than one inch to "one hundred feet; and the vertical scale shall be "not less than one inch to twenty feet, and a sufficient "number of lines of levels shall be shown, so that the "contents of the pond, reservoir or basin of water, "may be accurately determined. If the maps or plans "show the levels by contour lines, they shall be on a "scale sufficiently large, so that the contour line, "showing a vertical distance between them not "exceeding one foot, can be accurately delineated. "The maps or plans shall have sufficient information "to show clearly the property likely to be affected by "the creation of such ponds, reservoirs or basins of "water and the manner in which affected, and shall "show in detail such other particulars as the Minister "or Governor in Council sees fit to order, and there "shall also be furnished a plan, on a scale of not less "than one inch to four feet, showing the proposed "manner of controlling and drawing off the water "from any such pond, reservoir, or basin."

The cross-section maps required by this subsection are to be prepared on tracing linen or cross-section paper. If the area of the proposed pond, reservoir or basin is shown by cross-sections, they shall be at sufficient intervals to enable the contents of the pond, reservoir or basin, which must be shown on the plan in cubic or acre feet, to be carefully checked.

If the pond, reservoir or basin is to be shown by contour lines they shall be clearly and distinctly defined and the datum used distinctly set forth.

The information regarding the property likely to be affected by the creation of such pond, reservoir or basin, and the manner in which affected, may be given by contour lines, or by elevations at a sufficient number of points to show the result of the bursting of any dam controlling the waters in such pond, reservoir or basin.

The size, style and material composing all gates, valves, flumes or other contrivance for controlling and drawing off the water from such pond, reservoir or basin must be given on plan, with suitable elevations and cross-sections, and any further detail necessary to enable the suitability and safety of the proposed contrivance to be decided upon.

These plans must be signed by the Engineer who designs the proposed works.

Section 13.—The method of preparing the plans to be signed by a Dominion Land Surveyor required by this section, is clearly set forth in the memorandum of instructions regarding the preparation of returns of right of way surveys in connection with irrigation enterprises, copies of which can be had from the Department or at the office of the Superintendent of Mines at Calgary, Alberta.

Section 22.—The same remarks as in the preceding paragraph apply in this case.

General Remarks.

All maps, plans, profiles, &c., must be fair specimens of draughtsmanship, and all figures and references must be clear and distinct.

Each map or plan should have a concise and legible title, and in all cases the scale or scales, as the case may be, must be clearly set forth.

In cases where maps or plans are referred to in any memorial or petition, they should be distinguished by a letter or number which should be clearly marked thereon.

When it is proposed to erect a bridge for the purpose of carrying a flume across any stream or ravine, or for any other purpose in connection with irrigation enterprises, the plan and elevations of such bridge must be so prepared as to clearly set forth the size and style of the proposed structure, and the form of any truss used in the construction of such bridge shall be such, and will be so shown on such plan and elevation, that the stress in every member will admit of exact calculation.

The plan must be accompanied by a general specification giving sizes and kind of material to be used, the manner of placing the same, and the load and strains for which the proposed structure is designed. Both plan and specification must be signed by the Engineer designing the structure.

PRESENT :

HIS Excellency, in virtue of the provisions of sections 119 of the Inland Revenue Act, chapter 34 of the Revised Statutes, as amended by section 2 of the Act 57-58 Victoria, chapter 35, and by and with the advice of the Queen's Privy Council for Canada, is pleased to make the following regulations governing the refund of duty paid on spirits used in the manufacture of goods which are subsequently exported :—

REGULATIONS governing drawback of duty paid on spirits used in the manufacture of goods which are subsequently exported. 57-58 Victoria, chapter 35.

1. Manufacturers desiring to avail themselves of the drawback permitted by the Act above quoted, shall set aside some certain portion of their premises, approved by the Collector of Inland Revenue, and under the control of the Inland Revenue Department, and licensed as an Excise Bonding Warehouse, wherein the duty-paid spirits shall be used in the manufacture of the desired products.

2. The spirits shall be removed to such premises in bond, and after the quantity has been determined and the duty paid thereon, be used in the presence of an officer of Inland Revenue who shall keep a record of all duty-paid spirits so used, and the proportions thereof contained in the different manufactured products made. The manufacturer shall record the various transactions in such books as may be determined by the Department of Inland Revenue.

3. The finished product shall be stored in a compartment secured by Crown lock, and delivered to the manufacturer by the officer in charge, for shipment to points within Canada as required.

4. When any such finished product is required for exportation to a foreign country, it shall be delivered with the same safeguards as if exported in bond, *pro forma* export entries being passed but no bond executed.

5. When so removed for export, the Department may, when deemed necessary, require a sample of each description of finished product to be forwarded to Ottawa, for the purpose of checking the percentage of duty-paid spirits contained therein.

6. Upon the production of a certificate from the principal officer of Customs or colonial revenue at the place to which the goods were exported, or, if such place be a foreign country other than the United States, of any British or Foreign Consul or Vice-Consul, resident there, stating the goods were actually landed and left at some place (*naming it*) out of Canada, and upon the sworn statement of the manufacturer, as to the quantity of duty-paid spirits used in the manufacture thereof and contained therein, the Department of Inland Revenue may refund an amount equal to the duty paid on the spirits so used. Every such claim for refund shall be accompanied by the certificate of the officer in charge, as to the quantity and description of finished products delivered for export, and the percentage and total quantity of duty-paid spirits contained therein.

7. Every manufacturer using duty-paid spirits as herein provided, shall pay to the Collector of Inland Revenue during his term of service, as a supervision fee, the sum of $100 per month, such sum to form a part of the Consolidated Revenue Fund.

JOHN J. McGEE,
Clerk of the Privy Council.

NOTICE TO MARINERS.

No. 45 of 1894.

I. GRASSY POINT BEACON REPLACED.

The beacon on the extremity of the spit at Grassy Point, Baynes Sound, on the east coast of Vancouver Island, British Columbia, first described in Part VI of Notice to Mariners No. 42, of 1889, has been re-erected, and the spar buoy temporarily maintained there, as described in Notice to Mariners No. 28 of 1893, has been removed.

Lat. N. 49° 38' 46"
Long. W. 124° 55' 58"

The beacon consists of a single pile driven in 2½ fathoms water, showing 12 feet at high water. It is painted black with black ball of open lattice-work on the head.

II. BEACONS ON KELP BAR.

The two black spar buoys heretofore marking the crossing over Kelp Bar, Baynes Sound, have been replaced by two beacons, placed in the following positions:—

Inner beacon	Lat. N.	49°	3'	56"
	Long. W.	124°	53'	30"
Outer beacon	Lat. N.	49°	39'	10"
	Long. W.	124°	53'	16"

Each beacon is driven in 3¼ fathoms water, and consists of a single pile surmounted by a slatwork triangle, apex upward, the whole painted black, and rising 9 feet above high water.

The beacons are at the extreme east and west limits of the shoalest ground, and bear from each other N. by E. ½ E. and S. by W. ½ W. 1,600 feet apart.

A course from one beacon to the other, passing both to the southward, leads over the bar in 12 feet water.

The beacons on the Vancouver Island shore, to show the same crossing, consist of two whitewashed planks each fastened diagonally to a tree. When the trees are brought in one so that the planks form a St. Andrew's cross, they lead across the bar in the same depth of water, a little to the southward of the pile beacons.

This notice affects Admiralty charts Nos. 580, 585 and 1917.

GANNET ROCK FOG GUN REPLACED BY COTTON POWDER SIGNALS.

On or about the 10th November next, the fog gun heretofore fired every hour at Gannet Rock light station, off Grand Manan Island, in the Bay of Fundy, will be discontinued, and replaced by a cotton powder cartridge exploded every twenty minutes.

The new signal will be fired from a derrick erected near, and on the seaward face of, the lighthouse. The reports of the explosions should be sharper than those from the gun previously fired.

Until the supply of gunpowder at the station is exhausted the gun may occasionally be fired instead of the cartridges, but when used the intervals will be twenty minutes instead of one hour, as formerly.

MIDDLE GROUND BUOY REPLACED BY DOLPHIN.

The buoy moored on the Middle Ground, in Nanaimo Harbour, on the east coast of Vancouver Island, British Columbia, from which a white light was shown, has been removed, and its place taken by a dolphin or beacon formed of a cluster of three piles painted black. The lantern heretofore attached to the framework of the superstructure of the buoy is now maintained on top of this beacon, and it is expected that on account of the stability of the beacon the light will be more reliable than it was when on the buoy. The character of the light has not been changed.

I. ROCK IN DEPARTURE BAY.

Captain J. T. Walbran, master of the Dominion steamer "Quadra," reports having found a rock on the north side of the channel between Jesse Island and Horsewell Bluff, Departure Bay, on the Eastern Coast of Vancouver Island, British Columbia.

The rock is an isolated boulder of very small extent, and has two feet water over it at extreme low tide. Alongside the rock on the channel, or south side, is $5\frac{1}{4}$ fathoms, deepening rapidly to 6, 7 and 13 ; and on the north side $4\frac{1}{2}$ fathoms. The rock is on the 5-fathom line of Admiralty chart No. 2512, and bears from the extreme of Horsewell Bluff S. by E. (S. 11° W. true), and from the westernmost bluff of Jesse Island N.E. by N. (N. 58° E. true) ; distant from the nearest shore $\frac{3}{4}$ cable.

Captain Walbran reports that the spot with 2 fathoms about $\frac{3}{4}$ cable eastward of the east point of Jesse Island, and the shoal with 3 fathoms about the same distance S.E. of the east point of the island S.W. of Jesse Island, do not exist.

This notice affects Admiralty charts Nos. 579 and 2512.

II. CHANNEL IN PENDER HARBOUR.

Captain Smith, lately in command of the steamer "Etta White," states that the sounding marked 2 fathoms on Admiralty chart No. 585, in the narrow passage between Garden Bay and Gunboat Bay, Pender Harbour, Malaspina Strait, British Columbia, should be $1\frac{1}{2}$ fathoms, he having found that depth upon sounding the channel at extreme low water. He also reports that the fairway of the channel is very narrow, caused by rocks jutting out on each side, and should only be used with great caution. The tide sets strongly through the passage.

This notice affects Admiralty chart No. 585 and the British Columbia Pilot of 1888, page 177, line 20.

NOTE.—Keeping the rear light open a little to the westward of the front light will carry in the best water, on a course about S. by W. $\frac{1}{4}$ W.

The front light will be shown at a height of 26 feet above the mean level of the lake from a white post on the middle of Pilot Island.

ARRÊTÉS EN CONSEIL.

[3073]

HOTEL DU GOUVERNEMENT À OTTAWA.

Jeudi, le 11e jour d'octobre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

IL plaît à Son Excellence, en vertu des dispositions de l'article 45 de "l'Acte d'irrigation du Nord-Ouest," 57-58 Victoria, chapitre 30, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de prescrire les formules suivantes qui seront employées dans les procédures nécessaires pour mettre à exécution les dispositions du dit acte, et les dites formules sont prescrites en conséquence :—

1. Mémoire d'instructions pour guider les arpenteurs fédéraux employés à arpenter et dresser des relevés de droits de passage pour fossés d'irrigation et les travaux s'y rattachant.

2. Mémoire d'instructions concernant la préparation de plans, profils et devis, indiquant les travaux et structures faits par des compagnies ou des particuliers en vertu des dispositions de l'Acte d'irrigation du Nord-Ouest.

3. Une formule de licence à délivrer aux personnes qui demandent la permission de faire l'ouvrage préliminaire nécessaire en rapport avec la localisation des fossés qu'elles se proposent de faire.

JOHN J. McGEE,
Greffier du Conseil privé.

N° 1.

MÉMOIRE d'instructions concernant la manière d'arpenter et de préparer les relevés d'arpentages de droit de passage pour fossés d'irrigation, et les travaux s'y rattachant.

Dans le but de prévenir la confusion ou les malentendus au sujet du mode de faire l'ouvrage sur le terrain et de pourvoir à l'uniformité dans les relevés d'arpentages de droit de passage pour fossés d'irrigation, et les travaux s'y rattachant, les instructions ci-dessous sont données pour la gouverne officielle de ceux qui exécutent ce genre d'ouvrage.

1. Les arpentages de droit de passage pour fossés d'irrigation sont de deux sortes : les études préliminaires et les arpentages définitifs. Les premières ont lieu dans le cas de localisations projetées jalonnées pour grands fossés et embranchements, afin de mettre les compagnies ou les particuliers en état de déposer les plans préliminaires requis par leurs actes constitutifs, ou l'Acte général d'irrigation, et les derniers, ou arpentages définitifs, sont faits lorsque les routes de fossés, etc., ont été finalement localisées et que les travaux sont commencés, afin que des plans définitifs et des livres de renvoi soient déposés, et qu'un titre au droit de passage soit transmis.

2. Les études préliminaires pour droit de passage doivent être faites de la manière prescrite par la clause 3 des présentes instructions, et le plan qui les montrent doit être signé par l'auteur, le gérant ou l'ingénieur de la compagnie, et certifié conformément à la formule C des présentes instructions.

Les arpentages définitifs pour droit de passage doivent être faits par un arpenteur fédéral dûment autorisé, et tous plans et livres de renvoi de ses arpentages doivent être signés par l'arpenteur, et contenir les certificats donnés aux formules A et B des présentes instructions.

Etudes préliminaires.

3. Les études préliminaires doivent être faites en retraçant la ligne centrale projetée des grands fossés et des fossés latéraux, et en fixant par le mesurage la position de ces lignes relativement aux bornes de sections, quarts de sections ou autres parcelles de terrain enregistrées qui sont coupées.

Là où l'on se propose de créer des réservoirs, ou d'inonder des terrains au moyen de digues, l'étendue approximative du terrain à inonder doit être déterminée.

Si, dans la localisation préliminaire d'un grand fossé, l'on a en vue l'utilisation des lits secs d'anciens cours d'eau ou autres canaux naturels, comme partie du réseau, la position et les bornes de ces cours d'eau ou autres canaux, devront être décrits avec assez d'exactitude pour qu'ils puissent être rapportés sur un plan.

Dans tous les cas où il est proposé d'augmenter la largeur du droit de passage, pour des fins de fosses d'emprunt, endiguements, constructions ou autres causes, les limites de cette augmentation devront être approximativement localisée et indiquée sur le plan.

Arpentages définitifs.

4. L'arpentage définitif du droit de passage doit être fait après la localisation finale du principal fossé et de ses embranchements, et avant ou durant les travaux de construction. L'arpentage doit être fait de manière à fixer exactement les bornes du droit de passage relativement aux bornes des sections, quarts de sections, et autres parcelles de terrain enregistrées. A cette fin il sera nécessaire de déterminer par mesurage la distance qu'il y a depuis le croisement de la ligne centrale du fossé jusqu'à tous les coins de sections, de quarts de section, ou autres parcelles de terrain enregistrées, et les angles entre ces bornes et la ligne centrale.

Quand la chose est nécessaire les bornes de quarts de section doivent d'abord être déterminées conformément aux dispositions de l'Acte des terres fédérales, de façon que les angles et les distances depuis la ligne du fossé puissent être convenablement déterminées d'après ces bornes.

Si l'on désire augmenter les limites du droit de passage pour des fosses d'emprunt, endiguements, constructions, etc., les limites de cette largeur supplémentaire seront fixées par arpentage régulier.

Si l'intention est d'utiliser les lits secs d'anciens cours d'eau, ou autres canaux naturels pour le principal fossé ou les embranchements, les bornes des cours d'eau, marais ou autre canal naturel seront déterminées au moyen d'ordonnées partant des lignes principales. Les lignes principales doivent être tracées de façon qu'aucune ordonnée ne soit plus longue que 300 pieds, et les ordonnées seront espacées de façon que l'étendue du terrain mesuré soit déterminée aussi approximativement que possible.

Si des réservoirs doivent être créés, ou du terrain inondé par la construction de digues, l'étendue et les limites de ces réservoirs, ou terrain inondé, seront exactement déterminées par des coordonnées, tel que prescrit plus haut.

Les longueurs et rayons de toutes courbes sur les lignes de fossé doivent être déterminés.

Relevés d'arpentages.

5. Dans le cas d'études préliminaires, les relevés consisteront d'un plan (sur de la toile à calquer, ou photographié) dressé à un échelle de 1,000 pieds au pouce. Ce plan doit contenir tous les renseignements fournis par l'arpentage fait en conformité des instructions concernant les études préliminaires, et doit être certifié conformément à la formule C des présentes instructions.

Les relevés d'arpentages définitifs pour droit de passage, se composeront d'un plan, dressé dans tous les cas sur de la toile à calquer, et d'un livre de renvoi.

Le plan sera dressé à une échelle de 1,000 pieds au pouce, et devra contenir tous les renseignement fournis par les arpentages faits d'après les instructions concernant les arpentages définitifs, et devra de plus indiquer la largeur et l'étendue du droit de passage compris dans les limites de chaque quart de section, ou autre parcelle de terrain enregistrée ; les plans seront de bons échantillons de dessin, et tous les chiffres et renvois devront être clairs et distincts. Le plan sera certifié conformément aux formules A et B des présentes instructions.

Le livre de renvoi sera fait de la même grandeur et forme que le modèle qui accompagne les présentes instructions. Le droit de passage en travers de chaque quart de section, ou autre parcelle de terrain enregistrée, doit être exactement rapporté sur la forme, et tous les renseignements donnés sur le plan général doivent être indiqués sur les formes sectionnelle dans le livre de renvoi.

Les descriptions seront données séparément pour chaque quart de section ou autre parcelle de terrain enregistrée, et doivent être de telle forme, et assez complètes, pour servir dans un transfert du terrain décrit.

Dans tous les cas où il est fait des relèvements pour déterminer les limites d'anciens cours d'eau, ou de terrain à inonder, qui doivent faire partie du droit de passage, la forme sectionnelle dans le livre de renvoi doit être accompagnée d'un journal de latitude pour chaque section séparément, donnant les longueurs et les directions des cours et des ordonnées. Ce journal doit être conforme à la formule indiquée.

Le livre de renvoi doit contenir les certificats donnés aux formules A et B des présentes instructions.

6. Qu'il soit bien attendu que le gouvernement ne sera aucunement responsable du paiement de comptes pour services de l'arpenteur, ou toute autre dépense encourue relativement à ces arpentages, ou rapports d'arpentages ; c'est le devoir des compagnies d'irrigation, ou des particuliers construisant les fossés privés, de faire ces arpentages, et d'en déposer les rapports au département, à leurs frais.

Formule A.

Je arpenteur fédéral, déclare solennellement que ce plan (ou livre de renvoi, selon le cas) indique exactement la manière dont le terrain y inclus a été arpenté et subdivisé par moi, et que le dit plan est préparé en conformité des dispositions de "l'Acte de la propriété foncière dans les territoires," chapitre cinquante et un des Statuts Revisés du Canada.

Daté à 18 .

A. B.
Arpenteur fédéral.

Formule B.

Je de de arpenteur fédéral, jure et dit que j'ai, en personne, suivant la loi et les instructions de l'Arpenteur général, fidèlement et exactement exécuté l'arpentage indiqué par ces plan et livre de renvoi, et que les dits plan et livre de renvoi sont exacts et vrais au meilleur de ma connaissance et croyance.

A.B.,
Arpenteur fédéral.

Assermenté devant moi à ce jour de 18 .

Formule C.

Je certifie par le présent que ce plan indique exactement la manière dont ont été faites les études préliminaires pour le droit de passage projeté, pour la Compagnie d'irrigation de et que les renseignements y contenus sont le résultat de mesurages actuels sur le terrain.

Daté à 18 .

MÉMOIRE d'instructions concernant la préparation des plans, profils et devis exigés par l'Acte d'irrigation du Nord-Ouest.

L'Acte d'irrigation du Nord-Ouest décrète que les compagnies ou particuliers demandant un permis ou une autorisation en vertu de ses dispositions, devront déposer certains plans, profils, coupes transversales et devis indiquant la localisation projetée des canaux ou fossés, et donnant des détails des travaux à faire.

L'acte est explicite au sujet de l'échelle de ces plans, profils, etc., et des renseignements qu'ils doivent fournir, mais afin de prévenir les malentendus et les délais, on a jugé utile de publier sous une forme facile à consulter, les présentes instructions concernant la manière de préparer les différents plans, profils, coupes transversales et devis qu'exige l'acte, et les renseignements qu'ils sont destinés à fournir.

Pour plus de facilité les articles ou parties d'articles sont donnés dans le même ordre quant aux cartes, plans, profils, etc., que dans l'acte, avec les instructions additionnelles nécessaires.

Art. 12, paragraphe 4.—" Il sera annexé au mémoire " une carte ou un plan général, à une échelle de pas " moins d'un pouce au demi-mille, indiquant le terri- " toire à desservir par cette eau, la situation de toutes " les rivières, cours d'eau et autres sources d'approvi- " sionnement qui s'y trouveront et la localisation pro- " bable des travaux projetés, ainsi que la situation et " l'étendue de tous étangs, réservoirs ou bassins que l'on " se proposera de créer, afin d'amasser l'eau ou qui " pourront avoir cet effet."

Cette carte devrait être faite sur de la toile à calquer, les aspects topographiques généraux pourront être reproduits d'une récente édition de toute carte générale publiée par le Ministère de l'Intérieur.

La localisation projetée des canaux ou fossés devrait être indiquée par une grosse ligne, et la région du pays à desservir et les étendues des réservoirs, étangs ou bassins devraient être désignées par une teinte de différentes couleurs, avec renvois convenables.

La carte ou plan devrait être daté et signé par l'ingénieur, particulier, ou quelque employé de la compagnie, selon le cas.

Article 12, paragraphe 5.—" (5.) Il sera aussi déposé, " en même temps que le mémoire, des plans détaillés de " tous les ponts ou ponceaux nécessaires pour les tra- " verses de chemins ou de fermes, ou sous les travaux " de la compagnie, ainsi que des plans détaillés de tous " déversoirs, barrages, digues et autres constructions " pour le détournement ou l'usage des eaux, ces plans " devant être à une échelle de pas moins d'un pouce " par quatre pieds."

Les plans dont il est fait mention au susdit paragraphe devraient être faits sur de la toile à calquer : ils doivent être complets sous le rapport du plan, élévation et coupe transversale, donnant les détails des travaux projetés, et les matériaux qui doivent y entrer, de façon que toutes les pesanteurs, tensions ou pression puissent être compris et contrôlés.

Les plans devraient être accompagnés d'un devis détaillé concernant la manière d'ériger les travaux projetés, et le plan et la spécification devraient être signés par l'ingénieur, particulier ou quelque officier de la compagnie, selon le cas.

Article 12, paragraphe 6.—" (6.) Dans le cas de tous " fossés ou canaux charriant plus de vingt-cinq pieds " cubes d'eau par seconde, les requérants devront " fournir en sus des renseignements précédents, les " cartes ou plans qui suivent :—

" (*a.*) Une coupe longitudinale du fossé, montrant " le fond et la ligne d'eau de surface projetée. L'échelle " horizontale de ce plan n'aura pas moins d'un pouce " par quatre cents pieds, et l'échelle verticale pas moins " d'un pouce par vingt pieds.

" (*b.*) Un plan donnant des coupes transversales à " un nombre de points suffisant pour faire voir toutes " les différentes formes que prendra le fossé lorsqu'il " sera fait, particulièrement sur les flancs de coteaux " ou ailleurs que remplira quelque partie de l'eau à " transporter. Lorsque l'eau devra être conduite par " des tranchées, le plan montrera aussi des coupes trans- " versales aux endroits où la plus courte distance hori- " zontale d'un côté ou de l'autre du fond du fossé à la " surface du terrain sera moindre que le double de la " largeur du fond du fossé en cet endroit. Le plan " sera fait à une échelle horizontale et verticale d'un " pouce par vingt pieds."

Les plans mentionnés aux paragraphes précédents doivent être dressés sur de la toile à calquer. Le profil doit faire voir la donnée employée, et doit contenir des élévations à un assez grand nombre de points pour permettre de contrôler soigneusement la localisation proposée ; la pente projetée du canal ou fossé doit être indiquée par une ligne nette et bien définie, et aussi par des chiffres le long de cette ligne de pente. La position de tous barrages, digues, déversoirs, ponts, traverses de chemin ou autres travaux doit être notée sur le profil. Les élévations données doivent provenir de niveaux à l'instrument pris le long de la localisation projetée, et un nombre suffisant de repères doivent être établis, et leur position et élévation indiquées sur le profil, de façon que les niveaux sur des parties de la localisation entre les repères puissent être contrôlés par l'officier inspecteur, s'il désire le faire.

Les coupes transversales exigées par le paragraphe (*b*) peuvent être rapportées sur le profil vis-à-vis les points où elles ont été prises ; elles doivent être placées et rapportées de façon à permettre une prompte détermination du talus et de son contenu. On attire surtout l'attention aux dispositions de ce paragraphe au sujet du renseignement à donner aux coupes transversales où l'eau doit être conduite par une tranchée. La nature des matières à enlever à chaque coupe transversale doit être indiquée. Le profil doit être signé par l'ingénieur qui a fait l'étude de localisation et mesuré les coupes transversales.

Article 12, paragraphe 7.—“ (7.) Des plans de toutes digues, caissons ou coffrages, levées ou autres ouvrages projetés pour obstruer quelque rivière, cours d'eau, lac ou autre source d'alimentation, ou pour créer un étang, réservoir ou bassin quelque part, ou qui pourront avoir cet effet, seront préparés à une échelle longitudinale de pas moins d'un pouce par cent pieds, et pour les coupes transversales à une échelle de pas moins d'un pouce par vingt pieds, et indiqueront quels matériaux l'on se proposera d'employer et comment ils le seront dans ces travaux. Le bois, les fascines, la pierre, la brique et les autres matériaux employés dans ces travaux seront indiqués en détail sur un plan dressé à une échelle de pas moins d'un pouce par quatre pieds.”

Les plans exigés par ce paragraphe doivent être préparés sur de la toile à calquer, et en les préparant l'on doit prendre grand soin de donner tel renseignement au moyen de plan, élévation et coupe transversale qui fera bien comprendre la dimension, le genre et la situation de tous travaux projetés, et permettra de soigneusement contrôler toutes les tensions, pesanteurs et pression, l'espèce de matériaux à employer et la manière de les placer doivent être clairement définies.

Il importe que la méthode proposée de placer les bases de tout barrage, caisson ou levée doit être donnée dans des dessins détaillés, et que ces dessins indiquent la ligne des hautes eaux sur ce barrage, caisson ou levée.

Lorsque des caissons ou piles doivent être construits dans une rivière ou cours d'eau, la méthode que l'on se propose d'adopter pour les protéger doit être indiquée.

Ces plans doivent être signés par l'ingénieur qui trace les travaux projetés, et doivent être accompagnés d'un devis général concernant la manière de les ériger.

Section 12, paragraphe 8.—“ (8.) Des cartes ou plans de coupes transversales montrant la surface du terrain sous les étangs, réservoirs ou bassins, ainsi que la ligne de surface des eaux qu'ils seront destinés à contenir ; l'échelle horizontale de ces cartes ou plans ne sera pas de moins d'un pouce par cent pieds, et l'échelle verticale de pas moins d'un pouce par vingt pieds ; et il sera indiqué un nombre suffisant de lignes de niveau pour permettre de calculer exactement le contenu de chaque étang, réservoir ou bassin. Si les cartes ou plans indiquent les niveaux par des lignes de contour, elles seront dressées à une échelle suffisamment grande pour que les lignes de contour, montrant une distance verticale entre elles de pas plus d'un pied, puissent être exactement tracées. Les cartes ou plans contiendront des renseignements suffisants pour faire voir distinctement quelles propriétés seront affectées par la création de ces étangs, réservoirs ou bassins, et la manière dont elles seront affectées, et montreront en détail toutes autres particularités que le ministre ou le Gouverneur en conseil prescrira ; et il sera aussi fourni un plan, dressé à une échelle de pas moins d'un pouce par quatre pieds, indiquant comment on se proposera de contrôler et tirer l'eau de ces étangs, réservoirs ou bassins.”

Les cartes de coupes transversales que mentionne ce paragraphe doivent être préparées sur de la toile à calquer ou du papier à coupe transversale. Si l'étendue de l'étang, réservoir ou bassin projeté est indiquée par des coupes transversales, elles seront assez espacées pour permettre de contrôler soigneusement le contenu de l'étang, réservoir ou bassin, lequel doit être indiqué sur le plan en pieds cubes ou pieds-acre.

Si l'étang, réservoir ou bassin est indiqué par des lignes de contour, ces lignes seront clairement et distinctement définies, et la donnée employée distinctement énoncée.

Les renseignements au sujet de la propriété qui sera probablement affectée par la création de cet étang, réservoir ou bassin, et la manière dont elle sera affectée, pourront être donnés par des lignes de contour, ou par des élévations à un nombre suffisant de points pour indiquer quel serait le résultat si la digue qui retient l'eau dans cet étang, réservoir ou bassin, se rompait.

La dimension, le genre et les matériaux qui composent les portes, empellements, déversoirs ou autres inventions pour contrôler et tirer l'eau de cet étang, réservoir ou bassin doivent être donnés sur ce plan, avec élévations et coupes transversales convenables, et tout autre détail propre à faire voir l'adaptabilité et la sûreté de l'invention projetée.

Ces plans devront être signés par l'ingénieur qui trace les travaux projetés.

Article 13.—La manière de dresser les plans que doit signer un arpenteur fédéral, tel que voulu par cet article, est clairement expliquée dans le mémoire d'instructions concernant la préparation des relevés d'arpentage de droit de passage relatif à des entreprises d'irrigation dont on peut obtenir copie en s'adressant au ministère ou au bureau du Surintendant des mines à Calgary, Alberta.

Article 22. Les remarques qui précèdent s'appliquent ici.

Observations générales.

Tous les plans, cartes, profils, etc., doivent être d'assez bons échantillons de dessin, et tous les chiffres et renvois doivent être clairs et distincts.

Chaque carte ou plan devrait avoir un titre concis et lisible, et dans tous les cas l'échelle ou les échelles, selon le cas, doivent être clairement données.

Dans les cas où, dans un mémoire ou pétition, il est renvoyé à des cartes ou plans, ces derniers devraient être distinctement marqués d'une lettre ou d'un numéro.

Là où il est projeté de construire un pont dans le but de porter une conduite d'eau de l'autre côté d'un cours d'eau ou d'un ravin, ou dans tout autre but en rapport avec des entreprises d'irrigation, le plan et les élévations de ce pont seront dressés de façon à bien faire voir la dimension et le genre des travaux projetés et la forme de toute ferme employée dans la construction de ce pont sera telle et sera indiquée de telle manière sur ce plan et cette élévation, que la tension sur chaque pièce puisse être calculée exactement.

Le plan doit être accompagné d'un devis général donnant les dimensions et l'espèce de matériaux qui doivent être employés, la manière de les placer, et la pesanteur et la tension pour lesquelles la structure est destinée.

Mercredi, le 17e jour d'octobre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Il plaît à Son Excellence, en vertu des dispositions de l'article 119 de l'Acte du Revenu de l'Intérieur, chapitre 34 des Statuts Revisés, tel que modifié par l'article 2 de l'acte 57-58 Victoria, chapitre 35, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de faire les règlements suivants concernant le remboursement de droits payés sur des spiritueux employés dans la manufacture d'articles qui sont subséquemment exportés :—

RÈGLEMENTS concernant le remboursement de droits payés sur des spiritueux employés dans la manufacture d'articles qui sont subséquemment exportés.—57-58 Victoria, chapitre 35.

1. Les fabricants qui désirent se prévaloir du drawback permis par l'acte précité, mettront à part une certaine partie de leur propriété, approuvée par le percepteur du revenu de l'intérieur, et sous le contrôle du ministère du Revenu de l'Intérieur, et licencié comme entrepôt d'accise, dans laquelle les spiritueux acquittés seront employés dans la manufacture des produits voulus.

2. Les spiritueux seront transportés à ce local en entrepôt, et après que la quantité en aura été constatée, et que les droits imposables sur ces spiritueux auront été payés, ils seront employés en présence d'un officier du revenu de l'intérieur qui gardera un registre de tous spiritueux acquittés ainsi employés, et la proportion de ces spiritueux qui est entrée dans les divers articles manufacturés. Le fabricant enregistrera les diverses transactions dans les livres que le ministère du Revenu de l'Intérieur prescrira.

3. Le produit fini sera emmagasiné dans un compartiment fermé par un cadenas de la couronne, et livré au fabricant par l'officier en charge, pour être expédié à certains points du Canada selon le besoin.

4. Quand un tel produit fini est requis pour être exporté à un pays étranger, il sera livré avec les mêmes précautions que s'il était exporté en entrepôt, des déclarations d'exportation *pro forma* étant faites, mais aucune obligation exécutée.

5. Quand un produit fini est sorti pour l'exportation, le ministère pourra, au besoin, exiger qu'un échantillon de chaque description du produit fini soit expédié à Ottawa, à l'effet de contrôler le percentage de spiritueux acquittés que ce produit contient.

6. Sur production d'un certificat du principal officier des douanes ou du revenu colonial à l'endroit où les articles ont été exportés, ou, si cet endroit est un pays étranger autre que les Etats-Unis, de tout consul ou vice-consul britannique ou étranger résidant là énonçant que les articles ont été réellement débarqués et laissés à quelque endroit (*le nommant*) en dehors du Canada, et sur la déclaration assermentée du fabricant quant à la quantité de spiritueux acquittés employés dans la manufacture des dits articles et y contenus, le ministère du Revenu de l'Intérieur pourra rembourser un montant égal au droit payé sur les spiritueux ainsi employés. Chaque telle réclamation de drawback sera accompagnée du certificat de l'officier en charge quant à la quantité et description des produits finis livrés pour exportation, et le percentage et la quantité totale des spiritueux acquittés qui y est contenue.

7. Chaque fabricant employant des spiritueux acquittés, tel que prévu au présent, paiera au percepteur du revenu de l'intérieur, pendant sa durée de service, comme honoraire de surveillance, la somme de $100 par mois ; cette somme formera partie du Fonds consolidé du revenu.

CONSIDÉRANT qu'il est représenté que le taux de quaiage exigé sur le bois scié sur les quais contrôlés par le Ministère de la Marine et des Pêcheries, savoir 10 centins par mille pieds, mesure de planche, est excessif lorsqu'il s'agit de madriers exportés,—

Il plaît à Son Excellence, par et avec l'avis du Conseil privé de la Reine pour le Canada, d'ordonner, et il est par le présent ordonné que le taux de quaiage prélevé sur les madriers placés sur les quais, jetées et brise-lames de l'Etat pour être exportés du Canada, sera de 10 centins par 1000 pieds mesure de madriers.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos " Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

1. Memorandum of instructions for the guidance of Dominion Land Surveyors employed in surveying and preparing returns of right of way for irrigation ditches and works in connection therewith.

2. Memorandum of instructions regarding the preparation of plans, profiles and specifications, showing works and structures erected by companies or individuals under the provisions of the North West Irrigation Act.

3. A form of license to be issued to persons who apply for permission to do the necessary preliminary work in connection with the location of the ditches which they propose to make.

JOHN J. McGEE,
Clerk of the Privy Council.

No. 1.

MEMORANDUM of instructions regarding the manner of surveying and preparing the returns of surveys of right of way for irrigation ditches, and works in connection therewith.

To prevent confusion or misunderstanding regarding the manner of effecting the field work, and to provide for uniformity in returns of right of way surveys for irrigating ditches, and works in connection therewith, the following instructions are laid down for the official guidance of those performing this class of work :—

1. Right of way surveys for irrigating ditches are of two kinds : preliminary surveys, and final surveys. The first mentioned are made in connection with proposed locations staked out for main ditches and laterals, to enable companies or individuals to file the preliminary plans required by their Acts of incorporation, or the General Irrigation Act, and the latter or final surveys, are made when the ditch routes, &c. have been finally located and construction begun, to enable final plans and books of reference to be filed, and title to right of way to be conveyed.

2. The preliminary surveys for right of way are to be made in manner provided by clause 3 of these instructions, and the plan showing the same is to be signed by the promoter, manager, or engineer of the company and certified in accordance with form C of these instructions.

The final surveys of right of way must be made by a duly authorized Dominion Land Surveyor, and all plans and books of reference of such surveys must be signed by the surveyor, and contain the certificates given in forms A and B of these instructions.

Preliminary surveys.

3. Preliminary surveys are to be made by retracing the proposed centre line of main and lateral ditches, and determining, by measurement, the position of such lines with reference to the boundaries of sections, quarter-sections or other registered parcels of land intersected.

Where it is proposed to create reservoirs, or to flood lands by erections of dams, the approximate boundaries of the area to be flooded are to be determined.

Should the preliminary location of main ditch contemplate the utilization of the dry beds of old watercourses, or other natural channels, as a portion of the scheme, the position and boundaries of such watercourses, or other channels, are to be determined with sufficient accuracy to enable them to be laid down on a plan.

In all cases where it is proposed to increase the width of the right of way, for the purposes of borrow pits, headworks, buildings, or other causes, the limits of the increased area are to be approximately located and shown on plan.

Final surveys.

4. The final survey of the right of way is to be made after the final location of main and lateral ditches, and prior to or during the work of construction. The survey must be made in such a manner as to determine accurately the boundaries of right of way with reference to boundaries of sections, quarter-sections, and other registered parcels of land. To accomplish this it will be necessary to determine, by measurement, the distance from the intersection of centre line of ditch to all section and quarter-section corners, and corners of other registered parcels of land, and the angles between such boundaries and centre line.

Where it is necessary to do so the boundaries of quarter-sections must be first surveyed in accordance with provisions of the Dominion Lands Act, so that angles and distances from ditch line can be properly determined on these boundaries.

In cases where it is desired to increase the limits of right of way for borrow pits, headworks, buildings, &c., the limits of such increased area are to be determined by actual survey.

Where it is proposed to utilize the dry beds of old watercourses, or other natural channels, for main or lateral ditches, the boundaries of such watercourse, swamp, or other natural channel are to be determined by offsets from main traverse lines. The traverse lines are to be so laid down that no offset therefrom will be of greater length than 300 feet, and the offsets are to be at such distances from each other as to provide that the area of the feature traversed will be determined within a close approximation of the actual area.

Where reservoirs are to be created, or land flooded by erection of dams, the area and limits of such reservoirs, or flooded area, are to be accurately determined by traverse lines and offsets as provided above.

The lengths and radii of all curves on ditch lines are to be determined.

Returns of survey.

5. In the case of preliminary surveys the returns will consist of a plan (on tracing linen, or blue print)

rawn to a scale of 1,000 feet to one inch. This plan s to contain all the information furnished by the urvey made in accordance with instructions regarding reliminary surveys, and is to be certified in accordance with form C of these instructions.

The returns of final surveys for right of way, will onsist of a plan, prepared in all cases on tracing inen, and a book of reference.

The plan will be drawn to a scale of 1,000 feet to ne inch, and must contain all the information supplied by the surveys made in accordance with instructions regarding final surveys, and in addition must how the width and area of right of way included vithin the boundaries of each quarter-section, or ther registered parcel of land: the plans must be fair pecimens of draughtsmanship, and all figures and eferences must be clear and distinct. The plan is to e certified in accordance with forms A and B of these nstructions.

The book of reference is to be made of the same ize and in accordance with sample accompanying hese instructions. The right of way across each uarter-section, or other registered parcel of land, is o be accurately plotted on form, and all the information given on general plan is to be shown on section forms in book of reference.

The descriptions will be given for each quarter-section, or other registered parcel of land separately, and nust be in such form, and sufficiently complete, to e used in a conveyance of the land described.

In all cases where traverses are made to determine he limits of old watercourses, or land to be flooded, which are to become a portion of the right of way, he sectional form in book of reference will be accompanied by a traverse table for each section separately, iving lengths and bearings of courses and offsets. This table is to be made in accordance with form shown.

The book of reference shall contain the certificates given in forms A and B of these instructions.

6. It is to be distinctly understood that the Government will in no wise be responsible for payments of accounts for services of the surveyor, or any other expense incurred in connection with these surveys, or returns thereof, it being the duty of irrigation companies, or individuals constructing private ditches, to make these surveys, and file with the department the returns thereof, at their own cost.

Form A.

I, Dominion Land Surveyor, do solemnly declare, that this plan (or book of reference, as the case may be) accurately shows the manner in which the land included therein has been surveyed and subdivided by me, and that the said plan is prepared in accordance with the provisions of "The Territories Real Property Act," chapter fifty-one of the Revised Statutes of Canada.

Dominion Land Surveyor.

Form B.

I of the of Dominion Land Surveyor, make oath and say, that I have, in my own proper person, according to law and the instructions of the Surveyor General, faithfully and correctly executed the survey shown by this plan and book of reference, and that the said plan and book of reference are correct and true to the best of my knowledge and belief. No. 2.

MEMORANDUM of instructions regarding the preparation of the plans, profiles and specifications required by the North West Irrigation Act.

It is provided by the North West Irrigation Act that companies or individuals applying for a license or authorization under its provisions, must file certain plans, profiles, cross-sections and specifications showing the proposed location of canals and ditches, and giving details of the structures to be erected in connection therewith.

The Act is explicit regarding the scale of, and general information to be furnished by, these plans, profiles, &c., but to prevent misunderstanding and delay, it is thought expedient to issue, in convenient form for reference, these detailed instructions regarding the manner of preparing the different plans, profiles, cross-sections and specifications, required by the Act, and the information which they will be expected to provide.

For convenience of reference the sections or portions of sections are given in the same order, regarding maps, plans, profiles, &c., as in the Act, with the necessary additional instructions added thereto.

Section 12, subsection 4.—"Attached to the memorial shall be a general map or plan on a scale of "not less than one inch to half a mile, showing the "tract to be served by such water, the location of all "rivers, streams and other sources of water supplied "therein, and the probable location of the proposed "works, also the position and area of all ponds, reser-"voirs or basins intended to be created for the pur-"pose of storing water or which may have that "effect."

This map should be on tracing linen, the general topographical features may be laid down from a late edition of any general map issued by the Department of the Interior.

The proposed location of canals or ditches should be shown by a bold line, and the tract of country to be served, and areas of reservoirs, ponds or basins, should be designated with a wash of different colours, with suitable references.

The map or plan should be dated and signed by the engineer, individual, or some official of the company, as the case may be.

Section 12, subsection 5.—"(5.) There shall also be "filed with the memorial plans in detail of all bridges "or culverts necessary for road or farm crossings over "or under the works of the company, also plans in "detail of flumes, headworks, dams or other structures "for the diversion or use of water, such plan to be on "a scale of not less than one inch equal to four feet."

The plans called for by this subsection should be prepared on tracing linen: they must contain full information in the way of plan, elevation and cross-section showing the details of, and the materials to be used in, the proposed structures, so that all loads, strains, or pressure may be understood and checked.

The plans should be accompanied by a detailed specification regarding the manner of erecting the proposed structures, and both plan and specification should be signed by the Engineer, individual owner or some officer of the company, as the case may be.

Section 12, subsection 6.—"(6.) In the case of all "ditches or canals carrying more than twenty-five "cubic feet of water per second, in addition to the "above information the applicants shall furnish the "following maps or plans.

"(*a*.) A longitudinal profile of the ditch, showing "the bottom and the proposed surface water line. "The horizonal scale of this plan shall be not less "than one inch to four hundred feet, and the vertical "scale not less than one inch to twenty feet.

"(*b*.) A plan showing cross-sections at a sufficient "number of points to fully illustrate all the different "forms which the ditch when constructed will take "particularly on side-hills or elsewhere where any "portion of the water is to be conveyed in fill. When "water is to be conveyed in cut there shall also be "shown on this plan cross-sections at points where "the shortest horizontal distance from either side of "the bottom of the ditch to the surface of the ground "is less than double the bottom width of the ditch at "that point. The plan shall be drawn on a horizontal "and vertical scale of one inch to twenty feet."

The plans required by these subsections are to be prepared on tracing linen. The profile must give the datum used, and must contain elevations at a sufficient number of points to enable the proposed location to be carefully checked; the proposed grade of canal or ditch must be laid down with a clear and well defined line, and must be shown also in figures along such grade line. The position of all dams, headworks, flumes, bridges, road crossings or other structures must be noted on profile. The elevations given must be from instrumental levels along the proposed location, and a sufficient number of bench marks must be established, and their position and elevation shown on profile, so that levels on portions of location between bench marks may be checked by the inspecting officer if he desires to do so.

The cross-sections required by subsection (*b*) may be plotted on the profile opposite the points where they have been taken; they must be so placed and plotted as to enable a ready determination of the slope and contents to be made. Particular attention is directed to the provisions of this subsection regarding information to be given at cross-sections where water is to be conveyed in cut. The kind of material to be moved at each cross-section should be shown. The profile is to be signed by the Engineer who has made the location survey and measured the cross-sections given.

Section 12, Subsection 7.—"(7.) Plans of any dams, "cribs, embankments or other works proposed to "obstruct any river, stream, lake or other source of "water supply, or in order to create a pond, reservoir "or basin of water anywhere, or which may have that "effect, shall be prepared on a longitudinal scale of "not less than one inch to one hundred feet, and for "cross-sections on a scale of not less than one inch to "twenty feet, and shall show what material is intended "to be used and how placed in such works. The "timber, brush, stone, brick or other material used in "such works shall be shown in detail on a plan, the "scale of which shall not be less than one inch to "four feet."

The plans called for by this subsection are to be prepared on tracing linen, and in their preparation particular care is to be taken to give such information by plan, elevation and cross-section as will enable the size, style and location of any proposed structure to be thoroughly understood, and all strains, loads and pressure carefully checked; the kind of material to be used and manner of placing the same must be clearly shown.

It is important that the proposed method of placing the footings of any dam, crib or embankment should be given in detail drawings, and that these drawings should show the high water line on such dam, crib or embankment.

When cribs or piers are to be erected in any river or stream the proposed method of protecting them from ice must be shown.

These plans must be signed by the Engineer who designs the proposed structures, and should be accompanied by a general specification regarding the manner of erecting the same.

Section 12, subsection 8.—"(8.) Cross-section "maps or plans showing the surface of the ground "under such pond, reservoir or basin of water, and "also the surface of the water proposed to be "held therein; the horizontal scale of said maps "or plans shall be not less than one inch to "one hundred feet; and the vertical scale shall be "not less than one inch to twenty feet, and a sufficient "number of lines of levels shall be shown, so that the "contents of the pond, reservoir or basin of water, "may be accurately determined. If the maps or plans "show the levels by contour lines, they shall be on a "scale sufficiently large, so that the contour line, "showing a vertical distance between them not "exceeding one foot, can be accurately delineated. "The maps or plans shall have sufficient information "to show clearly the property likely to be affected by "the creation of such ponds, reservoirs or basins of "water and the manner in which affected, and shall "show in detail such other particulars as the Minister "or Governor in Council sees fit to order, and there "shall also be furnished a plan, on a scale of not less "than one inch to four feet, showing the proposed "manner of controlling and drawing off the water "from any such pond, reservoir, or basin."

The cross-section maps required by this subsection are to be prepared on tracing linen or cross-section paper. If the area of the proposed pond, reservoir or basin is shown by cross-sections, they shall be at sufficient intervals to enable the contents of the pond, reservoir or basin, which must be shown on the plan in cubic or acre feet, to be carefully checked.

If the pond, reservoir or basin is to be shown by contour lines they shall be clearly and distinctly defined and the datum used distinctly set forth.

The information regarding the property likely to be affected by the creation of such pond, reservoir or basin, and the manner in which affected, may be given by contour lines, or by elevations at a sufficient number of points to show the result of the bursting of any dam controlling the waters in such pond, reservoir or basin.

The size, style and material composing all gates, valves, flumes or other contrivance for controlling and drawing off the water from such pond, reservoir or basin must be given on plan, with suitable elevations and cross-sections, and any further detail necessary to enable the suitability and safety of the proposed contrivance to be decided upon.

These plans must be signed by the Engineer who designs the proposed works.

Section 13.—The method of preparing the plans to be signed by a Dominion Land Surveyor required by this section, is clearly set forth in the memorandum of instructions regarding the preparation of returns of right of way surveys in connection with irrigation enterprises, copies of which can be had from the Department or at the office of the Superintendent of Mines at Calgary, Alberta.

Section 22.—The same remarks as in the preceding paragraph apply in this case.

General Remarks.

All maps, plans, profiles, &c., must be fair specimens of draughtsmanship, and all figures and references must be clear and distinct.

Each map or plan should have a concise and legible title, and in all cases the scale or scales, as the case may be, must be clearly set forth.

In cases where maps or plans are referred to in any memorial or petition, they should be distinguished by a letter or number which should be clearly marked thereon.

When it is proposed to erect a bridge for the purpose of carrying a flume across any stream or ravine, or for any other purpose in connection with irrigation enterprises, the plan and elevations of such bridge must be so prepared as to clearly set forth the size and style of the proposed structure, and the form of any truss used in the construction of such bridge shall be such, and will be so shown on such plan and elevation, that the stress in every member will admit of exact calculation.

The plan must be accompanied by a general specification giving sizes and kind of material to be used, the manner of placing the same, and the load and strains for which the proposed structure is designed. Both plan and specification must be signed by the Engineer designing the structure.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Memorandum, dated 16th October, 1894, from the Minister of Marine and Fisheries, submitting for approval the annexed By-law concerning the abandonment, burning and breaking of vessels in the Harbour of Quebec, passed on the 27th of July, 1894, at a meeting of the Quebec Harbour Commissioners, under the powers conferred upon them in the Acts 12 Victoria, chapter 114, section 6, and 40 Victoria, chapter 51, section 5.

No. 43 of 1894.

MIDDLE GROUND BUOY REPLACED BY DOLPHIN.

The buoy moored on the Middle Ground, in Nanaimo Harbour, on the east coast of Vancouver Island, British Columbia, from which a white light was shown, has been removed, and its place taken by a dolphin or beacon formed of a cluster of three piles painted black. The lantern heretofore attached to the framework of the superstructure of the buoy is now maintained on top of this beacon, and it is expected that on account of the stability of the beacon the light will be more reliable than it was when on the buoy. The character of the light has not been changed.

This notice affects Admiralty charts Nos. 573, 579, 1917 and 2512, and Canadian List of Lights and Fog Signals No. 1189.

I. GRASSY POINT BEACON REPLACED.

The beacon on the extremity of the spit at Grassy Point, Baynes Sound, on the east coast of Vancouver Island, British Columbia, first described in Part VI of Notice to Mariners No. 42, of 1889, has been re-erected, and the spar buoy temporarily maintained there, as described in Notice to Mariners No. 28 of 1893, has been removed.

Lat. N. 49° 38’ 46”
Long. W. 124° 55’ 58”

The beacon consists of a single pile driven in $2\frac{1}{2}$ fathoms water, showing 12 feet at high water. It is painted black with black ball of open lattice-work on the head.

II. BEACONS ON KELP BAR.

The two black spar buoys heretofore marking the crossing over Kelp Bar, Baynes Sound, have been replaced by two beacons, placed in the following positions :—

Inner beacon Lat. N. 49° 3 ’ 56”
Long. W. 124° 53’ 30”
Outer beacon Lat. N. 49° 39’ 10”
Long. W. 124° 53’ 16”

Each beacon is driven in $3\frac{1}{4}$ fathoms water, and consists of a single pile surmounted by a slatwork triangle, apex upward, the whole painted black, and rising 9 feet above high water.

The beacons are at the extreme east and west limits of the shoalest ground, and bear from each other N. by E. $\frac{1}{2}$ E. and S. by W. $\frac{1}{2}$ W. 1,600 feet apart.

A course from one beacon to the other, passing both to the southward, leads over the bar in 12 feet water.

The beacons on the Vancouver Island shore, to show the same crossing, consist of two whitewashed planks each fastened diagonally to a tree. When the trees are brought in one so that the planks form a St. Andrew's cross, they lead across the bar in the same depth of water, a little to the southward of the pile beacons.

This notice affects Admiralty charts Nos. 580, 585 and 1917.

GANNET ROCK FOG GUN REPLACED BY COTTON POWDER SIGNALS.

On or about the 10th November next, the fog gun heretofore fired every hour at Gannet Rock light station, off Grand Manan Island, in the Bay of Fundy, will be discontinued, and replaced by a cotton powder cartridge exploded every twenty minutes.

The new signal will be fired from a derrick erected near, and on the seaward face of, the lighthouse. The reports of the explosions should be sharper than those from the gun previously fired.

Until the supply of gunpowder at the station is exhausted the gun may occasionally be fired instead of the cartridges, but when used the intervals will be twenty minutes instead of one hour, as formerly.

This notice affects Admiralty charts Nos. 352, 1651, 2492, 2539 and 2670, and Canadian List of Lights and Fog Signals No. 3.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Que les règlements concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur, recommandés par le Ministre de l'Intérieur dans son Memo. du 30 juillet 1894, soient approuvés.

JOHN J. McGEE,
Greffier du Conseil privé.

Règlements concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur.

1. Pour des arpentages autres que des arpentages de subdivision de townships, le Ministre de l'Intérieur pourra employer des arpenteurs à un salaire quotidien ou mensuel.

2. Lorsque les services d'un arpenteur sont d'une nature temporaire, et pour pas plus d'un an, son salaire sera payé au taux de cinq piastres par jour pour les arpentages ordinaires, mais pour les arpentages de contour, de bloc et pour services exigeant des aptitudes spéciales, le taux sera de six piastres par jour.

3. Un arpenteur sera payé pour chaque jour de service sur le terrain, y compris les dimanches, et le nombre de jours sera calculé à compter du jour qu'il laisse son domicile jusqu'au jour de son retour, les deux jours inclusivement.

4. Pour le travail de bureau, à préparer ses rapports, un arpenteur comptera le temps réel occupé à leur préparation, mais ne devra pas dépasser le nombre de jours déclaré suffisant par l'Arpenteur général.

5. Lorsqu'un arpenteur a été employé continûment pendant un an et que l'emploi est continué pour une plus longue période son salaire après la première année n'excèdera pas cent vingt-cinq piastres par mois pour les arpentages ordinaires et cent cinquante piastres par mois pour arpentages spéciaux. Un arpenteur ainsi employé assistera au bureau dans le Ministère à Ottawa lorsqu'il n'est pas engagé au dehors, et sera soumis aux règles et règlements concernant les employés temporaires. Pour les fins de la présente clause, l'emploi au taux de dix mois dans une même année, ou au même taux pour de plus courtes périodes, sera réputé être continu.

6. L'arrêté en conseil du 20 octobre 1892, concernant les congés aux employés temporaires, s'appliquera aux arpenteurs employés au mois sous la clause qui précède.

7. Si un arpenteur employé à un salaire quotidien ou mensuel, ou un membre de son parti, subit un accident pendant qu'il est engagé à l'arpentage, le Ministre pourra payer à l'arpenteur ou individu blessé, tant qu'il sera incapable de travailler, telle partie de son salaire et de ses frais de médecin qu'il jugera à propos.

8. Il sera alloué à l'arpenteur le coût réel de l'engagement des hommes, pourvu que leur nombre et le taux de paie n'excèdent pas ce qui est permis par ses instructions.

9. L'arpenteur aura droit pour lui-même et chaque homme de son parti, à une allocation pour rations de cinquante centins par jour tant qu'il sera sur le terrain.

10. Pour son transport et celui de son parti, et diverses dépenses (non compris les repas, pension, frais d'hôtellerie, effets de campement et papeterie), il sera alloué à l'arpenteur les dépenses réelles appuyées de pièces justificatives, pourvu qu'elles n'excèdent pas ce qui est permis par ses instructions.

11. En sus de l'allocation pour rations il sera alloué à l'arpenteur pour repas, pension et frais d'hôtellerie pour lui-même et son parti lorsque sur le terrain une somme de vingt-huit centins par jour pour lui-même et quatre centins par jour pour chaque autre membre du parti.

12. Les effets de campement appartiendront à l'arpenteur et seront fournis par lui. Pour leur usage, il lui sera alloué, tant qu'il sera sur le terrain vingt-deux centins par jour pour lui-même, et six centins par jour pour chaque autre membre du parti.

13. Un arpenteur employé à la journée recevra une allocation de dix piastres pour papeterie et une piastre par jour lorsqu'il sera au bureau à préparer ses rapports.

14. L'arpenteur possèdera et fournira les instruments requis dans la pratique ordinaire de sa profession. Ceux qui sont continûment employés seront pourvus de chaînes et leurs instruments seront réparés au besoin par le Ministère, pourvu qu'il appartiendra à l'Arpenteur général de décider si un instrument peut être réparé, ou si l'arpenteur doit en acheter un neuf.

15. Dans les cas spéciaux, alors que le Ministre croit que quelques-uns des règlements concernant les rations, pension, effets de campement et la papeterie ne peuvent s'appliquer, il pourra allouer à l'arpenteur ses dépenses réelles appuyées de pièces justificatives.

16. L'arpenteur recevra avec ses instructions, telle avance sur son compte d'arpentage que le Ministre prescrira. D'autres avances subséquentes seront faites sur reçu d'un état certifié par l'arpenteur en la forme G. indiquant en détail les paiements faits à même les premières avances, et ceux qui seront faits à même la somme demandée.

17. La moitié du salaire des arpenteurs à la journée sera retenue jusqu'à ce que leurs comptes soient définitivement clos.

18. Les comptes d'arpenteurs seront faits en double, et se composeront :—

1. Compte de service personnel, formule A.
2. Bordereau de paie, formule B.
3. Transport, formule C.
4. Divers, formule D.
5. Comment il a été disposé de l'équipement, formule E.
6. Bilan, formule F.

Un journal de l'emploi de chaque jour sur le terrain sera fourni.

19. L'arpenteur fera la déclaration statutaire suivante au sujet de ses comptes :—

Je, A.B., arpenteur fédéral, déclare solennellement que le présent compte est exact, et je fais cette déclaration solennelle, la croyant consciencieusement vraie, et sachant qu'elle a la même force et le même effet que si elle était faite sous serment, sous l'empire de l'Acte de la preuve en Canada, 1893.

Déclaré par-devant moi à
ce jour de A.D. 189 .

20. Le taux de contrat à payer pour la subdivision d'un township sera calculé suivant la nature du pays tel que démontré par l'arpentage des contours de township, et sur les bases suivantes :—

Première classe.—Tout terrain non classifié comme de deuxième ou troisième classe—Sept piastres par mille.

Deuxième classe.—Peupliers et autres bois tendres, alternant avec la prairie—Onze piastres par mille.

Troisième classe.—Bois continus, épaisses broussailles, vents chablis, épais saules—Dix-huit piastres par mille.

21. Lorsque l'arpentage des contours de townships ne sont pas suffisamment complets pour calculer le taux avant de passer le contrat pour la subdivision, l'arpenteur sera payé aux taux de la première, deux-

-ième et troisième classes, dans la proportion de chaque classe portée sur son carnet d'opérations.

22. Les lignes de relèvements seront payées aux taux uniformes de neuf piastres par mille à l'est du quatrième méridien, et de dix piastres par mille à l'ouest de ce méridien.

23. Les taux mentionnés aux clauses 21, 22 et 23 seront réduits de dix pour cent pour les contrats d'arpentage de subdivision se montant à cinq mille piastres ou à peu près.

24. En sus des susdits taux un entrepreneur d'arpentages recevra :—

Pour chaque déclaration statutaire d'occupation par un colon	une piastre.
Pour renouveler une borne à un angle où le contrat de l'arpentage stipule qu'il doit finir..............................	cinquante-centins.
Pour renouveler une borne à tout autre angle	une piastre.
Pour construire une butte à un angle dans le bois..................................	cinquante-centins.

25. Pour retracer une ligne effacée, au besoin, y placer des bornes, et fournir des plans et des notes d'opérations, l'entrepreneur recevra deux tiers du taux fixé pour la subdivision de townships, pourvu qu'il appartiendra à l'Arpenteur général de décider si le travail est nécessaire ou non.

26. Sur réception de son contrat d'arpentage de subdivision dûment exécuté, l'entrepreneur recevra une avance n'excédant pas mille piastres.

27. D'autres paiements jusqu'à soixante-quinze pour cent de la valeur de l'ouvrage fait pourront être faits à l'entrepreneur sur réception des comptes de progrès sur la formule H, accompagnés d'esquisses de l'arpentage.

28. Les présents règlements s'appliqueront aux arpentages faits pendant l'année 1893.

29. Nulle clause modificative d'un arrêté en conseil subséquent n'aura l'effet de canceller, abroger ou modifier aucune partie des présents règlements à moins qu'elle ne soit spécialement mentionnée.

E. DEVILLE,
Arpenteur général.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

CONSIDÉRANT qu'il est représenté que le taux de quaiage exigé sur le bois scié sur les quais controlés par le Ministère de la Marine et des Pêcheries, savoir 10 centins par mille pieds, mesure de planche, est excessif lorsqu'il s'agit de madriers exportés,—

Il plaît à Son Excellence, par et avec l'avis du Conseil privé de la Reine pour le Canada, d'ordonner, et il est par le présent ordonné que le taux de quaiage prélevé sur les madriers placés sur les quais, jetées et brise-lames de l'Etat pour être exportés du Canada, sera de 10 centins par 1000 pieds mesure de madriers.

HOTEL DU GOUVERNEMENT À OTTAWA.

Jeudi, le 11e jour d'octobre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

IL plaît à Son Excellence, en vertu des dispositions de l'article 45 de "l'Acte d'irrigation du Nord-Ouest," 57-58 Victoria, chapitre 30, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de prescrire les formules suivantes qui seront employées dans les procédures nécessaires pour mettre à exécution les dispositions du dit acte, et les dites formules sont prescrites en conséquence :—

1. Mémoire d'instructions pour guider les arpenteurs fédéraux employés à arpenter et dresser des relevés de droits de passage pour fossés d'irrigation et les travaux s'y rattachant.

2. Mémoire d'instructions concernant la préparation de plans, profils et devis, indiquant les travaux et structures faits par des compagnies ou des particuliers en vertu des dispositions de l'Acte d'irrigation du Nord-Ouest.

3. Une formule de licence à délivrer aux personnes qui demandent la permission de faire l'ouvrage préliminaire nécessaire en rapport avec la localisation des fossés qu'elles se proposent de faire.

JOHN J. McGEE,
Greffier du Conseil privé.

N° 1.

MÉMOIRE d'instructions concernant la manière d'arpenter et de préparer les relevés d'arpentages de droit de passage pour fossés d'irrigation, et les travaux s'y rattachant.

Dans le but de prévenir la confusion ou les malentendus au sujet du mode de faire l'ouvrage sur le terrain et de pourvoir à l'uniformité dans les relevés d'arpentages de droit de passage pour fossés d'irrigation, et les travaux s'y rattachant, les instructions ci-dessous sont données pour la gouverne officielle de ceux qui exécutent ce genre d'ouvrage.

1. Les arpentages de droit de passage pour fossés d'irrigation sont de deux sortes : les études préliminaires et les arpentages définitifs. Les premières ont lieu dans le cas de localisations projetées jalonnées pour grands fossés et embranchements, afin de mettre les compagnies ou les particuliers en état de déposer les plans préliminaires requis par leurs actes constitutifs, ou l'Acte général d'irrigation, et les derniers, ou arpentages définitifs, sont faits lorsque les routes de fossés, etc., ont été finalement localisées et que les travaux sont commencés, afin que des plans définitifs et des livres de renvoi soient déposés, et qu'un titre au droit de passage soit transmis.

2. Les études préliminaires pour droit de passage doivent être faites de la manière prescrite par la clause 3 des présentes instructions, et le plan qui les montrent doit être signé par l'auteur, le gérant ou l'ingénieur de la compagnie, et certifié conformément à la formule C des présentes instructions.

Les arpentages définitifs pour droit de passage doivent être faits par un arpenteur fédéral dûment autorisé, et tous plans et livres de renvoi de ses arpentages doivent être signés par l'arpenteur, et contenir les certificats donnés aux formules A et B des présentes instructions.

Etudes préliminaires.

3. Les études préliminaires doivent être faites en retraçant la ligne centrale projetée des grands fossés et des fossés latéraux, et en fixant par le mesurage la position de ces lignes relativement aux bornes de sections, quarts de sections ou autres parcelles de terrain enregistrées qui sont coupées.

Là où l'on se propose de créer des réservoirs, ou d'inonder des terrains au moyen de digues, l'étendue approximative du terrain à inonder doit être déterminée.

Si, dans la localisation préliminaire d'un grand fossé, l'on a en vue l'utilisation des lits secs d'anciens cours d'eau ou autres canaux naturels, comme partie du réseau, la position et les bornes de ces cours d'eau ou autres canaux, devront être décrits avec assez d'exactitude pour qu'ils puissent être rapportés sur un plan.

Dans tous les cas où il est proposé d'augmenter la largeur du droit de passage, pour des fins de fosses d'emprunt, endiguements, constructions ou autres causes, les limites de cette augmentation devront être approximativement localisée et indiquée sur le plan.

Arpentages définitifs.

4. L'arpentage définitif du droit de passage doit être fait après la localisation finale du principal fossé et de ses embranchements, et avant ou durant les travaux de construction. L'arpentage doit être fait de manière à fixer exactement les bornes du droit de passage rela-

tivement aux bornes des sections, quarts de sections, et autres parcelles de terrain enregistrées. A cette fin il sera nécessaire de déterminer par mesurage la distance qu'il y a depuis le croisement de la ligne centrale du fossé jusqu'à tous les coins de sections, de quarts de section, ou autres parcelles de terrain enregistrées, et les angles entre ces bornes et la ligne centrale.

Quand la chose est nécessaire les bornes de quarts de section doivent d'abord être déterminées conformément aux dispositions de l'Acte des terres fédérales, de façon que les angles et les distances depuis la ligne du fossé puissent être convenablement déterminées d'après ces bornes.

Si l'on désire augmenter les limites du droit de passage pour des fosses d'emprunt, endiguements, constructions, etc., les limites de cette largeur supplémentaire seront fixées par arpentage régulier.

Si l'intention est d'utiliser les lits secs d'anciens cours d'eau, ou autres canaux naturels pour le principal fossé ou les embranchements, les bornes des cours d'eau, marais ou autre canal naturel seront déterminées au moyen d'ordonnées partant des lignes principales. Les lignes principales doivent être tracées de façon qu'aucune ordonnée ne soit plus longue que 300 pieds, et les ordonnées seront espacées de façon que l'étendue du terrain mesuré soit déterminée aussi approximativement que possible.

Si des réservoirs doivent être créés, ou du terrain inondé par la construction de digues, l'étendue et les limites de ces réservoirs, ou terrain inondé, seront exactement déterminées par des coordonnées, tel que prescrit plus haut.

Les longueurs et rayons de toutes courbes sur les lignes de fossé doivent être déterminés.

Relevés d'arpentages.

5. Dans le cas d'études préliminaires, les relevés consisteront d'un plan (sur de la toile à calquer, ou photographié) dressé à un échelle de 1,000 pieds au pouce. Ce plan doit contenir tous les renseignements fournis par l'arpentage fait en conformité des instructions concernant les études préliminaires, et doit être certifié conformément à la formule C des présentes instructions.

Les relevés d'arpentages définitifs pour droit de passage, se composeront d'un plan, dressé dans tous les cas sur de la toile à calquer, et d'un livre de renvoi.

Le plan sera dressé à une échelle de 1,000 pieds au pouce, et devra contenir tous les renseignement fournis par les arpentages faits d'après les instructions concernant les arpentages définitifs, et devra de plus indiquer la largeur et l'étendue du droit de passage compris dans les limites de chaque quart de section, ou autre parcelle de terrain enregistrée ; les plans seront de bons échantillons de dessin, et tous les chiffres et renvois devront être clairs et distincts. Le plan sera certifié conformément aux formules A et B des présentes instructions.

Le livre de renvoi sera fait de la même grandeur et forme que le modèle qui accompagne les présentes instructions. Le droit de passage en travers de chaque quart de section, ou autre parcelle de terrain enregistrée, doit être exactement rapporté sur la forme, et tous les renseignements donnés sur le plan général doivent être indiqués sur les formes sectionnelle dans le livre de renvoi.

Les descriptions seront données séparément pour chaque quart de section ou autre parcelle de terrain enregistrée, et doivent être de telle forme, et assez complètes, pour servir dans un transfert du terrain décrit.

Dans tous les cas où il est fait des relèvements pour déterminer les limites d'anciens cours d'eau, ou de terrain à inonder, qui doivent faire partie du droit de passage, la forme sectionnelle dans le livre de renvoi doit être accompagnée d'un journal de latitude pour chaque section séparément, donnant les longueurs et les directions des cours et des ordonnées. Ce journal doit être conforme à la formule indiquée.

Le livre de renvoi doit contenir les certificats donnés aux formules A et B des présentes instructions.

6. Qu'il soit bien attendu que le gouvernement ne sera aucunement responsable du paiement de comptes pour services de l'arpenteur, ou toute autre dépense encourue relativement à ces arpentages, ou rapports d'arpentages ; c'est le devoir des compagnies d'irrigation, ou des particuliers construisant les fossés privés, de faire ces arpentages, et d'en déposer les rapports au département, à leurs frais.

Formule A.

Je arpenteur fédéral, déclare solennellement que ce plan (ou livre de renvoi, selon le cas) indique exactement la manière dont le terrain y inclus a été arpenté et subdivisé par moi, et que le dit plan est préparé en conformité des dispositions de "l'Acte de la propriété foncière dans les territoires," chapitre cinquante et un des Statuts Revisés du Canada.

Daté à 18 .

A. B.
Arpenteur fédéral.

Formule B.

Je de de arpenteur fédéral, jure et dit que j'ai, en personne, suivant la loi et les instructions de l'Arpenteur général, fidèlement et exactement exécuté l'arpentage indiqué par ces plan et livre de renvoi, et que les dits plan et livre de renvoi sont exacts et vrais au meilleur de ma connaissance et croyance.

A.B.,
Arpenteur fédéral.

Assermenté devant moi à ce jour de 18 .

Formule C.

Je certifie par le présent que ce plan indique exactement la manière dont ont été faites les études préliminaires pour le droit de passage projeté, pour la Compagnie d'irrigation de et que les renseignements y contenus sont le résultat de mesurages actuels sur le terrain.

Daté à 18 .

N° 2.

MÉMOIRE d'instructions concernant la préparation des plans, profils et devis exigés par l'Acte d'irrigation du Nord-Ouest.

L'Acte d'irrigation du Nord-Ouest décrète que les compagnies ou particuliers demandant un permis ou une autorisation en vertu de ses dispositions, devront déposer certains plans, profils, coupes transversales et devis indiquant la localisation projetée des canaux ou fossés, et donnant des détails des travaux à faire.

L'acte est explicite au sujet de l'échelle de ces plans, profils, etc., et des renseignements qu'ils doivent fournir, mais afin de prévenir les malentendus et les délais, on a jugé utile de publier sous une forme facile à consulter, les présentes instructions concernant la manière de préparer les différents plans, profils, coupes transversales et devis qu'exige l'acte, et les renseignements qu'ils sont destinés à fournir.

Pour plus de facilité les articles ou parties d'articles sont donnés dans le même ordre quant aux cartes, plans, profils, etc., que dans l'acte, avec les instructions additionnelles nécessaires.

Art. 12, paragraphe 4.—"Il sera annexé au mémoire " une carte un un plan général, à une échelle de pas " moins d'un pouce au demi-mille, indiquant le terri- " toire à desservir par cette eau, la situation de toutes " les rivières, cours d'eau et autres sources d'approvi- " sionnement qui s'y trouveront et la localisation pro- " bable des travaux projetés, ainsi que la situation et " l'étendue de tous étangs, réservoirs ou bassins que l'on " se proposera de créer, afin d'amasser l'eau ou qui " pourront avoir cet effet."

Cette carte devrait être faite sur de la toile à calquer, les aspects topographiques généraux pourront être reproduits d'une récente édition de toute carte générale publiée par le Ministère de l'Intérieur.

La localisation projetée des canaux ou fossés devrait être indiquée par une grosse ligne, et la région du pays à desservir et les étendues des réservoirs, étangs ou bassins devraient être désignées par une teinte de différentes couleurs, avec renvois convenables.

La carte ou plan devrait être daté et signé par l'ingénieur, particulier, ou quelque employé de la compagnie, selon le cas.

Article 12, paragraphe 5.—“(5.) Il sera aussi déposé, en même temps que le mémoire, des plans détaillés de tous les ponts ou ponceaux nécessaires pour les traverses de chemins ou de fermes, ou sous les travaux de la compagnie, ainsi que des plans détaillés de tous déversoirs, barrages, digues et autres constructions pour le détournement ou l'usage des eaux, ces plans devant être à une échelle de pas moins d'un pouce par quatre pieds.”

Les plans dont il est fait mention au susdit paragraphe devraient être faits sur de la toile à calquer : ils doivent être complets sous le rapport du plan, élévation et coupe transversale, donnant les détails des travaux projetés, et les matériaux qui doivent y entrer, de façon que toutes les pesanteurs, tensions ou pression puissent être compris et contrôlés.

Les plans devraient être accompagnés d'un devis détaillé concernant la manière d'ériger les travaux projetés, et le plan et la spécification devraient être signés par l'ingénieur, particulier ou quelque officier de la compagnie, selon le cas.

Article 12, paragraphe 6.—“(6.) Dans le cas de tous fossés ou canaux charriant plus de vingt-cinq pieds cubes d'eau par seconde, les requérants devront fournir en sus des renseignements précédents, les cartes ou plans qui suivent :—

“(*a.*) Une coupe longitudinale du fossé, montrant le fond et la ligne d'eau de surface projetée. L'échelle horizontale de ce plan n'aura pas moins d'un pouce par quatre cents pieds, et l'échelle verticale pas moins d'un pouce par vingt pieds.

“(*b.*) Un plan donnant des coupes transversales à un nombre de points suffisant pour faire voir toutes les différentes formes que prendra le fossé lorsqu'il sera fait, particulièrement sur les flancs de coteaux ou ailleurs que remplira quelque partie de l'eau à transporter. Lorsque l'eau devra être conduite par des tranchées, le plan montrera aussi des coupes transversales aux endroits où la plus courte distance horizontale d'un côté ou de l'autre du fond du fossé à la surface du terrain sera moindre que le double de la largeur du fond du fossé en cet endroit. Le plan sera fait à une échelle horizontale et verticale d'un pouce par vingt pieds.”

Les plans mentionnés aux paragraphes précédents doivent être dressés sur de la toile à calquer. Le profil doit faire voir la donnée employée, et doit contenir des élévations à un assez grand nombre de points pour permettre de contrôler soigneusement la localisation proposée ; la pente projetée du canal ou fossé doit être indiquée par une ligne nette et bien définie, et aussi par des chiffres le long de cette ligne de pente. La position de tous barrages, digues, déversoirs, ponts, traverses de chemin ou autres travaux doit être notée sur le profil. Les élévations données doivent provenir de niveaux à l'instrument pris le long de la localisation projetée, et un nombre suffisant de repères doivent être établis, et leur position et élévation indiquées sur le profil, de façon que les niveaux sur des parties de la localisation entre les repères puissent être contrôlés par l'officier inspecteur, s'il désire le faire.

Les coupes transversales exigées par le paragraphe (*b*) peuvent être rapportées sur le profil vis-à-vis les points où elles ont été prises ; elles doivent être placées et rapportées de façon à permettre une prompte détermination du talus et de son contenu. On attire surtout l'attention aux dispositions de ce paragraphe au sujet du renseignement à donner aux coupes transversales où l'eau doit être conduite par une tranchée. La nature des matières à enlever à chaque coupe transversale doit être indiquée. Le profil doit être signé par l'ingénieur qui a fait l'étude de localisation et mesuré les coupes transversales.

Article 12, paragraphe 7.—“(7.) Des plans de toutes digues, caissons ou coffrages, levées ou autres ouvrages projetés pour obstruer quelque rivière, cours d'eau, lac ou autre source d'alimentation, ou pour créer un étang, réservoir ou bassin quelque part, ou qui pourront avoir cet effet, seront préparés à une échelle longitudinale de pas moins d'un pouce par cent pieds, et pour les coupes transversales à une échelle de pas moins d'un pouce par vingt pieds, et indiqueront quels matériaux l'on se proposera d'employer et comment ils le seront dans ces travaux. Le bois, les fascines, la pierre, la brique et les autres matériaux employés dans ces travaux seront indiqués en détail sur un plan dressé à une échelle de pas moins d'un pouce par quatre pieds.”

Les plans exigés par ce paragraphe doivent être préparés sur de la toile à calquer, et en les préparant l'on doit prendre grand soin de donner tel renseignement au moyen de plan, élévation et coupe transversale qui fera bien comprendre la dimension, le genre et la situation de tous travaux projetés, et permettra de soigneusement contrôler toutes les tensions, pesanteurs et pression, l'espèce de matériaux à employer et la manière de les placer doivent être clairement définies.

Il importe que la méthode proposée de placer les bases de tout barrage, caisson ou levée doit être donnée dans des dessins détaillés, et que ces dessins indiquent la ligne des hautes eaux sur ce barrage, caisson ou levée.

Lorsque des caissons ou piles doivent être construits dans une rivière ou cours d'eau, la méthode que l'on se propose d'adopter pour les protéger doit être indiquée.

Ces plans doivent être signés par l'ingénieur qui trace les travaux projetés, et doivent être accompagnés d'un devis général concernant la manière de les ériger.

Section 12, paragraphe 8.—“(8.) Des cartes ou plans de coupes transversales montrant la surface du terrain sous les étangs, réservoirs ou bassins, ainsi que la ligne de surface des eaux qu'ils seront destinés à contenir ; l'échelle horizontale de ces cartes ou plans ne sera pas de moins d'un pouce par cent pieds, et l'échelle verticale de pas moins d'un pouce par vingt pieds ; et il sera indiqué un nombre suffisant de lignes de niveau pour permettre de calculer exactement le contenu de chaque étang, réservoir ou bassin. Si les cartes ou plans indiquent les niveaux par des lignes de contour, elles seront dressées à une échelle suffisamment grande pour que les lignes de contour, montrant une distance verticale entre elles de pas plus d'un pied, puissent être exactement tracées. Les cartes ou plans contiendront des renseignements suffisants pour faire voir distinctement quelles propriétés seront affectées par la création de ces étangs, réservoirs ou bassins, et la manière dont elles seront affectées, et montreront en détail toutes autres particularités que le ministre ou le Gouverneur en conseil prescrira ; et il sera aussi fourni un plan, dressé à une échelle de pas moins d'un pouce par quatre pieds, indiquant comment on se proposera de contrôler et tirer l'eau de ces étangs, réservoirs ou bassins.”

Les cartes de coupes transversales que mentionne ce paragraphe doivent être préparées sur de la toile à calquer ou du papier à coupe transversale. Si l'étendue de l'étang, réservoir ou bassin projeté est indiquée par des coupes transversales, elles seront assez espacées pour permettre de contrôler soigneusement le contenu de l'étang, réservoir ou bassin, lequel doit être indiqué sur le plan en pieds cubes ou pieds-acre.

Si l'étang, réservoir ou bassin est indiqué par des lignes de contour, ces lignes seront clairement et distinctement définies, et la donnée employée distinctement énoncée.

Les renseignements au sujet de la propriété qui sera probablement affectée par la création de cet étang, réservoir ou bassin, et la manière dont elle sera affectée, pourront être donnés par des lignes de contour, ou par des élévations à un nombre suffisant de points pour indiquer quel serait le résultat si la digue qui retient l'eau dans cet étang, réservoir ou bassin, se rompait.

La dimension, le genre et les matériaux qui composent les portes, empellements, déversoirs ou autres inventions pour contrôler et tirer l'eau de cet étang, réservoir ou bassin doivent être donnés sur ce plan, avec élévations et coupes transversales convenables, et tout autre détail propre à faire voir l'adaptabilité et la sûreté de l'invention projetée.

Ces plans devront être signés par l'ingénieur qui trace les travaux projetés.

Article 13.—La manière de dresser les plans que doit signer un arpenteur fédéral, tel que voulu par cet article, est clairement expliquée dans le mémoire d'instructions concernant la préparation des relevés d'arɔentage de droit de passage relatif à des entreprises d'irrigation dont on peut obtenir copie en s'adressant ɩu ministère ou au bureau du Surintendant des mines ɩ Calgary, Alberta.

Article 22. Les remarques qui précèdent s'appliquent ci.

Observations générales.

Tous les plans, cartes, profils, etc., doivent être l'assez bons échantillons de dessin, et tous les chiffres ɜt renvois doivent être clairs et distincts.

Chaque carte ou plan devrait avoir un titre concis et isible, et dans tous les cas l'échelle ou les échelles, elon le cas, doivent être clairement données.

Dans les cas où, dans un mémoire ou pétition, il est envoyé à des cartes ou plans, ces derniers devraient tre distinctement marqués d'une lettre ou d'un uméro.

Là où il est projeté de construire un pont dans le ut de porter une conduite d'eau de l'autre côté d'un ours d'eau ou d'un ravin, ou dans tout autre but en apport avec des entreprises d'irrigation, le plan et les lévations de ce pont seront dressés de façon à bien aire voir la dimension et le genre des travaux proetés et la forme de toute ferme employée dans la onstruction de ce pont sera telle et sera indiquée de elle manière sur ce plan et cette élévation, que la ension sur chaque pièce puisse être calculée exactenent.

Le plan doit être accompagné d'un devis général lonnant les dimensions et l'espèce de matériaux qui loivent être employés, la manière de les placer, et la esanteur et la tension pour lesquelles la structure est estinée.

DEMANDES AU PARLEMENT.

RÈGLES *in re* AVIS DE BILLS PRIVÉS.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos " Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.

JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a*.) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b*.) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

—

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

SUBSTANCE DES RÈGLES ET FORMES DE PROCÉDER DU SÉNAT CONCERNANT LES BILLS DE DIVORCE.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

1. All Indian children between the ages of seven and sixteen shall attend a day school on the reserve on which they reside for the full term during which the school is open each year, unless excused for the reasons hereinafter mentioned.

2. Any person who receives into his house a child of any other person between the aforesaid ages, and which child is resident with him, or in his care or employment, shall be deemed thereby to be subject to the same duty with respect to the education of such child during such residence, as a parent, and shall be liable to be proceeded against as in the case of a parent, if he should fail to cause such child to be educated to the extent required of a parent under these regulations; but the duty of the parent under these regulations shall not thereby be affected or diminished, and shall continue in full force.

3. No parent, guardian or other person shall be liable to any of the penalties of these regulations in respect of any child—

(1.) If the child is under efficient instruction;

(2.) If the child is unable to attend school by reason of sickness or other unavoidable cause;

5. Indian Agents may appoint one or more persons to act as truant officers on each reserve for the enforcement of these regulations, and such truant officers shall, for the purposes of these regulations, be vested with police powers, and shall perform such services as shall be deemed necessary by the Indian Agents by whom they are appointed for the enforcement of these regulations.

6. It shall be the duty of truant officers appointed under these regulations to examine into all cases of non-attendance at school which may be brought to their notice, to notify the parent, guardian or other person having the charge or control of any child between seven and sixteen years of age when such child is not attending school, and to require such parent, guardian or other person to cause the child to attend some school within three days.

7. AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 11th day of October, 1894.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

HIS Excellency, in virtue of the provisions of section 45 of "The North West Irrigation Act," 57-58 Victoria, chapter 30, and by and with the advice of the Queen's Privy Council for Canada, is pleased to prescribe the following forms to be used in proceedings under the said Act which are necessary to carry out the provisions thereof, and the same are hereby prescribed accordingly:—

1. Memorandum of instructions for the guidance of Dominion Land Surveyors employed in surveying and preparing returns of right of way for irrigation ditches and works in connection therewith.

2. Memorandum of instructions regarding the preparation of plans, profiles and specifications, showing works and structures erected by companies or individuals under the provisions of the North West Irrigation Act.

3. A form of license to be issued to persons who apply for permission to do the necessary preliminary work in connection with the location of the ditches which they propose to make.

JOHN J. McGEE,
Clerk of the Privy Council.

No. 1.

MEMORANDUM of instructions regarding the manner of surveying and preparing the returns of surveys of right of way for irrigation ditches, and works in connection therewith.

To prevent confusion or misunderstanding regarding the manner of effecting the field work, and to provide for uniformity in returns of right of way surveys for irrigating ditches, and works in connection therewith, the following instructions are laid down for the official guidance of those performing this class of work:—

1. Right of way surveys for irrigating ditches are of two kinds: preliminary surveys, and final surveys. The first mentioned are made in connection with proposed locations staked out for main ditches and laterals, to enable companies or individuals to file the

preliminary plans required by their Acts of incorporation, or the General Irrigation Act, and the latter, or final surveys, are made when the ditch routes, &c., have been finally located and construction begun, to enable final plans and books of reference to be filed, and title to right of way to be conveyed.

2. The preliminary surveys for right of way are to be made in manner provided by clause 3 of these instructions, and the plan showing the same is to be signed by the promoter, manager, or engineer of the company and certified in accordance with form C of these instructions.

The final surveys of right of way must be made by a duly authorized Dominion Land Surveyor, and all plans and books of reference of such surveys must be signed by the surveyor, and contain the certificates given in forms A and B of these instructions.

Preliminary surveys.

3. Preliminary surveys are to be made by retracing the proposed centre line of main and lateral ditches, and determining, by measurement, the position of such lines with reference to the boundaries of sections, quarter-sections or other registered parcels of land intersected.

Where it is proposed to create reservoirs, or to flood lands by erections of dams, the approximate boundaries of the area to be flooded are to be determined.

Should the preliminary location of main ditch contemplate the utilization of the dry beds of old watercourses, or other natural channels, as a portion of the scheme, the position and boundaries of such watercourses, or other channels, are to be determined with sufficient accuracy to enable them to be laid down on a plan.

In all cases where it is proposed to increase the width of the right of way, for the purposes of borrow pits, headworks, buildings, or other causes, the limits of the increased area are to be approximately located and shown on plan.

Final surveys.

4. The final survey of the right of way is to be made after the final location of main and lateral ditches, and prior to or during the work of construction. The survey must be made in such a manner as to determine accurately the boundaries of right of way with reference to boundaries of sections, quarter-sections, and other registered parcels of land. To accomplish this it will be necessary to determine, by measurement, the distance from the intersection of centre line of ditch to all section and quarter-section corners, and corners of other registered parcels of land, and the angles between such boundaries and centre line.

Where it is necessary to do so the boundaries of quarter-sections must be first surveyed in accordance with provisions of the Dominion Lands Act, so that angles and distances from ditch line can be properly determined on these boundaries.

In cases where it is desired to increase the limits of right of way for borrow pits, headworks, buildings, &c., the limits of such increased area are to be determined by actual survey.

Where it is proposed to utilize the dry beds of old watercourses, or other natural channels, for main or lateral ditches, the boundaries of such watercourse, swamp, or other natural channel are to be determined by offsets from main traverse lines. The traverse lines are to be so laid down that no offset therefrom will be of greater length than 300 feet, and the offsets are to be at such distances from each other as to provide that the area of the feature traversed will be determined within a close approximation of the actual area.

Where reservoirs are to be created, or land flooded by erection of dams, the area and limits of such reservoirs, or flooded area, are to be accurately determined by traverse lines and offsets as provided above.

The lengths and radii of all curves on ditch lines are to be determined.

Returns of survey.

5. In the case of preliminary surveys the returns will consist of a plan (on tracing linen, or blue print) drawn to a scale of 1,000 feet to one inch. This plan is to contain all the information furnished by the survey made in accordance with instructions regarding preliminary surveys, and is to be certified in accordance with form C of these instructions.

The returns of final surveys for right of way, will consist of a plan, prepared in all cases on tracing linen, and a book of reference.

The plan will be drawn to a scale of 1,000 feet to one inch, and must contain all the information supplied by the surveys made in accordance with instructions regarding final surveys, and in addition must show the width and area of right of way included within the boundaries of each quarter-section, or other registered parcel of land : the plans must be fair specimens of draughtsmanship, and all figures and references must be clear and distinct. The plan is to be certified in accordance with forms A and B of these instructions.

The book of reference is to be made of the same size and in accordance with sample accompanying these instructions. The right of way across each quarter-section, or other registered parcel of land, is to be accurately plotted on form, and all the information given on general plan is to be shown on section forms in book of reference.

The descriptions will be given for each quarter-section, or other registered parcel of land separately, and must be in such form, and sufficiently complete, to be used in a conveyance of the land described.

In all cases where traverses are made to determine the limits of old watercourses, or land to be flooded, which are to become a portion of the right of way, the sectional form in book of reference will be accompanied by a traverse table for each section separately, giving lengths and bearings of courses and offsets. This table is to be made in accordance with form shown.

The book of reference shall contain the certificates given in forms A and B of these instructions.

6. It is to be distinctly understood that the Government will in no wise be responsible for payments of accounts for services of the surveyor, or any other expense incurred in connection with these surveys, or returns thereof, it being the duty of irrigation companies, or individuals constructing private ditches, to make these surveys, and file with the department the returns thereof, at their own cost.

Form A.

I, Dominion Land Surveyor, do solemnly declare, that this plan (or book of reference, as the case may be) accurately shows the manner in which the land included therein has been surveyed and subdivided by me, and that the said plan is prepared in accordance with the provisions of " The Territories Real Property Act," chapter fifty-one of the Revised Statutes of Canada.

Dated at 18

A.B.
Dominion Land Surveyor.

Form B.

I of the of Dominion Land Surveyor, make oath and say, that I have, in my own proper person, according to law and the instructions of the Surveyor General, faithfully and correctly executed the survey shown by this plan and book of reference, and that the said plan and book of reference are correct and true to the best of my knowledge and belief. So help me God.

Dominion Land Surveyor.

Sworn before me at this day of 18

Form C.

I do hereby certify that this plan accurately shows the manner in which the preliminary surveys, for the proposed right of way, for the Irrigation Company have been made, and that the information therein contained is from actual measurements on the ground.

No. 2.

MEMORANDUM of instructions regarding the preparation of the plans, profiles and specifications required by the North West Irrigation Act.

It is provided by the North West Irrigation Act that companies or individuals applying for a license or authorization under its provisions, must file certain plans, profiles, cross-sections and specifications showing the proposed location of canals and ditches, and giving details of the structures to be erected in connection therewith.

The Act is explicit regarding the scale of, and general information to be furnished by, these plans, profiles, &c., but to prevent misunderstanding and delay, it is thought expedient to issue, in convenient form for reference, these detailed instructions regarding the manner of preparing the different plans, profiles, cross-sections and specifications, required by the Act, and the information which they will be expected to provide.

For convenience of reference the sections or portions of sections are given in the same order, regarding maps, plans, profiles, &c., as in the Act, with the necessary additional instructions added thereto.

Section 12, subsection 4.—"Attached to the memorial shall be a general map or plan on a scale of not less than one inch to half a mile, showing the tract to be served by such water, the location of all rivers, streams and other sources of water supplied therein, and the probable location of the proposed works, also the position and area of all ponds, reservoirs or basins intended to be created for the purpose of storing water or which may have that effect."

This map should be on tracing linen, the general topographical features may be laid down from a late edition of any general map issued by the Department of the Interior.

The proposed location of canals or ditches should be shown by a bold line, and the tract of country to be served, and areas of reservoirs, ponds or basins, should be designated with a wash of different colours, with suitable references.

The map or plan should be dated and signed by the engineer, individual, or some official of the company, as the case may be.

Section 12, subsection 5.—"(5.) There shall also be filed with the memorial plans in detail of all bridges or culverts necessary for road or farm crossings over or under the works of the company, also plans in detail of flumes, headworks, dams or other structures for the diversion or use of water, such plan to be on a scale of not less than one inch equal to four feet."

The plans called for by this subsection should be prepared on tracing linen: they must contain full information in the way of plan, elevation and cross-section showing the details of, and the materials to be used in, the proposed structures, so that all loads, strains, or pressure may be understood and checked.

The plans should be accompanied by a detailed specification regarding the manner of erecting the proposed structures, and both plan and specification should be signed by the Engineer, individual owner or some officer of the company, as the case may be.

Section 12, subsection 6.—"(6.) In the case of all ditches or canals carrying more than twenty-five cubic feet of water per second, in addition to the above information the applicants shall furnish the following maps or plans.

"(*a.*) A longitudinal profile of the ditch, showing the bottom and the proposed surface water line. The horizonal scale of this plan shall be not less than one inch to four hundred feet, and the vertical scale not less than one inch to twenty feet.

"(*b.*) A plan showing cross-sections at a sufficient number of points to fully illustrate all the different forms which the ditch when constructed will take particularly on side-hills or elsewhere where any portion of the water is to be conveyed in fill. When water is to be conveyed in cut there shall also be shown on this plan cross-sections at points where the shortest horizontal distance from either side of the bottom of the ditch to the surface of the ground is less than double the bottom width of the ditch at that point. The plan shall be drawn on a horizontal and vertical scale of one inch to twenty feet."

The plans required by these subsections are to be prepared on tracing linen. The profile must give the datum used, and must contain elevations at a sufficient number of points to enable the proposed location to be carefully checked; the proposed grade of canal or ditch must be laid down with a clear and well defined line, and must be shown also in figures along such grade line. The position of all dams, headworks, flumes, bridges, road crossings or other structures must be noted on profile. The elevations given must be from instrumental levels along the proposed location, and a sufficient number of bench marks must be established, and their position and elevation shown on profile, so that levels on portions of location between bench marks may be checked by the inspecting officer if he desires to do so.

The cross-sections required by subsection (*b*) may be plotted on the profile opposite the points where they have been taken; they must be so placed and plotted as to enable a ready determination of the slope and contents to be made. Particular attention is directed to the provisions of this subsection regarding information to be given at cross-sections where water is to be conveyed in cut. The kind of material to be moved at each cross-section should be shown. The profile is to be signed by the Engineer who has made the location survey and measured the cross-sections given.

Section 12, subsection 7.—"(7.) Plans of any dams, cribs, embankments or other works proposed to obstruct any river, stream, lake or other source of water supply, or in order to create a pond, reservoir or basin of water anywhere, or which may have that effect, shall be prepared on a longitudinal scale of not less than one inch to one hundred feet, and for cross-sections on a scale of not less than one inch to twenty feet, and shall show what material is intended to be used and how placed in such works. The timber, brush, stone, brick or other material used in such works shall be shown in detail on a plan, the scale of which shall not be less than one inch to four feet."

The plans called for by this subsection are to be prepared on tracing linen, and in their preparation particular care is to be taken to give such information by plan, elevation and cross-section as will enable the size, style and location of any proposed structure to be thoroughly understood, and all strains, loads and pressure carefully checked; the kind of material to be used and manner of placing the same must be clearly shown.

It is important that the proposed method of placing the footings of any dam, crib or embankment should be given in detail drawings, and that these drawings should show the high water line on such dam, crib or embankment.

When cribs or piers are to be erected in any river or stream the proposed method of protecting them from ice must be shown.

These plans must be signed by the Engineer who designs the proposed structures, and should be accompanied by a general specification regarding the manner of erecting the same.

Section 12, subsection 8.—"(8.) Cross-section maps or plans showing the surface of the ground under such pond, reservoir or basin of water, and also the surface of the water proposed to be held therein; the horizontal scale of said maps or plans shall be not less than one inch to one hundred feet; and the vertical scale shall be not less than one inch to twenty feet, and a sufficient number of lines of levels shall be shown, so that the contents of the pond, reservoir or basin of water, may be accurately determined. If the maps or plans show the levels by contour lines, they shall be on a scale sufficiently large, so that the contour line, showing a vertical distance between them not exceeding one foot, can be accurately delineated. The maps or plans shall have sufficient information to show clearly the property likely to be affected by the creation of such ponds, reservoirs or basins of water and the manner in which affected, and shall show in detail such other particulars as the Minister or Governor in Council sees fit to order, and there shall also be furnished a plan, on a scale of not less "than one inch to four feet, showing the proposed "manner of controlling and drawing off the water "from any such pond, reservoir, or basin."

The cross-section maps required by this subsection are to be prepared on tracing linen or cross-section paper. If the area of the proposed pond, reservoir or basin is shown by cross-sections, they shall be at sufficient intervals to enable the contents of the pond, reservoir or basin, which must be shown on the plan in cubic or acre feet, to be carefully checked.

If the pond, reservoir or basin is to be shown by contour lines they shall be clearly and distinctly defined and the datum used distinctly set forth.

The information regarding the property likely to be affected by the creation of such pond, reservoir or basin, and the manner in which affected, may be given by contour lines, or by elevations at a sufficient number of points to show the result of the bursting of any dam controlling the waters in such pond, reservoir or basin.

The size, style and material composing all gates, valves, flumes or other contrivance for controlling and drawing off the water from such pond, reservoir or basin must be given on plan, with suitable elevations and cross-sections, and any further detail necessary to enable the suitability and safety of the proposed contrivance to be decided upon.

These plans must be signed by the Engineer who designs the proposed works.

Section 13.—The method of preparing the plans to be signed by a Dominion Land Surveyor required by this section, is clearly set forth in the memorandum of instructions regarding the preparation of returns of right of way surveys in connection with irrigation enterprises, copies of which can be had from the Department or at the office of the Superintendent of Mines at Calgary, Alberta.

Section 22.—The same remarks as in the preceding paragraph apply in this case.

General Remarks.

All maps, plans, profiles, &c., must be fair specimens of draughtsmanship, and all figures and references must be clear and distinct.

Each map or plan should have a concise and legible title, and in all cases the scale or scales, as the case may be, must be clearly set forth.

In cases where maps or plans are referred to in any memorial or petition, they should be distinguished by a letter or number which should be clearly marked thereon.

When it is proposed to erect a bridge for the purpose of carrying a flume across any stream or ravine, or for any other purpose in connection with irrigation enterprises, the plan and elevations of such bridge must be so prepared as to clearly set forth the size and style of the proposed structure, and the form of any truss used in the construction of such bridge shall be such, and will be so shown on such plan and elevation, that the stress in every member will admit of exact calculation.

The plan must be accompanied by a general specification giving sizes and kind of material to be used, the manner of placing the same, and the load and strains for which the proposed structure is designed. Both plan and specification must be signed by the Engineer designing the structure.

JOHN J. McGEE,
Clerk of the Privy Council.

Regulations for the employment of Land Surveyors by the Department of the Interior.

1. For surveys other than township subdivision surveys, the Minister of the Interior may employ surveyors at a daily or monthly salary.

2. When the services of a surveyor are of a temporary character and not for more than one year, his salary shall be paid at the rate of five dollars per diem for ordinary surveys, but for surveys of block outlines

and for services requiring special qualifications, the rate shall be six dollars per diem.

3. A surveyor shall be paid for every day of service in the field, including Sundays, and the number of days shall be computed from the day on which he leaves his home until the day of his return, both days inclusive.

4. For office work, preparing his returns, a surveyor shall be allowed the actual time spent on their preparation, but not in excess of the number of days declared sufficient by the Surveyor General.

5. When a surveyor has been continuously employed for one year and the employment is continued for a longer period his salary after the first year shall not be at a greater rate than one hundred and twenty-five dollars per month for ordinary surveys and one hundred and fifty dollars per month for special surveys. A surveyor so employed shall attend the office in the Department at Ottawa when not engaged on work in the field and shall be subject to the rules and regulations concerning temporary employees. For the purposes of this clause, employment at the rate of ten months in any one year or at a like rate for shorter periods, shall be held to be continuous.

6. The Order in Council of the 20th October, 1892, concerning leave of absence to temporary employees shall apply to surveyors employed by the month under the next preceding clause.

7. If a surveyor employed at a daily or monthly salary or a member of his party meets with an accident while engaged on the work of the survey the Minister may pay to the injured surveyor or member such portion of his salary while incapacitated from work, and of his reasonable medical expenses as he may see fit.

8. The surveyor shall be allowed the actual cost of hire of men, provided their number and rate of pay is not in excess of what is permitted by his instructions.

9. The surveyor shall be allowed for himself and every man of his party, a ration allowance of fifty cents per diem while in the field.

10. For the transport of himself and party and miscellaneous expenditure, (not including meals, board, hotel expenses, camp equipage and stationery) the surveyor shall be allowed actual expenses supported by vouchers, provided they do not exceed what is allowed by his instructions.

11. For meals, board and hotel expenses of himself and party while in the field, the surveyor shall be allowed, in addition to the ration allowance, a sum of twenty-eight cents per day for himself and four cents per day for every other member of the party.

12. Camp equipage shall be owned and furnished by the surveyor. For its use, he shall be allowed while in the field twenty-two cents per day for himself and six cents per day for every other member of the party.

13. A surveyor employed under daily pay shall receive an allowance of ten dollars for stationery and a living allowance of one dollar per diem while at office work preparing his returns.

14. The surveyor shall own and furnish the surveying instruments required in the ordinary practice of his profession. Those who are continuously employed shall be furnished chains and their instruments shall be repaired, when necessary, by the Department, provided it shall rest with the Surveyor General to decide whether an instrument may be repaired or whether the surveyor must purchase a new one.

15. In special cases, when the Minister believes that any of the regulations respecting ration, board, camp equipage and stationery would not apply, he may allow the surveyor his actual expenditure supported by vouchers.

16. The surveyor shall receive with his instructions such an advance on account of his survey as the Minister may direct. Subsequent advances shall be made on receipt of a certified statement from the surveyor on Form G. exhibiting in detail the payments made out of former advances and those which are to be made out of the amount applied for.

17. One half of the salary of surveyors under daily pay shall be retained until their accounts are finally closed.

18. A surveyor's accounts shall be in duplicate and shall consist of :—

19. The surveyor shall make the following statutory declaration respecting his accounts :—

I, A.B., Dominion Land Surveyor, do solemnly declare that this account is correct, and I make this solemn declaration conscientiously believing it to be true, and knowing that it is of the same force and effect as if made under oath, and by virtue of the Canada Evidence Act, 1893.

Declared before me at

this day of A.D. 189 .

20. The contract rate to be paid for the subdivision of a township shall be calculated according to the nature of the country as shown by the survey of the outlines of the township and on the following basis :—

First class.—Any land not classified as second or third class, seven dollars per mile.

Second class.—Poplar and other soft woods where occurring in alternation with prairie, eleven dollars per mile.

Third class.—Continuous woods, heavy underbrush, windfalls, thick willows, eighteen dollars per mile.

21. When the survey of the township outlines is not sufficiently complete to calculate the rate before the contract for the subdivision is given, the surveyor shall be paid the first, second and third class rates according to the proportion of each returned in his field notes.

22. Traverse lines shall be paid at the uniform rates of nine dollars per mile east of the Fourth Meridian and ten dollars per mile west of the same.

23. The rates mentioned in clauses 21, 22 and 23 shall be reduced ten per cent for subdivision survey contracts amounting to five thousand dollars or thereabouts.

24. In addition to the above rates, a survey contractor shall receive :—

For each statutory declaration of occupation by a settler	one dollar.
For renewing a boundary mark at a corner on which the surveyor's contract requires him to close	fifty cents.
For renewing a boundary mark at any other corner	one dollar.
For building a mound at a boundary corner in the woods	fifty cents.

25. For retracing an obliterated line, when necessary, placing boundary marks thereon and furnishing plans and field notes, the contractor shall receive two-thirds of the rate for the subdivision of the township, provided that it shall rest with the Surveyor General to decide whether the work was necessary or not.

26. On receipt of his subdivision survey contract duly executed, the contractor shall be given an advance not exceeding one thousand dollars.

27. Further payments up to seventy-five per cent of the value of the work executed may be made to the contractor on receipt of progress accounts on Form H. accompanied by sketches of the survey.

28. These regulations may be applied to surveys made during the year 1893.

29. No cancelling, repealing or modifying clause of subsequent Orders in Council shall operate to cancel, repeal or modify any part of these regulations unless they are specially mentioned.

(Sgd.) E. DEVILLE,
Surveyor General.

I. AIDS TO NAVIGATION IN PARRY SOUND.

Five lights, established by the Government of Canada to indicate the entrance to Parry Sound, on the east shore of the Georgian Bay, Ontario, were put in operation on the 29th ult. They are located as follows:—

1. WALTON ISLAND LIGHT.

The first of these lights is located on the westernmost Walton Island, and is the front light of a pair to be known as the Snug Harbour Range.

Lat.	N.	45°	22'	18"
Long.	W.	80°	19'	38"

The light is a fixed red catoptric light, elevated 39 feet above the level of the bay, and should be visible 7 miles in, and over a small arc on each side of, the line of range.

The tower is a square, pyramidal wooden building, surmounted by a wooden lantern. It is 29 feet high from the ground to the vane on the lantern, and is painted white, with a red stripe 3 feet wide on the side facing the channel.

2. SNUG HARBOUR LIGHT.

The second light is built on the south extremity of an island on the north side of the entrance to Snug Harbour, and is distant 3,100 feet E. by N. ¼ N. (N. 69° 56' E. true) from the first described.

Lat.	N.	45°	22'	27"
Long.	W.	80°	18'	58"

The light is a fixed white catoptric light, elevated 62 feet above the level of the bay, and should be visible 13 miles in, and over a small arc on each side of, the line of range.

The building is of wood, and consists of a square pyramidal tower, rising from the roof of a rectangular dwelling house, surmounted by a wooden lantern. It is 50 feet in height from the ground to the vane on the lantern, and is painted white with a red stripe 3 feet wide on the middle of the side facing the channel.

The two lights in one lead in E. by N. ¼ N., south of Seguin Bank through the Main Channel to the intersection with the Jones Island Range.

3. GORDON ROCK LIGHT.

The third light is on the summit of the northernmost Gordon Rock, and is the front light of a pair of leading lights to be known as the Jones Island Range.

Lat.	N.	45°	18'	56"
Long.	W.	80°	17'	15"

The light is a fixed red catoptric light, elevated 40 feet above the level of the bay, and should be visible 7 miles over an arc of 180 degrees between the bearings of S.E. by E. ½ E., round through S. to N.W. by W. ½ W.

The tower is a square pyramidal wooden building, surmounted by a wooden lantern. It is 38 feet high from the ground to the vane on the lantern, and is painted white, with a red stripe 3 feet wide on the middle of the side facing the channel.

4. JONES ISLAND LIGHT.

The fourth light is located on the south-west point of Jones Island, distant 2,900 yards S.E. ¼ S. (S. 48° 11' E. true (from Gordon Rock Light.

Lat.	N.	45°	18'	0"
Long.	W.	80°	15'	42"

The light is a fixed white light, elevated 63 feet above the level of the bay, and should be visible 8 miles in, and over a small arc on each side of, the line of range.

The building is of wood, and consists of a square pyramidal tower, rising from the roof of a rectangular dwelling house, and surmounted by a wooden lantern. It is 50 feet in height from the ground to the vane on the lantern, and is painted white with a red stripe 3 feet wide down the middle of the side facing the channel.

These two lights in one lead in S.E. ¼ S. from the intersection with the Snug Harbour Range Lights to Gordon Rock, clear of Ariel Rock, Hall Reef, Telegram Rock and Hooper Island Reef, on the starboard hand; and clear of Black Rock and Twin Rock, on the port hand.

5. HUGH ROCK LIGHT.

The fifth light is located on the summit of Hugh Rock, at the junction of Albert Channel with the main channel.

Lat.	N.	45°	19'	10"
Long.	W.	80°	14'	31"

The light is fixed white, elevated 34 feet above the level of the bay, and should be visible 7 miles from all points of approach by water.

The illuminating apparatus is dioptric of the 7th order. The tower is a square pyramidal wooden building, surmounted by a wooden lantern. It is painted white, with a red stripe 3 feet wide on the west side.

Vessels entering Parry Sound will make the approach guided by Red Rock Light, as previously, until they bring the Snug Harbour Range Lights in one, when they will enter the main channel, keeping them in one E. by N. ¼ N. until the Jones Island range is brought into alignment. This alignment is then kept S.E. ¼ S. until within ¼ mile of Gordon Rock, when they should haul up E. by S. ¼ S., leaving Gordon Rock on the starboard hand. When on a line joining Gordon Rock and Hugh Rock they can bear up for Hugh Rock light and keep the course east until within ¾ mile of Hugh Rock light, when they again change the course to N.E. by E. ½ E., to pass Cameron Island. After passing Cameron Island the entrance to Parry Sound is free from shoals.

BUOYS.

In connection with the establishment of the channel above described, the spar buoys in the approaches to Parry Sound were changed last spring, and are now moored on or close to the channel side of the following dangers:—

A black buoy at Richmond Rock.
A black buoy at McGowan Rock.
A red buoy at Three Star Shoal.
A red buoy at Ariel Rock.
A black buoy at Twin Rock.
A red buoy at Telegram Rock.
A black buoy on shoal south of Reid Islands.
A red buoy on shoal north-west of Hugh Rock.
A black buoy on 2½-fathom patch S.W. of Carling Rock.
A black buoy on extremity of reef off Bobs Point.

A red buoy on 1¾-fathom patch in the inner harbour.

The buoys shown on Admiralty Chart 1731 south of Carling Rock have been discontinued.

This notice affects Admiralty charts Nos. 327, 678 and 1731, the Georgian Bay and North Channel Pilot, chapter VIII, and the information respecting the lights should be entered in the Canadian List of Lights and Fog Signals under the Nos. 1035 to 1039.

II. LIGHT ON CHURCHVILLE POINT, MICH.

The Lighthouse Board of the United States of America has given notice that on the 1st instant a fixed white light, with two fixed red sectors, was established on Churchville Point, the east point of Sugar Island, St. Marys River, Michigan.

The light is shown, at a height of 30 feet above the water, from a lens lantern on a post rising from the middle of a square lamp house; the post will be natural colour and the house white.

The southerly red sector will cover the black spar buoy, No. 49, off Church Point crib, and mark the turning point to and from the channel between Squirrel Island and Church Point.

The northerly red sector will cut the southerly red sector of Manhattan Shoal light and mark the turn of channel midway in the bend. The white arc between the southerly and northerly red sectors is about 198°.

This notice affects Admiralty charts Nos. 324, 325 and 678.

I. GALLOWS POINT BEACON LIGHT.

It is the intention of the Department to remove the fixed red light now attached to the framework beacon on the red platform buoy moored $1\frac{2}{10}$ cables S.W. by S. from Gallows Point, Nanaimo Harbour, British Columbia, to a dolphin or pile beacon proposed to be erected in the vicinity of the present black buoy on the south side of the channel, immediately off Gallows Point. Mariners will require to ascertain whether the light is shown from the starboard or port side of the channel before entering.

Due notice of the completion of this change will be given.

II. PORT ETCHES AND APPROACHES, ALASKA.

The following information relating to Port Etches and approaches is derived from a report by Lieutenant J. B. Collins, of the United States SS. "Mohican," and is taken from United States Hydrographic Office Notice to Mariners No. 45 of 1894, which also contains a chart of Constantine Harbour, Port Etches.

Lat. N. 60° 21'
Long. W. 146 51

The approaches to Port Etches are clear of all danger. Cape Hinchinbrook and the shore as far as the southern point of entrance may be approached safely as near as a mile. The north shore is clear excepting the N.W. point of the island, where it is reported that a shoal or flat extends off to the northward, from a point one mile west of Point Johnstone, filling up the bight between that point and Hawkins Island.

Hinchinbrook Island is high and mountainous, covered with snow early in June. Cape Hinchinbrook is a gently sloping ridge descending to the sea, with a few breaks in the ridge and a small pinnacle close to the cape. Seen from the southward there are three capes, forming the western end of the island south of Port Etches, with corresponding small bights between the capes. The middle cape is a low jutting point. The northern cape is high and rounded.

Seal rocks consist of two bare blackish rocks connected by a very short reef, covered at high water and surrounded by a number of small rocks extending off about 300 yards. The main rocks cover a space about 300 yards long by 80 yards wide, and are about 40 feet high. When first seen from a distance they appear like a schooner under sail. From the rocks a reef makes out about 1 mile N.E. by N. (N. 61° E. *true.*) To the eastward and northward the rocks should be given a wide berth, at least 1½ miles, but on the western side they may be approached as close as ½ mile. There is no growing kelp visible near them.

Port Etches.—The village of Port Etches is located about where the Russian fort is indicated on British Admiralty chart No. 1737. The fort no longer exists. There are now three large frame buildings used by the Alaska Commercial Company as storehouses and residence for its agent. There are also about 15 small houses occupied by the natives. The population in June, 1894, was 62.

There are no supplies of any kind, but wood and water are plentiful.

Vessels may anchor on either shore at almost any point, according to the wheather, but the usual anchorage is with Phipps Point bearing W. ½ N. (N. 57° W. *true*), and large island in the bight N.N.W. ¾ W. (N. 3° 30' W. *true*). There is very little tidal current in the outer harbour, vessels usually riding head to wind.

Landing may be made at any place. The landing for the village is in Constantine Harbour in the bight near the village. The spit, extending from the fort to the north shore, is of shingle and about 35 feet high, grass grown. The natives state that about five years ago a tidal wave came over the spit at about the same time that Mt. Augustine, Cooks Inlet, was in action. The spit opposite Point Phipps is from 10 to 20 feet high, grass grown. The chief of the resident Indians and the storekeeper state that in severe gales there is a continuous breaker from the Porpoise Rocks to the Fort Point; also that there is good anchorage between Porpoise Rocks and the northeast shore. The variation of the compass June 18, 1894, was found to be 27° 24' E.

Prince William Sound.—Vessels bound into Cordova Bay usually, after clearing by ½ mile the northern point of entrance to Port Etches, stand N N.W. ⅜ W. (N. *true*), for the black bluff locally known as Knowles Head, at the southwestern extremity of the peninsula between Port Fidalgo and Port Gravina. When about 6 miles from that head they haul to N.E. by E. ⅝ E. (E. *true*), for the northern side of Cordova Bay, avoiding the Hawkins Island shore until well within the bay. If bound to Orca they usually pass between Hawkins Island and the islet off its eastern end and feel their way with the lead across the bay. Orca is in the bight just north of the lake which is north of Eyak Village. There are two canneries there, the only ones in Prince William Sound. Port Fidalgo is reported full of shoals. It is also reported that a flat or shoal covers the western part of the Sound from the island southwest of Port Fidalgo to the north point of Nowell Peninsula.

This notice affects Admiralty charts Nos. 1499 and 1737.

CHANGE OF LIGHT AT KAGAWONG.

The temporary pole light, maintained at Kagawong, at the port of Mudge Bay, North Channel, on the north shore of Manitoulin Island, District of Algoma, Ontario, has been replaced by a light shown from an enclosed tower.

Lat. N. 45° 54' 31"
Long. W. 82° 15' 45"

The tower is built in the same location as the original mast, 75 feet back from the shore line, and 100 feet westward from the public wharf.

It is a square pyramidal wooden building, surmounted by a wooden lantern, and is 27 feet high from its base to the vane on the lantern. The tower is painted white, the lantern red.

The light is a fixed white catoptric light elevated 38 feet above the level of the bay. It should be visible 11 miles from all points of approach by water. It was first shown from the new tower on the 29th October, 1894.

This notice affects Admiralty charts Nos. 519, 678 and 908, Georgian Bay and North Channel Pilot, 1892, page 69, and Canadian List of Lights and Fog Signals No. 1070.

I. BUOY OFF LOTTIE WOLF ROCK.

A red spar buoy was moored on the 27th August last, off Lottie Wolf Rock, off the north side of Hope Island, in the Georgian Bay.

Lat. N. 44° 55' 25"
Long. W. 80° 10' 28"

It is moored in 22 feet water and from it Hope Island lighthouse bears S.S.E. ¼ E., distant one nautical mile, and the shoal of 9 feet water S. by E. ½ E., distant 400 yards.

Vessels approaching the buoy from the westward must not bring it to bear anything to the northward of E. ¾ N. They may pass close to the buoy, but after passing it must not head anything to the southward of the north-east point of Beckwith Island, until past Hope Island light.

This notice affects Admiralty charts Nos. 327 and 678; the sheet chart from the Western Islands to Waubashene about to be issued under the No. 2102; and Georgian Bay and North Channel Pilot, chapter 9.

II. ROCK ISLAND LIGHT STATION, N.Y.

Notice is given by the Lighthouse Board of the United States of America, that the tower at Rock Island Light Station, on Rock Island, St. Lawrence River, in the State of New York, has been increased 5 feet in height, and the light is now visible above the roof of the keeper's dwelling in the direction of the dock at Thousand Island Park.

At the close of navigation this season the fixed white reflector light shown from the veranda of the Keeper's dwelling in the direction of the dock at Thousand Island Park will be permanently discontinued.

MIDDLE GROUND BUOY REPLACED BY DOLPHIN.

The buoy moored on the Middle Ground, in Nanaimo Harbour, on the east coast of Vancouver Island, British Columbia, from which a white light was shown, has been removed, and its place taken by a dolphin or beacon formed of a cluster of three piles painted black. The lantern heretofore attached to the framework of the superstructure of the buoy is now maintained on top of this beacon, and it is expected that on account of the stability of the beacon the light will be more reliable than it was when on the buoy. The character of the light has not been changed.

This notice affects Admiralty charts Nos. 573, 579, 1917 and 2512, and Canadian List of Lights and Fog Signals No. 1189.

I. LOUISBURG HARBOUR—AMENDED POSITION OF SOUTHERNMOST CHURCH.

Information has been received by the British Admiralty from Captain W. Wilson, H.M.S. "Canada," of the undermentioned amended position of the southernmost church, Louisburg Harbour, on the Atlantic shore of Cape Breton:—

The southernmost church stands in a position 1⅓ cables S. by W. ⅞ W. (S. 21° W.) from that now shown on the chart or approximately in

This notice affects Admiralty chart No. 2692; also St. Lawrence Pilot, vol. II, 1881, page 229.

II. BOUNDARY BUOY ON ST. CROIX RIVER.

The United States Lighthouse Board gives notice that the first class can buoy, painted white with "C.I." in black letters, marking the boundary line between Maine and New Brunswick, moored off Carlow Island, St. Croix River, was discontinued on the 1st October.

This notice affects Admiralty charts Nos. 2013 and 2120, and Canadian Notice to Mariners No. 1 of 1894.

NOTICE TO MARINERS.

No. 45 of 1894.

I. GRASSY POINT BEACON REPLACED.

The beacon on the extremity of the spit at Grassy Point, Baynes Sound, on the east coast of Vancouver Island, British Columbia, first described in Part VI of Notice to Mariners No. 42, of 1889, has been re-erected, and the spar buoy temporarily maintained there, as described in Notice to Mariners No. 28 of 1893, has been removed.

Lat.	N.	49°	38'	46"
Long.	W.	124°	55'	58"

The beacon consists of a single pile driven in 2½ fathoms water, showing 12 feet at high water. It is painted black with black ball of open lattice-work on the head.

II. BEACONS ON KELP BAR.

The two black spar buoys heretofore marking the crossing over Kelp Bar, Baynes Sound, have been replaced by two beacons, placed in the following positions:—

Inner beacon	Lat. N.	49°	38'	56"
	Long. W.	124°	53'	30"
Outer beacon	Lat. N.	49°	39'	10"
	Long. W.	124°	53'	16"

Each beacon is driven in 3¼ fathoms water, and consists of a single pile surmounted by a slatwork triangle, apex upward, the whole painted black, and rising 9 feet above high water.

The beacons are at the extreme east and west limits of the shoalest ground, and bear from each other N. by E. ½ E. and S. by W. ½ W. 1,600 feet apart.

A course from one beacon to the other, passing both to the southward, leads over the bar in 12 feet water.

The beacons on the Vancouver Island shore, to show the same crossing, consist of two whitewashed planks each fastened diagonally to a tree. When the trees are brought in one so that the planks form a St. Andrew's cross, they lead across the bar in the same depth of water, a little to the southward of the pile beacons.

This notice affects Admiralty charts Nos. 580, 585 and 1917.

NOTICE TO MARINERS.

No. 46 of 1894.

GANNET ROCK FOG GUN REPLACED BY COTTON POWDER SIGNALS.

On or about the 10th November next, the fog gun heretofore fired every hour at Gannet Rock light station, off Grand Manan Island, in the Bay of Fundy, will be discontinued, and replaced by a cotton powder cartridge exploded every twenty minutes.

The new signal will be fired from a derrick erected near, and on the seaward face of, the lighthouse. The reports of the explosions should be sharper than those from the gun previously fired.

Until the supply of gunpowder at the station is exhausted the gun may occasionally be fired instead of the cartridges, but when used the intervals will be twenty minutes instead of one hour, as formerly.

This notice affects Admiralty charts Nos. 352, 1651, 2492, 2539 and 2670, and Canadian List of Lights and Fog Signals No. 3.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

QUE les règlements concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur, recommandés par le Ministre de l'Intérieur dans son Memo. du 30 juillet 1894, soient approuvés.

JOHN J. McGEE,
Greffier du Conseil privé.

—

Règlements concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur.

1. Pour des arpentages autres que des arpentages de subdivision de townships, le Ministre de l'Intérieur pourra employer des arpenteurs à un salaire quotidien ou mensuel.

2. Lorsque les services d'un arpenteur sont d'une nature temporaire, et pour pas plus d'un an, son salaire sera payé au taux de cinq piastres par jour

pour les arpentages ordinaires, mais pour les arpentages de contour, de bloc et pour services exigeant des aptitudes spéciales, le taux sera de six piastres par jour.

3. Un arpenteur sera payé pour chaque jour de service sur le terrain, y compris les dimanches, et le nombre de jours sera calculé à compter du jour qu'il laisse son domicile jusqu'au jour de son retour, les deux jours inclusivement.

4. Pour le travail de bureau, à préparer ses rapports, un arpenteur comptera le temps réel occupé à leur préparation, mais ne devra pas dépasser le nombre de jours déclaré suffisant par l'Arpenteur général.

5. Lorsqu'un arpenteur a été employé continûment pendant un an et que l'emploi est continué pour une plus longue période son salaire après la première année n'excèdera pas cent vingt-cinq piastres par mois pour les arpentages ordinaires et cent cinquante piastres par mois pour arpentages spéciaux. Un arpenteur ainsi employé assistera au bureau dans le Ministère à Ottawa lorsqu'il n'est pas engagé au dehors, et sera soumis aux règles et règlements concernant les employés temporaires. Pour les fins de la présente clause, l'emploi au taux de dix mois dans une même année, ou au même taux pour de plus courtes périodes, sera réputé être continu.

6. L'arrêté en conseil du 20 octobre 1892, concernant les congés aux employés temporaires, s'appliquera aux arpenteurs employés au mois sous la clause qui précède.

7. Si un arpenteur employé à un salaire quotidien ou mensuel, ou un membre de son parti, subit un accident pendant qu'il est engagé à l'arpentage, le Ministre pourra payer à l'arpenteur ou individu blessé, tant qu'il sera incapable de travailler, telle partie de son salaire et de ses frais de médecin qu'il jugera à propos.

8. Il sera alloué à l'arpenteur le coût réel de l'engagement des hommes, pourvu que leur nombre et le taux de paie n'excèdent pas ce qui est permis par ses instructions.

9. L'arpenteur aura droit pour lui-même et chaque homme de son parti, à une allocation pour rations de cinquante centins par jour tant qu'il sera sur le terrain.

10. Pour son transport et celui de son parti, et diverses dépenses (non compris les repas, pension, frais d'hôtellerie, effets de campement et papeterie), il sera alloué à l'arpenteur les dépenses réelles appuyées de pièces justificatives, pourvu qu'elles n'excèdent pas ce qui est permis par ses instructions.

11. En sus de l'allocation pour rations il sera alloué à l'arpenteur pour repas, pension et frais d'hôtellerie pour lui-même et son parti lorsque sur le terrain une somme de vingt-huit centins par jour pour lui-même et quatre centins par jour pour chaque autre membre du parti.

12. Les effets de campement appartiendront à l'arpenteur et seront fournis par lui. Pour leur usage, il lui sera alloué, tant qu'il sera sur le terrain vingt-deux centins par jour pour lui-même, et six centins par jour pour chaque autre membre du parti.

13. Un arpenteur employé à la journée recevra une allocation de dix piastres pour papeterie et une piastre par jour lorsqu'il sera au bureau à préparer ses rapports.

14. L'arpenteur possèdera et fournira les instruments requis dans la pratique ordinaire de sa profession. Ceux qui sont continûment employés seront pourvus de chaînes et leurs instruments seront réparés au besoin par le Ministère, pourvu qu'il appartiendra à l'Arpenteur général de décider si un instrument peut être réparé, ou si l'arpenteur doit en acheter un neuf.

15. Dans les cas spéciaux, alors que le Ministre croit que quelques-uns des règlements concernant les rations, pension, effets de campement et la papeterie ne peuvent s'appliquer, il pourra allouer à l'arpenteur ses dépenses réelles appuyées de pièces justificatives.

16. L'arpenteur recevra avec ses instructions, telle avance sur son compte d'arpentage que le Ministre prescrira. D'autres avances subséquentes seront faites sur reçu d'un état certifié par l'arpenteur en la forme G. indiquant en détail les paiements faits à même les premières avances, et ceux qui seront faits à même la somme demandée.

17. La moitié du salaire des arpenteurs à la journée sera retenue jusqu'à ce que leurs comptes soient définitivement clos.

18. Les comptes d'arpenteurs seront faits en double, et se composeront :—

1. Compte de service personnel, formule A.
2. Bordereau de paie, formule B.
3. Transport, formule C.
4. Divers, formule D.
5. Comment il a été disposé de l'équipement, formule E.
6. Bilan, formule F.

Un journal de l'emploi de chaque jour sur le terrain sera fourni.

19. L'arpenteur fera la déclaration statutaire suivante au sujet de ses comptes :—

Je, A.B., arpenteur fédéral, déclare solennellement que le présent compte est exact, et je fais cette déclaration solennelle, la croyant consciencieusement vraie, et sachant qu'elle a la même force et le même effet que si elle était faite sous serment, sous l'empire de l'Acte de la preuve en Canada, 1893.

Déclaré par-devant moi à

ce jour de A.D. 189 .

20. Le taux de contrat à payer pour la subdivision d'un township sera calculé suivant la nature du pays tel que démontré par l'arpentage des contours de township, et sur les bases suivantes :—

Première classe.—Tout terrain non classifié comme de deuxième ou troisième classe—Sept piastres par mille.

Deuxième classe.—Peupliers et autres bois tendres, alternant avec la prairie—Onze piastres par mille.

Troisième classe.—Bois continus, épaisses broussailles, vents chablis, épais saules—Dix-huit piastres par mille.

21. Lorsque l'arpentage des contours de townships ne sont pas suffisamment complets pour calculer le taux avant de passer le contrat pour la subdivision, l'arpenteur sera payé aux taux de la première, deuxième et troisième classes, dans la proportion de chaque classe portée sur son carnet d'opérations.

22. Les lignes de relèvements seront payées aux taux uniformes de neuf piastres par mille à l'est du quatrième méridien, et de dix piastres par mille à l'ouest de ce méridien.

23. Les taux mentionnés aux clauses 21, 22 et 23 seront réduits de dix pour cent pour les contrats d'arpentage de subdivision se montant à cinq mille piastres ou à peu près.

24. En sus des susdits taux un entrepreneur d'arpentages recevra :—

Pour chaque déclaration statutaire d'occupation par un colon	une piastre.
Pour renouveler une borne à un angle où le contrat de l'arpentage stipule qu'il doit finir..........................	cinquante-centins.
Pour renouveler une borne à tout autre angle	une piastre.
Pour construire une butte à un angle dans le bois..............................	cinquante-centins.

25. Pour retracer une ligne effacée, au besoin, y placer des bornes, et fournir des plans et des notes d'opérations, l'entrepreneur recevra deux tiers du taux fixé pour la subdivision de townships, pourvu qu'il appartiendra à l'Arpenteur général de décider si le travail est nécessaire ou non.

26. Sur réception de son contrat d'arpentage de subdivision dûment exécuté, l'entrepreneur recevra une avance n'excédant pas mille piastres.

27. D'autres paiements jusqu'à soixante-quinze pour cent de la valeur de l'ouvrage fait pourront être faits à l'entrepreneur sur réception des comptes de progrès sur la formule H, accompagnés d'esquisses de l'arpentage.

28. Les présents règlements s'appliqueront aux arpentages faits pendant l'année 1893.

29. Nulle clause modificative d'un arrêté en conseil subséquent n'aura l'effet de canceller, abroger ou modifier aucune partie des présents règlements à moins qu'elle ne soit spécialement mentionnée.

E. DEVILLE,
Arpenteur général.

HOTEL DU GOUVERNEMENT À OTTAWA.

Jeudi, le 11e jour d'octobre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Il plaît à Son Excellence, en vertu des dispositions de l'article 45 de "l'Acte d'irrigation du Nord-Ouest," 57-58 Victoria, chapitre 30, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de prescrire les formules suivantes qui seront employées dans les procédures nécessaires pour mettre à exécution les dispositions du dit acte, et les dites formules sont prescrites en conséquence :—

1. Mémoire d'instructions pour guider les arpenteurs fédéraux employés à arpenter et dresser des relevés de droits de passage pour fossés d'irrigation et les travaux s'y rattachant.
2. Mémoire d'instructions concernant la préparation de plans, profils et devis, indiquant les travaux et structures faits par des compagnies ou des particuliers en vertu des dispositions de l'Acte d'irrigation du Nord-Ouest.
3. Une formule de licence à délivrer aux personnes qui demandent la permission de faire l'ouvrage préliminaire nécessaire en rapport avec la localisation des fossés qu'elles se proposent de faire.

JOHN J. McGEE,
Greffier du Conseil privé.

N° 1.

Mémoire d'instructions concernant la manière d'arpenter et de préparer les relevés d'arpentages de droit de passage pour fossés d'irrigation, et les travaux s'y rattachant.

Dans le but de prévenir la confusion ou les malentendus au sujet du mode de faire l'ouvrage sur le terrain et de pourvoir à l'uniformité dans les relevés d'arpentages de droit de passage pour fossés d'irrigation, et les travaux s'y rattachant, les instructions ci-dessous sont données pour la gouverne officielle de ceux qui exécutent ce genre d'ouvrage.

1. Les arpentages de droit de passage pour fossés d'irrigation sont de deux sortes : les études préliminaires et les arpentages définitifs. Les premières ont lieu dans le cas de localisations projetées jalonnées pour grands fossés et embranchements, afin de mettre les compagnies ou les particuliers en état de déposer les plans préliminaires requis par leurs actes constitutifs, ou l'Acte général d'irrigation, et les derniers, ou arpentages définitifs, sont faits lorsque les routes de fossés, etc., ont été finalement localisées et que les travaux sont commencés, afin que des plans définitifs et des livres de renvoi soient déposés, et qu'un titre au droit de passage soit transmis.

2. Les études préliminaires pour droit de passage doivent être faites de la manière prescrite par la clause 3 des présentes instructions, et le plan qui les montrent doit être signé par l'auteur, le gérant ou l'ingénieur de la compagnie, et certifié conformément à la formule C des présentes instructions.

Les arpentages définitifs pour droit de passage doivent être faits par un arpenteur fédéral dûment autorisé, et tous plans et livres de renvoi de ses arpentages doivent être signés par l'arpenteur, et contenir les certificats donnés aux formules A et B des présentes instructions.

Etudes préliminaires.

3. Les études préliminaires doivent être faites en retraçant la ligne centrale projetée des grands fossés et des fossés latéraux, et en fixant par le mesurage la position de ces lignes relativement aux bornes de sections, quarts de sections ou autres parcelles de terrain enregistrées qui sont coupées.

Là où l'on se propose de créer des réservoirs, ou d'inonder des terrains au moyen de digues, l'étendue approximative du terrain à inonder doit être déterminée.

Si, dans la localisation préliminaire d'un grand fossé, l'on a en vue l'utilisation des lits secs d'anciens cours d'eau ou autres canaux naturels, comme partie du réseau, la position et les bornes de ces cours d'eau ou autres canaux, devront être décrits avec assez d'exactitude pour qu'ils puissent être rapportés sur un plan.

Dans tous les cas où il est proposé d'augmenter la largeur du droit de passage, pour des fins de fosses d'emprunt, endiguements, constructions ou autres causes, les limites de cette augmentation devront être approximativement localisée et indiquée sur le plan.

Arpentages définitifs.

4. L'arpentage définitif du droit de passage doit être fait après la localisation finale du principal fossé et de ses embranchements, et avant ou durant les travaux de construction. L'arpentage doit être fait de manière à fixer exactement les bornes du droit de passage relativement aux bornes des sections, quarts de sections, et autres parcelles de terrain enregistrées. A cette fin il sera nécessaire de déterminer par mesurage la distance qu'il y a depuis le croisement de la ligne centrale du fossé jusqu'à tous les coins de sections, de quarts de section, ou autres parcelles de terrain enregistrées, et les angles entre ces bornes et la ligne centrale.

Quand la chose est nécessaire les bornes de quarts de section doivent d'abord être déterminées conformément aux dispositions de l'Acte des terres fédérales, de façon que les angles et les distances depuis la ligne du fossé puissent être convenablement déterminées d'après ces bornes.

Si l'on désire augmenter les limites du droit de passage pour des fosses d'emprunt, endiguements, constructions, etc., les limites de cette largeur supplémentaire seront fixées par arpentage régulier.

Si l'intention est d'utiliser les lits secs d'anciens cours d'eau, ou autres canaux naturels pour le principal fossé ou les embranchements, les bornes des cours d'eau, marais ou autre canal naturel seront déterminées au moyen d'ordonnées partant des lignes principales. Les lignes principales doivent être tracées de façon qu'aucune ordonnée ne soit plus longue que 300 pieds, et les ordonnées seront espacées de façon que l'étendue du terrain mesuré soit déterminée aussi approximativement que possible.

Si des réservoirs doivent être créés, ou du terrain inondé par la construction de digues, l'étendue et les limites de ces réservoirs, ou terrain inondé, seront exactement déterminées par des coordonnées, tel que prescrit plus haut.

Les longueurs et rayons de toutes courbes sur les lignes de fossé doivent être déterminés.

Relevés d'arpentages.

5. Dans le cas d'études préliminaires, les relevés consisteront d'un plan (sur de la toile à calquer, ou photographié) dressé à un échelle de 1,000 pieds au pouce. Ce plan doit contenir tous les renseignements fournis par l'arpentage fait en conformité des instructions concernant les études préliminaires, et doit être

certifié conformément à la formule C des présentes instructions.

Les relevés d'arpentages définitifs pour droit de passage, se composeront d'un plan, dressé dans tous les cas sur de la toile à calquer, et d'un livre de renvoi.

Le plan sera dressé à une échelle de 1,000 pieds au pouce, et devra contenir tous les renseignement fournis par les arpentages faits d'après les instructions concernant les arpentages définitifs, et devra de plus indiquer la largeur et l'étendue du droit de passage compris dans les limites de chaque quart de section, ou autre parcelle de terrain enregistrée ; les plans seront de bons échantillons de dessin, et tous les chiffres et renvois devront être clairs et distincts. Le plan sera certifié conformément aux formules A et B des présentes instructions.

Le livre de renvoi sera fait de la même grandeur et forme que le modèle qui accompagne les présentes instructions. Le droit de passage en travers de chaque quart de section, ou autre parcelle de terrain enregistrée, doit être exactement rapporté sur la forme, et tous les renseignements donnés sur le plan général doivent être indiqués sur les formes sectionnelle dans le livre de renvoi.

Les descriptions seront données séparément pour chaque quart de section ou autre parcelle de terrain enregistrée, et doivent être de telle forme, et assez complètes, pour servir dans un transfert du terrain décrit.

Dans tous les cas où il est fait des relèvements pour déterminer les limites d'anciens cours d'eau, ou de terrain à inonder, qui doivent faire partie du droit de passage, la forme sectionnelle dans le livre de renvoi doit être accompagnée d'un journal de latitude pour chaque section séparément, donnant les longueurs et les directions des cours et des ordonnées. Ce journal doit être conforme à la formule indiquée.

Le livre de renvoi doit contenir les certificats donnés aux formules A et B des présentes instructions.

6. Qu'il soit bien attendu que le gouvernement ne sera aucunement responsable du paiement de comptes pour services de l'arpenteur, ou toute autre dépense encourue relativement à ces arpentages, ou rapports d'arpentages ; c'est le devoir des compagnies d'irrigation, ou des particuliers construisant les fossés privés, de faire ces arpentages, et d'en déposer les rapports au département, à leurs frais.

Formule A.

Je arpenteur fédéral, déclare solennellement que ce plan (ou livre de renvoi, selon le cas) indique exactement la manière dont le terrain y inclus a été arpenté et subdivisé par moi, et que le dit plan est préparé en conformité des dispositions de "l'Acte de la propriété foncière dans les territoires," chapitre cinquante et un des Statuts Revisés du Canada.

Daté à 18 .

A. B.,
Arpenteur fédéral.

Formule B.

Je de de arpenteur fédéral, jure et dit que j'ai, en personne, suivant la loi et les instructions de l'Arpenteur général, fidèlement et exactement exécuté l'arpentage indiqué par ces plan et livre de renvoi, et que les dits plan et livre de renvoi sont exacts et vrais au meilleur de ma connaissance et croyance.

A.B.,
Arpenteur fédéral.

Assermenté devant moi à ce jour de 18 .

Formule C.

Je certifie par le présent que ce plan indique exactement la manière dont ont été faites les études préliminaires pour le droit de passage projeté, pour la Compagnie d'irrigation de et que les renseignements y contenus sont le résultat de mesurages actuels sur le terrain.

Daté à 18 .

A.B.,
Auteur, gérant, ou ingénieur, selon le cas.

N° 2.

MÉMOIRE d'instructions concernant la préparation des plans, profils et devis exigés par l'Acte d'irrigation du Nord-Ouest.

L'Acte d'irrigation du Nord-Ouest décrète que les compagnies ou particuliers demandant un permis ou une autorisation en vertu de ses dispositions, devront déposer certains plans, profils, coupes transversales et devis indiquant la localisation projetée des canaux ou fossés, et donnant des détails des travaux à faire.

L'acte est explicite au sujet de l'échelle de ces plans, profils, etc., et des renseignements qu'ils doivent fournir, mais afin de prévenir les malentendus et les délais, on a jugé utile de publier sous une forme facile à consulter, les présentes instructions concernant la manière de préparer les différents plans, profils, coupes transversales et devis qu'exige l'acte, et les renseignements qu'ils sont destinés à fournir.

Pour plus de facilité les articles ou parties d'articles sont donnés dans le même ordre quant aux cartes, plans, profils, etc., que dans l'acte, avec les instructions additionnelles nécessaires.

Art. 12, paragraphe 4.—" Il sera annexé au mémoire " une carte un un plan général, à une échelle de pas " moins d'un pouce au demi-mille, indiquant le territoire à desservir par cette eau, la situation de toutes " les rivières, cours d'eau et autres sources d'approvisionnement qui s'y trouveront et la localisation pro- " bable des travaux projetés, ainsi que la situation et " l'étendue de tous étangs, réservoirs ou bassins que l'on " se proposera de créer, afin d'amasser l'eau ou qui " pourront avoir cet effet."

Cette carte devrait être faite sur de la toile à calquer, les aspects topographiques généraux pourront être reproduits d'une récente édition de toute carte générale publiée par le Ministère de l'Intérieur.

La localisation projetée des canaux ou fossés devrait être indiquée par une grosse ligne, et la région du pays à desservir et les étendues des réservoirs, étangs ou bassins devraient être désignées par une teinte de différentes couleurs, avec renvois convenables.

La carte ou plan devrait être daté et signé par l'ingénieur, particulier, ou quelque employé de la compagnie, selon le cas.

Article 12, paragraphe 5.—" (5.) Il sera aussi déposé, " en même temps que le mémoire, des plans détaillés de " tous les ponts ou ponceaux nécessaires pour les tra- " verses de chemins ou de fermes, ou sous les travaux " de la compagnie, ainsi que des plans détaillés de tous " déversoirs, barrages, digues et autres constructions " pour le détournement ou l'usage des eaux, ces plans " devant être à une échelle de pas moins d'un pouce " par quatre pieds."

Les plans dont il est fait mention au susdit paragraphe devraient être faits sur de la toile à calquer : ils doivent être complets sous le rapport du plan, élévation et coupe transversale, donnant les détails des travaux projetés, et les matériaux qui doivent y entrer, de façon que toutes les pesanteurs, tensions ou pression puissent être compris et contrôlés.

Les plans devraient être accompagnés d'un devis détaillé concernant la manière d'ériger les travaux projetés, et le plan et la spécification devraient être signés par l'ingénieur, particulier ou quelque officier de la compagnie, selon le cas.

Article 12, paragraphe 6.—" (6.) Dans le cas de tous " fossés ou canaux charriant plus de vingt-cinq pieds " cubes d'eau par seconde, les requérants devront " fournir en sus des renseignements précédents, les " cartes ou plans qui suivent :—

" (*a*.) Une coupe longitudinale du fossé, montrant " le fond et la ligne d'eau de surface projetée. L'échelle " horizontale de ce plan n'aura pas moins d'un pouce " par quatre cents pieds, et l'échelle verticale pas moins " d'un pouce par vingt pieds.

" (*b*.) Un plan donnant des coupes transversales à " un nombre de points suffisant pour faire voir toutes " les différentes formes que prendra le fossé lorsqu'il " sera fait, particulièrement sur les flancs de coteaux " ou ailleurs que remplira quelque partie de l'eau à " transporter. Lorsque l'eau devra être conduite par " des tranchées, le plan montrera aussi des coupes trans- " versales aux endroits où la plus courte distance hori- " zontale d'un côté ou de l'autre du fond du fossé à la " surface du terrain sera moindre que le double de la "largeur du fond du fossé en cet endroit. Le plan "sera fait à une échelle horizontale et verticale d'un "pouce par vingt pieds."

Les plans mentionnés aux paragraphes précédents doivent être dressés sur de la toile à calquer. Le profil doit faire voir la donnée employée, et doit contenir des élévations à un assez grand nombre de points pour permettre de contrôler soigneusement la localisation proposée; la pente projetée du canal ou fossé doit être indiquée par une ligne nette et bien définie, et aussi par des chiffres le long de cette ligne de pente. La position de tous barrages, digues, déversoirs, ponts, traverses de chemin ou autres travaux doit être notée sur le profil. Les élévations données doivent provenir de niveaux à l'instrument pris le long de la localisation projetée, et un nombre suffisant de repères doivent être établis, et leur position et élévation indiquées sur le profil, de façon que les niveaux sur des parties de la localisation entre les repères puissent être contrôlés par l'officier inspecteur, s'il désire le faire.

Les coupes transversales exigées par le paragraphe (*b*) peuvent être rapportées sur le profil vis-à-vis les points où elles ont été prises; elles doivent être placées et rapportées de façon à permettre une prompte détermination du talus et de son contenu. On attire surtout l'attention aux dispositions de ce paragraphe au sujet du renseignement à donner aux coupes transversales où l'eau doit être conduite par une tranchée. La nature des matières à enlever à chaque coupe transversale doit être indiquée. Le profil doit être signé par l'ingénieur qui a fait l'étude de localisation et mesuré les coupes transversales.

Article 12, paragraphe 7.—"(7.) Des plans de toutes "digues, caissons ou coffrages, levées ou autres ouvrages projetés pour obstruer quelque rivière, cours "d'eau, lac ou autre source d'alimentation, ou pour "créer un étang, réservoir ou bassin quelque part, ou "qui pourront avoir cet effet, seront préparés à une "échelle longitudinale de pas moins d'un pouce par "cent pieds, et pour les coupes transversales à une "échelle de pas moins d'un pouce par vingt pieds, et "indiqueront quels matériaux l'on se proposera d'employer et comment ils le seront dans ces travaux. "Le bois, les fascines, la pierre, la brique et les autres "matériaux employés dans ces travaux seront indiqués en détail sur un plan dressé à une échelle de "pas moins d'un pouce par quatre pieds."

Les plans exigés par ce paragraphe doivent être préparés sur de la toile à calquer, et en les préparant l'on doit prendre grand soin de donner tel renseignement au moyen de plan, élévation et coupe transversale qui fera bien comprendre la dimension, le genre et la situation de tous travaux projetés, et permettra de soigneusement contrôler toutes les tensions, pesanteurs et pression, l'espèce de matériaux à employer et la manière de les placer doivent être clairement définies.

Il importe que la méthode proposée de placer les bases de tout barrage, caisson ou levée doit être donnée dans des dessins détaillés, et que ces dessins indiquent la ligne des hautes eaux sur ce barrage, caisson ou levée.

Lorsque des caissons ou piles doivent être construits dans une rivière ou cours d'eau, la méthode que l'on se propose d'adopter pour les protéger doit être indiquée.

Ces plans doivent être signés par l'ingénieur qui trace les travaux projetés, et doivent être accompagnés d'un devis général concernant la manière de les ériger.

Section 12, paragraphe 8.—"(8.) Des cartes ou "plans de coupes transversales montrant la surface du "terrain sous les étangs, réservoirs ou bassins, ainsi "que la ligne de surface des eaux qu'ils seront destinés "à contenir; l'échelle horizontale de ces cartes ou "plans ne sera pas de moins d'un pouce par cent "pieds, et l'échelle verticale de pas moins d'un pouce "par vingt pieds; et il sera indiqué un nombre suffisant de lignes de niveau pour permettre de calculer "exactement le contenu de chaque étang, réservoir ou "bassin. Si les cartes ou plans indiquent les niveaux "par des lignes de contour, elles seront dressées à une "échelle suffisamment grande pour que les lignes de "contour, montrant une distance verticale entre elles "de pas plus d'un pied, puissent être exactement tracées. Les cartes ou plans contiendront des renseignements suffisants pour faire voir distinctement "quelles propriétés seront affectées par la création de ces "étangs, réservoirs ou bassins, et la manière dont elles "seront affectées, et montreront en détail toutes autres "particularités que le ministre ou le Gouverneur en "conseil prescrira; et il sera aussi fourni un plan, dressé "à une échelle de pas moins d'un pouce par quatre "pieds, indiquant comment on se proposera de contrôler et tirer l'eau de ces étangs, réservoirs ou bassins."

Les cartes de coupes transversales que mentionne ce paragraphe doivent être préparées sur de la toile à calquer ou du papier à coupe transversale. Si l'étendue de l'étang, réservoir ou bassin projeté est indiquée par des coupes transversales, elles seront assez espacées pour permettre de contrôler soigneusement le contenu de l'étang, réservoir ou bassin, lequel doit être indiqué sur le plan en pieds cubes ou pieds-acre.

Si l'étang, réservoir ou bassin est indiqué par des lignes de contour, ces lignes seront clairement et distinctement définies, et la donnée employée distinctement énoncée.

Les renseignements au sujet de la propriété qui sera probablement affectée par la création de cet étang, réservoir ou bassin, et la manière dont elle sera affectée, pourront être donnés par des lignes de contour, ou par des élévations à un nombre suffisant de points pour indiquer quel serait le résultat si la digue qui retient l'eau dans cet étang, réservoir ou bassin, se rompait.

La dimension, le genre et les matériaux qui composent les portes, empellements, déversoirs ou autres inventions pour contrôler et tirer l'eau de cet étang, réservoir ou bassin doivent être donnés sur ce plan, avec élévations et coupes transversales convenables, et tout autre détail propre à faire voir l'adaptabilité et la sûreté de l'invention projetée.

Ces plans devront être signés par l'ingénieur qui trace les travaux projetés.

Article 13.—La manière de dresser les plans que doit signer un arpenteur fédéral, tel que voulu par cet article, est clairement expliquée dans le mémoire d'instructions concernant la préparation des relevés d'arpentage de droit de passage relatif à des entreprises d'irrigation dont on peut obtenir copie en s'adressant au ministère ou au bureau du Surintendant des mines à Calgary, Alberta.

Article 22. Les remarques qui précèdent s'appliquent ici.

Observations générales.

Tous les plans, cartes, profils, etc., doivent être d'assez bons échantillons de dessin, et tous les chiffres et renvois doivent être clairs et distincts.

Chaque carte ou plan devrait avoir un titre concis et lisible, et dans tous les cas l'échelle ou les échelles selon le cas, doivent être clairement données.

Dans les cas où, dans un mémoire ou pétition, il est renvoyé à des cartes ou plans, ces derniers devraient être distinctement marqués d'une lettre ou d'un numéro.

Là où il est projeté de construire un pont dans le but de porter une conduite d'eau de l'autre côté d'un cours d'eau ou d'un ravin, ou dans tout autre but en rapport avec des entreprises d'irrigation, le plan et les élévations de ce pont seront dressés de façon à bien faire voir la dimension et le genre des travaux projetés et la forme de toute ferme employée dans la construction de ce pont sera telle et sera indiquée de telle manière sur ce plan et cette élévation, que la tension sur chaque pièce puisse être calculée exactement.

Le plan doit être accompagné d'un devis généra donnant les dimensions et l'espèce de matériaux qu doivent être employés, la manière de les placer, et la pesanteur et la tension pour lesquelles la structure est destinée.

DEMANDES AU PARLEMENT.

RÈGLES *in re* AVIS DE BILLS PRIVÉS.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos "Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.
JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

SUBSTANCE DES RÈGLES ET FORMES DE PROCÉDER DU SÉNAT CONCERNANT LES BILLS DE DIVORCE.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

1. WALTON ISLAND LIGHT.

The first of these lights is located on the westernmost Walton Island, and is the front light of a pair to be known as the Snug Harbour Range.

2. SNUG HARBOUR LIGHT.

The second light is built on the south extremity of an island on the north side of the entrance to Snug Harbour, and is distant 3,100 feet E by N. ¼ N. (N. 69° 56' E. true) from the first described.

Lat. N. 45° 22' 27"

It is 50 feet in height from the ground to the vane on the lantern, and is painted white with a red stripe 3 feet wide on the middle of the side facing the channel.

The two lights in one lead in E. by N. ¼ N., south of Seguin Bank through the Main Channel to the intersection with the Jones Island Range.

3. Gordon Rock Light.

The third light is on the summit of the northernmost Gordon Rock, and is the front light of a pair of leading lights to be known as the Jones Island Range.

5. Hugh Rock Light.

The fifth light is located on the summit of Hugh Rock, at the junction of Albert Channel with the main channel.

Lat. N. 45° 19' 10"
Long. W. 80° 14' 31"

The light is fixed white, elevated 34 feet above the level of the bay, and should be visible 7 miles from all points of approach by water.

The illuminating apparatus is dioptric of the 7th order. The tower is a square pyramidal wooden building, surmounted by a wooden lantern. It is painted white, with a red stripe 3 feet wide on the west side.

Vessels entering Parry Sound will make the approach guided by Red Rock Light, as previously, until they bring the Snug Harbour Range Lights in one, when they will enter the main channel, keeping them in one E. by N. ¼ N. until the Jones Island range is brought into alignment. This alignment is then kept S.E. ¼ S. until within ¼ mile of Gordon Rock, when they should haul up E. by S. ¼ S., leaving Gordon Rock on the starboard hand. When on a line joining Gordon Rock and Hugh Rock they can bear up for Hugh Rock light and keep the course east until within ¾ mile of Hugh Rock light, when they again change the course to N.E. by E. ¼ E., to pass Cameron Island. After passing Cameron Island the entrance to Parry Sound is free from shoals.

A black buoy on 2½-fathom patch S.W. of Carling Rock.
A black buoy on extremity of reef off Bobs Point.
A red buoy on 1¾-fathom patch in the inner harbour.

The buoys shown on Admiralty Chart 1731 south of Carling Rock have been discontinued.

This notice affects Admiralty charts Nos. 327, 678 and 1731, the Georgian Bay and North Channel Pilot, chapter VIII, and the information respecting the lights should be entered in the Canadian List of Lights and Fog Signals under the Nos. 1035 to 1039.

II. LIGHT ON CHURCHVILLE POINT, MICH.

The Lighthouse Board of the United States of America has given notice that on the 1st instant a fixed white light, with two fixed red sectors, was established on Churchville Point, the east point of Sugar Island, St. Marys River, Michigan.

The light is shown, at a height of 30 feet above the water, from a lens lantern on a post rising from the middle of a square lamp house; the post will be natural colour and the house white.

The southerly red sector will cover the black spar buoy, No. 49, off Church Point crib, and mark the turning point to and from the channel between Squirrel Island and Church Point.

The northerly red sector will cut the southerly red sector of Manhattan Shoal light and mark the turn of channel midway in the bend. The white arc between the southerly and northerly red sectors is about 198°.

This notice affects Admiralty charts Nos. 324, 325 and 678.

NOTICE TO MARINERS.

No. 50 of 1894.

I. GALLOWS POINT BEACON LIGHT.

It is the intention of the Department to remove the fixed red light now attached to the framework beacon on the red platform buoy moored 1$\frac{2}{10}$ cables S.W. by S. from Gallows Point, Nanaimo Harbour, British Columbia, to a dolphin or pile beacon proposed to be erected in the vicinity of the present black buoy on the south side of the channel, immediately off Gallows Point. Mariners will require to ascertain whether the light is shown from the starboard or port side of the channel before entering.

Due notice of the completion of this change will be given.

II. PORT ETCHES AND APPROACHES, ALASKA.

The following information relating to Port Etches and approaches is derived from a report by Lieutenant J. B. Collins, of the United States SS. "Mohican," and is taken from United States Hydrographic Office Notice to Mariners No. 45 of 1894, which also contains a chart of Constantine Harbour, Port Etches.

Lat. N. 60° 21'
Long. W. 146 51

The approaches to Port Etches are clear of all danger. Cape Hinchinbrook and the shore as far as the southern point of entrance may be approached safely as near as a mile. The north shore is clear excepting the N.W. point of the island, where it is reported that a shoal or flat extends off to the northward, from a point one mile west of Point Johnstone, filling up the bight between that point and Hawkins Island.

Hinchinbrook Island is high and mountainous, covered with snow early in June. Cape Hinchinbrook is a gently sloping ridge descending to the sea, with a few breaks in the ridge and a small pinnacle close to the cape. Seen from the southward there are three capes, forming the western end of the island south of Port Etches, with corresponding small bights between the capes. The middle cape is a low jutting point. The northern cape is high and rounded.

Seal rocks consist of two bare blackish rocks connected by a very short reef, covered at high water and surrounded by a number of small rocks extending off about 300 yards. The main rocks cover a space about 300 yards long by 80 yards wide, and are about 40 feet high. When first seen from a distance they appear like a schooner under sail. From the rocks a reef makes out about 1 mile N.E. by N. (N. 61° E. *true.*) To the eastward and northward the rocks should be given a wide berth, at least 1½ miles, but on the western side they may be approached as close as ½ mile. There is no growing kelp visible near them.

Port Etches.—The village of Port Etches is located about where the Russian fort is indicated on British Admiralty chart No. 1737. The fort no longer exists. There are now three large frame buildings used by the Alaska Commercial Company as storehouses and residence for its agent. There are also about 15 small houses occupied by the natives. The population in June, 1894, was 62.

There are no supplies of any kind, but wood and water are plentiful.

Vessels may anchor on either shore at almost any point, according to the wheather, but the usual anchorage is with Phipps Point bearing W. ½ N. (N. 57° W. *true*), and large island in the bight N.N.W. ¾ W. (N. 3° 30' W. *true*). There is very little tidal current in the outer harbour, vessels usually riding head to wind.

Landing may be made at any place. The landing for the village is in Constantine Harbour in the bight near the village. The spit, extending from the fort to the north shore, is of shingle and about 35 feet high, grass grown. The natives state that about five years ago a tidal wave came over the spit at about the same time that Mt. Augustine, Cooks Inlet, was in action. The spit opposite Point Phipps is from 10 to 20 feet high, grass grown. The chief of the resident Indians and the storekeeper state that in severe gales there is a continuous breaker from the Porpoise Rocks to the Fort Point; also that there is good anchorage between Porpoise Rocks and the northeast shore. The variation of the compass June 18, 1894, was found to be 27° 24' E.

Prince William Sound.—Vessels bound into Cordova Bay usually, after clearing by ½ mile the northern point of entrance to Port Etches, stand N N.W. ⅜ W. (N. *true*), for the black bluff locally known as Knowles Head, at the southwestern extremity of the peninsula between Port Fidalgo and Port Gravina. When about 6 miles from that head they haul to N.E. by E. ⅝ E. (E. *true*), for the northern side of Cordova Bay, avoiding the Hawkins Island shore until well within the bay. If bound to Orca they usually pass between Hawkins Island and the islet off its eastern end and feel their way with the lead across the bay. Orca is in the bight just north of the lake which is north of Eyak Village. There are two canneries there, the only ones in Prince William Sound. Port Fidalgo is reported full of shoals. It is also reported that a flat or shoal covers the western part of the Sound from the island southwest of Port Fidalgo to the north point of Nowell Peninsula.

This notice affects Admiralty charts Nos. 1499 and 1737.

NOTICE TO MARINERS.

No. 48 of 1894.

CHANGE OF LIGHT AT KAGAWONG.

The temporary pole light, maintained at Kagawong, at the port of Mudge Bay, North Channel, on the north shore of Manitoulin Island, District of Algoma, Ontario, has been replaced by a light shown from an enclosed tower.

Lat. N. 45° 54' 31"
Long. W. 82° 15' 45"

The tower is built in the same location as the original mast, 75 feet back from the shore line, and 100 feet westward from the public wharf.

It is a square pyramidal wooden building, surmounted by a wooden lantern, and is 27 feet high from its base to the vane on the lantern. The tower is painted white, the lantern red.

The light is a fixed white catoptric light elevated 38 feet above the level of the bay. It should be visible 11 miles from all points of approach by water. It was first shown from the new tower on the 29th October, 1894.

This notice affects Admiralty charts Nos. 519, 678 and 908, Georgian Bay and North Channel Pilot, 1892, page 69, and Canadian List of Lights and Fog Signals No. 1070.

NOTICE TO MARINERS.

No. 49 of 1894.

I. BUOY OFF LOTTIE WOLF ROCK.

A red spar buoy was moored on the 27th August last, off Lottie Wolf Rock, off the north side of Hope Island, in the Georgian Bay.

Lat. N. 44° 55' 25"
Long. W. 80° 10' 28"

It is moored in 22 feet water and from it Hope Island lighthouse bears S.S.E. ¼ E., distant one nautical mile, and the shoal of 9 feet water S. by E. ½ E., distant 400 yards.

Vessels approaching the buoy from the westward must not bring it to bear anything to the northward of E. ¾ N. They may pass close to the buoy, but after passing it must not head anything to the southward of the north-east point of Beckwith Island, until past Hope Island light.

This notice affects Admiralty charts Nos. 327 and 678; the sheet chart from the Western Islands to Waubashene about to be issued under the No. 2102; and Georgian Bay and North Channel Pilot, chapter 9.

II. ROCK ISLAND LIGHT STATION, N.Y.

Notice is given by the Lighthouse Board of the United States of America, that the tower at Rock Island Light Station, on Rock Island, St. Lawrence River, in the State of New York, has been increased 5 feet in height, and the light is now visible above the roof of the keeper's dwelling in the direction of the dock at Thousand Island Park.

At the close of navigation this season the fixed white reflector light shown from the veranda of the Keeper's dwelling in the direction of the dock at Thousand Island Park will be permanently discontinued.

HOTEL DU GOUVERNEMENT À OTTAWA.

Vendredi, le 26e jour d'octobre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

QUE les règlements concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur, recommandés par le Ministre de l'Intérieur dans son Memo. du 30 juillet 1894, soient approuvés.

JOHN J. McGEE,
Greffier du Conseil privé.

—

RÈGLEMENTS concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur.

1. Pour des arpentages autres que des arpentages de subdivision de townships, le Ministre de l'Intérieur pourra employer des arpenteurs à un salaire quotidien ou mensuel.

2. Lorsque les services d'un arpenteur sont d'une nature temporaire, et pour pas plus d'un an, son salaire sera payé au taux de cinq piastres par jour pour les arpentages ordinaires, mais pour les arpentages de contour, de bloc et pour services exigeant des aptitudes spéciales, le taux sera de six piastres par jour.

3. Un arpenteur sera payé pour chaque jour de service sur le terrain, y compris les dimanches, et le nombre de jours sera calculé à compter du jour qu'il laisse son domicile jusqu'au jour de son retour, les deux jours inclusivement.

4. Pour le travail de bureau, à préparer ses rapports, un arpenteur comptera le temps réel occupé à leur préparation, mais ne devra pas dépasser le nombre de jours déclaré suffisant par l'Arpenteur général.

5. Lorsqu'un arpenteur a été employé continûment pendant un an et que l'emploi est continué pour une plus longue période son salaire après la première année n'excèdera pas cent vingt-cinq piastres par mois pour les arpentages ordinaires et cent cinquante piastres par mois pour arpentages spéciaux. Un arpenteur ainsi employé assistera au bureau dans le Ministère à Ottawa lorsqu'il n'est pas engagé au dehors, et sera soumis aux règles et règlements concernant les employés temporaires. Pour les fins de la présente clause, l'emploi au taux de dix mois dans une même année, ou au même taux pour de plus courtes périodes, sera réputé être continu.

6. L'arrêté en conseil du 20 octobre 1892, concernant les congés aux employés temporaires, s'appliquera aux arpenteurs employés au mois sous la clause qui précède.

7. Si un arpenteur employé à un salaire quotidien ou mensuel, ou un membre de son parti, subit un accident pendant qu'il est engagé à l'arpentage, le Ministre pourra payer à l'arpenteur ou individu blessé, tant qu'il sera incapable de travailler, telle partie de son salaire et de ses frais de médecin qu'il jugera à propos.

8. Il sera alloué à l'arpenteur le coût réel de l'engagement des hommes, pourvu que leur nombre et le taux de paie n'excèdent pas ce qui est permis par ses instructions.

9. L'arpenteur aura droit pour lui-même et chaque homme de son parti, à une allocation pour rations de cinquante centins par jour tant qu'il sera sur le terrain.

10. Pour son transport et celui de son parti, et diverses dépenses (non compris les repas, pension, frais d'hôtellerie, effets de campement et papeterie), il sera alloué à l'arpenteur les dépenses réelles appuyées de pièces justificatives, pourvu qu'elles n'excèdent pas ce qui est permis par ses instructions.

11. En sus de l'allocation pour rations il sera alloué à l'arpenteur pour repas, pension et frais d'hôtellerie pour lui-même et son parti lorsque sur le terrain une somme de vingt-huit centins par jour pour lui-même et quatre centins par jour pour chaque autre membre du parti.

12. Les effets de campement appartiendront à l'arpenteur et seront fournis par lui. Pour leur usage, il lui sera alloué, tant qu'il sera sur le terrain vingt-deux centins par jour pour lui-même, et six centins par jour pour chaque autre membre du parti.

13. Un arpenteur employé à la journée recevra une allocation de dix piastres pour papeterie et une piastre par jour lorsqu'il sera au bureau à préparer ses rapports.

14. L'arpenteur possèdera et fournira les instruments requis dans la pratique ordinaire de sa profession. Ceux qui sont continûment employés seront pourvus de chaînes et leurs instruments seront réparés au besoin par le Ministère, pourvu qu'il appartiendra à l'Arpenteur général de décider si un instrument peut être réparé, ou si l'arpenteur doit en acheter un neuf.

15. Dans les cas spéciaux, alors que le Ministre croit que quelques-uns des règlements concernant les rations, pension, effets de campement et la papeterie ne peuvent s'appliquer, il pourra allouer à l'arpenteur ses dépenses réelles appuyées de pièces justificatives.

16. L'arpenteur recevra avec ses instructions, telle avance sur son compte d'arpentage que le Ministre

prescrira. D'autres avances subséquentes seront faites sur reçu d'un état certifié par l'arpenteur en la forme G. indiquant en détail les paiements faits à même les premières avances, et ceux qui seront faits à même la somme demandée.

17. La moitié du salaire des arpenteurs à la journée sera retenue jusqu'à ce que leurs comptes soient définitivement clos.

18. Les comptes d'arpenteurs seront faits en double, et se composeront :—

1. Compte de service personnel, formule A.
2. Bordereau de paie, formule B.
3. Transport, formule C.
4. Divers, formule D.
5. Comment il a été disposé de l'équipement, formule E.
6. Bilan, formule F.

Un journal de l'emploi de chaque jour sur le terrain sera fourni.

19. L'arpenteur fera la déclaration statutaire suivante au sujet de ses comptes :—

Je, A.B., arpenteur fédéral, déclare solennellement que le présent compte est exact, et je fais cette déclaration solennelle, la croyant consciencieusement vraie, et sachant qu'elle a la même force et le même effet que si elle était faite sous serment, sous l'empire de l'Acte de la preuve en Canada, 1893.

Déclaré par-devant moi à

ce jour de A.D. 189 .

20. Le taux de contrat à payer pour la subdivision d'un township sera calculé suivant la nature du pays tel que démontré par l'arpentage des contours de township, et sur les bases suivantes :—

Première classe.—Tout terrain non classifié comme de deuxième ou troisième classe—Sept piastres par mille.

Deuxième classe.—Peupliers et autres bois tendres, alternant avec la prairie—Onze piastres par mille.

Troisième classe.—Bois continus, épaisses broussailles, vents chablis, épais saules—Dix-huit piastres par mille.

21. Lorsque l'arpentage des contours de townships ne sont pas suffisamment complets pour calculer le taux avant de passer le contrat pour la subdivision, l'arpenteur sera payé aux taux de la première, deuxième et troisième classes, dans la proportion de chaque classe portée sur son carnet d'opérations.

22. Les lignes de relèvements seront payées aux taux uniformes de neuf piastres par mille à l'est du quatrième méridien, et de dix piastres par mille à l'ouest de ce méridien.

23. Les taux mentionnés aux clauses 21, 22 et 23 seront réduits de dix pour cent pour les contrats d'arpentage de subdivision se montant à cinq mille piastres ou à peu près.

24. En sus des susdits taux un entrepreneur d'arpentages recevra :—

Pour chaque déclaration statutaire d'occupation par un colon	une piastre.
Pour renouveler une borne à un angle où le contrat de l'arpentage stipule qu'il doit finir..........................	cinquante-centins.
Pour renouveler une borne à tout autre angle	une piastre.
Pour construire une butte à un angle dans le bois................................	cinquante-centins.

25. Pour retracer une ligne effacée, au besoin, y placer des bornes, et fournir des plans et des notes d'opérations, l'entrepreneur recevra deux tiers du taux fixé pour la subdivision de townships, pourvu qu'il appartiendra à l'Arpenteur général de décider si le travail est nécessaire ou non.

26. Sur réception de son contrat d'arpentage de subdivision dûment exécuté, l'entrepreneur recevra une avance n'excédant pas mille piastres.

27. D'autres paiements jusqu'à soixante-quinze pour cent de la valeur de l'ouvrage fait pourront être faits à l'entrepreneur sur réception des comptes de progrès sur la formule H, accompagnés d'esquisses de l'arpentage.

28. Les présents règlements s'appliqueront aux arpentages faits pendant l'année 1893.

29. Nulle clause modificative d'un arrêté en conseil subséquent n'aura l'effet de canceller, abroger ou modifier aucune partie des présents règlements à moins qu'elle ne soit spécialement mentionnée.

E. DEVILLE,
20-4 Arpenteur général.

DEMANDES AU PARLEMENT.

RÈGLES *in re* AVIS DE BILLS PRIVÉS.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos " Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.
JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés:"

JOHN GEORGE BOURINOT,
Greffier des Communes.

SUBSTANCE DES RÈGLES ET FORMES DE PROCÉDER DU SÉNAT CONCERNANT LES BILLS DE DIVORCE.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

II. ROCK ISLAND LIGHT STATION, N.Y.

Notice is given by the Lighthouse Board of the United States of America, that the tower at Rock Island Light Station, on Rock Island, St. Lawrence River, in the State of New York, has been increased 5 feet in height, and the light is now visible above the roof of the keeper's dwelling in the direction of the dock at Thousand Island Park.

At the close of navigation this season the fixed white reflector light shown from the veranda of the Keeper's dwelling in the direction of the dock at Thousand Island Park will be permanently discontinued.

NOTICE TO MARINERS.

No. 50 of 1894.

I. GALLOWS POINT BEACON LIGHT.

It is the intention of the Department to remove the fixed red light now attached to the framework beacon on the red platform buoy moored $1\frac{2}{10}$ cables S.W. by S. from Gallows Point, Nanaimo Harbour, British Columbia, to a dolphin or pile beacon proposed to be erected in the vicinity of the present black buoy on the south side of the channel, immediately off Gallows Point. Mariners will require to ascertain whether the light is shown from the starboard or port side of the channel before entering.

Due notice of the completion of this change will be given.

II. PORT ETCHES AND APPROACHES, ALASKA.

The following information relating to Port Etches and approaches is derived from a report by Lieutenant J. B. Collins, of the United States SS. "Mohican," and is taken from United States Hydrographic Office Notice to Mariners No. 45 of 1894, which also contains a chart of Constantine Harbour, Port Etches.

Lat. N. 60° 21'
Long. W. 146 51

The approaches to Port Etches are clear of all danger. Cape Hinchinbrook and the shore as far as the southern point of entrance may be approached safely as near as a mile. The north shore is clear excepting the N.W. point of the island, where it is reported that a shoal or flat extends off to the northward, from a point one mile west of Point Johnstone, filling up the bight between that point and Hawkins Island.

Hinchinbrook Island is high and mountainous, covered with snow early in June. Cape Hinchinbrook is a gently sloping ridge descending to the sea, with a few breaks in the ridge and a small pinnacle close to the cape. Seen from the southward there are three capes, forming the western end of the island south of Port Etches, with corresponding small bights between the capes. The middle cape is a low jutting point. The northern cape is high and rounded.

Seal rocks consist of two bare blackish rocks connected by a very short reef, covered at high water and surrounded by a number of small rocks extending off about 300 yards. The main rocks cover a space about 300 yards long by 80 yards wide, and are about 40 feet high. When first seen from a distance they appear like a schooner under sail. From the rocks a reef makes out about 1 mile N.E. by N. (N. 61° E. *true.*) To the eastward and northward the rocks should be given a wide berth, at least 1½ miles, but on the western side they may be approached as close as ½ mile. There is no growing kelp visible near them.

Port Etches.—The village of Port Etches is located about where the Russian fort is indicated on British Admiralty chart No. 1737. The fort no longer exists. There are now three large frame buildings used by the Alaska Commercial Company as storehouses and residence for its agent. There are also about 15 small houses occupied by the natives. The population in June, 1894, was 62.

There are no supplies of any kind, but wood and water are plentiful.

Vessels may anchor on either shore at almost any point, according to the wheather, but the usual anchorage is with Phipps Point bearing W. ½ N. (N. 57° W. *true*), and large island in the bight N.N.W. ¾ W. (N. 3° 30' W. *true*). There is very little tidal current in the outer harbour, vessels usually riding head to wind.

Landing may be made at any place. The landing for the village is in Constantine Harbour in the bight near the village. The spit, extending from the fort to the north shore, is of shingle and about 35 feet high, grass grown. The natives state that about five years ago a tidal wave came over the spit at about the same time that Mt. Augustine, Cooks Inlet, was in action. The spit opposite Point Phipps is from 10 to 20 feet high, grass grown. The chief of the resident Indians and the storekeeper state that in severe gales there is a continuous breaker from the Porpoise Rocks to the Fort Point; also that there is good anchorage between Porpoise Rocks and the northeast shore. The variation of the compass June 18, 1894, was found to be 27° 24' E.

Prince William Sound.—Vessels bound into Cordova Bay usually, after clearing by ½ mile the northern point of entrance to Port Etches, stand N N.W. ⅜ W. (N. *true*), for the black bluff locally known as Knowles Head, at the southwestern extremity of the peninsula between Port Fidalgo and Port Gravina. When about 6 miles from that head they haul to N.E. by E. ⅝ E. (E. *true*), for the northern side of Cordova Bay, avoiding the Hawkins Island shore until well within the bay. If bound to Orca they usually pass between Hawkins Island and the islet off its eastern end and feel their way with the lead across the bay. Orca is in the bight just north of the lake which is north of Eyak Village. There are two canneries there, the only ones in Prince William Sound. Port Fidalgo is reported full of shoals. It is also reported that a flat or shoal covers the western part of the Sound from the island southwest of Port Fidalgo to the north point of Nowell Peninsula.

This notice affects Admiralty charts Nos. 1499 and 1737.

2. Quiconque reçoit dans sa maison un enfant de toute autre personne, entre les âges susdits, lequel enfant demeure avec lui, ou sous ses soins ou a son emploi, sera censé par ce fait être chargé du même devoir au sujet de l'éducation de cet enfant pendant cette résidence qu'un parent, et sera passible d'être poursuivi comme dans le cas d'un parent s'il néglige de faire instruire cet enfant au même degré qu'un parent est obligé de le faire par les présents règlements ; mais le devoir du parent en vertu des présents règlements ne sera pas par là affecté ou amoindri, et continuera en pleine force.

3. Nul parent, tuteur ou autre personne ne sera assujéti à aucune des peines établies par les présents règlements au sujet de cet enfant.

5. Les agents des Sauvages pourront nommer une ou plusieurs personnes pour agir en qualité de préposés à l'assiduité sur chaque réserve pour la mise à exécution des présents règlements, et ces préposés à l'assiduité seront, pour les fins des présents règlements revêtus des pouvoirs de constables, et rempliront tels services que les agents des Sauvages qui les auront nommés jugeront nécessaires pour l'exécution des présents règlements.

6. Il sera du devoir des préposés à l'assiduité nommés en vertu des présents règlements d'examiner tous les cas d'absence de l'école qui pourront leur être soumis, d'avertir le parent, le tuteur ou autre personne ayant la charge ou le contrôle de tout enfant âgé de sept à seize ans lorsque cet enfant n'assiste pas à l'école, et d'exiger que ce parent, tuteur ou autre personne envoie cet enfant à quelque école, sous les trois jours.

7. Si le parent, tuteur ou autre personne ayant la charge légale ou le contrôle d'un enfant, néglige ou refuse de faire assister cet enfant à une école, après avoir été requis de le faire comme susdit (à moins que cet enfant n'ait été exempté d'y assister comme susdit) le préposé à l'assiduité déposera ou fera déposer une plainte contre ce parent, tuteur ou autre personne, par-devant un juge de paix ayant juridiction dans le comté ou district dans lequel l'offense est commise, ou par-devant l'agent des Sauvages de la

localité ; et sur conviction de tel refus ou négligence, ce parent, tuteur ou autre personne encourra une amende de pas moins de deux piastres, ou un emprisonnement pour une période n'excédant pas dix jours, ou les deux.

HOTEL DU GOUVERNEMENT À OTTAWA.

Vendredi, le 26e jour d'octobre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

QUE les règlements concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur, recommandés par le Ministre de l'Intérieur dans son Memo. du 30 juillet 1894, soient approuvés.

JOHN J. McGEE,
Greffier du Conseil privé.

—

RÈGLEMENTS concernant l'emploi d'arpenteurs par le Ministère de l'Intérieur.

1. Pour des arpentages autres que des arpentages de subdivision de townships, le Ministre de l'Intérieur pourra employer des arpenteurs à un salaire quotidien ou mensuel.

2. Lorsque les services d'un arpenteur sont d'une nature temporaire, et pour pas plus d'un an, son salaire sera payé au taux de cinq piastres par jour pour les arpentages ordinaires, mais pour les arpentages de contour, de bloc et pour services exigeant des aptitudes spéciales, le taux sera de six piastres par jour.

3. Un arpenteur sera payé pour chaque jour de service sur le terrain, y compris les dimanches, et le nombre de jours sera calculé à compter du jour qu'il laisse son domicile jusqu'au jour de son retour, les deux jours inclusivement.

4. Pour le travail de bureau, à préparer ses rapports, un arpenteur comptera le temps réel occupé à leur préparation, mais ne devra pas dépasser le nombre de jours déclaré suffisant par l'Arpenteur général.

5. Lorsqu'un arpenteur a été employé continûment pendant un an et que l'emploi est continué pour une plus longue période son salaire après la première année n'excèdera pas cent vingt-cinq piastres par mois pour les arpentages ordinaires et cent cinquante piastres par mois pour arpentages spéciaux. Un arpenteur ainsi employé assistera au bureau dans le Ministère à Ottawa lorsqu'il n'est pas engagé au dehors, et sera soumis aux règles et règlements concernant les employés temporaires. Pour les fins de la présente clause, l'emploi au taux de dix mois dans une même année, ou au même taux pour de plus courtes périodes, sera réputé être continu.

6. L'arrêté en conseil du 20 octobre 1892, concernant les congés aux employés temporaires, s'appliquera aux arpenteurs employés au mois sous la clause qui précède.

7. Si un arpenteur employé à un salaire quotidien ou mensuel, ou un membre de son parti, subit un accident pendant qu'il est engagé à l'arpentage, le Ministre pourra payer à l'arpenteur ou individu blessé, tant qu'il sera incapable de travailler, telle partie de son salaire et de ses frais de médecin qu'il jugera à propos.

8. Il sera alloué à l'arpenteur le coût réel de l'engagement des hommes, pourvu que leur nombre et le taux de paie n'excèdent pas ce qui est permis par ses instructions.

9. L'arpenteur aura droit pour lui-même et chaque homme de son parti, à une allocation pour rations de cinquante centins par jour tant qu'il sera sur le terrain.

10. Pour son transport et celui de son parti, et diverses dépenses (non compris les repas, pension, frais d'hôtellerie, effets de campement et papeterie), il sera alloué à l'arpenteur les dépenses réelles appuyées de pièces justificatives, pourvu qu'elles n'excèdent pas ce qui est permis par ses instructions.

11. En sus de l'allocation pour rations il sera alloué à l'arpenteur pour repas, pension et frais d'hôtellerie pour lui-même et son parti lorsque sur le terrain une somme de vingt-huit centins par jour pour lui-même et quatre centins par jour pour chaque autre membre du parti.

12. Les effets de campement appartiendront à l'arpenteur et seront fournis par lui. Pour leur usage, il lui sera alloué, tant qu'il sera sur le terrain vingt-deux centins par jour pour lui-même, et six centins par jour pour chaque autre membre du parti.

13. Un arpenteur employé à la journée recevra une allocation de dix piastres pour papeterie et une piastre par jour lorsqu'il sera au bureau à préparer ses rapports.

14. L'arpenteur possèdera et fournira les instruments requis dans la pratique ordinaire de sa profession. Ceux qui sont continûment employés seront pourvus de chaînes et leurs instruments seront réparés au besoin par le Ministère, pourvu qu'il appartiendra à l'Arpenteur général de décider si un instrument peut être réparé, ou si l'arpenteur doit en acheter un neuf.

15. Dans les cas spéciaux, alors que le Ministre croit que quelques-uns des règlements concernant les rations, pension, effets de campement et la papeterie ne peuvent s'appliquer, il pourra allouer à l'arpenteur ses dépenses réelles appuyées de pièces justificatives.

16. L'arpenteur recevra avec ses instructions, telle avance sur son compte d'arpentage que le Ministre prescrira. D'autres avances subséquentes seront faites sur reçu d'un état certifié par l'arpenteur en la forme G. indiquant en détail les paiements faits à même les premières avances, et ceux qui seront faits à même la somme demandée.

17. La moitié du salaire des arpenteurs à la journée sera retenue jusqu'à ce que leurs comptes soient définitivement clos.

18. Les comptes d'arpenteurs seront faits en double, et se composeront :—

1. Compte de service personnel, formule A.
2. Bordereau de paie, formule B.
3. Transport, formule C.
4. Divers, formule D.
5. Comment il a été disposé de l'équipement, formule E.
6. Bilan, formule F.

Un journal de l'emploi de chaque jour sur le terrain sera fourni.

19. L'arpenteur fera la déclaration statutaire suivante au sujet de ses comptes :—

Je, A.B., arpenteur fédéral, déclare solennellement que le présent compte est exact, et je fais cette déclaration solennelle, la croyant consciencieusement vraie, et sachant qu'elle a la même force et le même effet que si elle était faite sous serment, sous l'empire de l'Acte de la preuve en Canada, 1893.

Déclaré par-devant moi à

ce jour de A.D. 189 .

20. Le taux de contrat à payer pour la subdivision d'un township sera calculé suivant la nature du pays tel que démontré par l'arpentage des contours de township, et sur les bases suivantes :—

Première classe.—Tout terrain non classifié comme de deuxième ou troisième classe—Sept piastres par mille.

Deuxième classe.—Peupliers et autres bois tendres, alternant avec la prairie—Onze piastres par mille.

Troisième classe.—Bois continus, épaisses broussailles, vents chablis, épais saules—Dix-huit piastres par mille.

21. Lorsque l'arpentage des contours de townships ne sont pas suffisamment complets pour calculer le taux avant de passer le contrat pour la subdivision, l'arpenteur sera payé aux taux de la première, deuxième et troisième classes, dans la proportion de chaque classe portée sur son carnet d'opérations.

22. Les lignes de relèvements seront payées aux taux uniformes de neuf piastres par mille à l'est du quatrième méridien, et de dix piastres par mille à l'ouest de ce méridien.

23. Les taux mentionnés aux clauses 21, 22 et 23 seront réduits de dix pour cent pour les contrats d'arpentage de subdivision se montant à cinq mille piastres ou à peu près.

24. En sus des susdits taux un entrepreneur d'arpentages recevra :—

Pour chaque déclaration statutaire d'occupation par un colon	une piastre.
Pour renouveler une borne à un angle où le contrat de l'arpentage stipule qu'il doit finir..........................	cinquante-centins.
Pour renouveler une borne à tout autre angle	une piastre.
Pour construire une butte à un angle dans le bois..............................	cinquante-centins.

25. Pour retracer une ligne effacée, au besoin, y placer des bornes, et fournir des plans et des notes d'opérations, l'entrepreneur recevra deux tiers du taux fixé pour la subdivision de townships, pourvu qu'il appartiendra à l'Arpenteur général de décider si le travail est nécessaire ou non.

26. Sur réception de son contrat d'arpentage de subdivision dûment exécuté, l'entrepreneur recevra une avance n'excédant pas mille piastres.

27. D'autres paiements jusqu'à soixante-quinze pour cent de la valeur de l'ouvrage fait pourront être faits à l'entrepreneur sur réception des comptes de progrès sur la formule H, accompagnés d'esquisses de l'arpentage.

28. Les présents règlements s'appliqueront aux arpentages faits pendant l'année 1893.

29. Nulle clause modificative d'un arrêté en conseil subséquent n'aura l'effet de canceller, abroger ou modifier aucune partie des présents règlements à moins qu'elle ne soit spécialement mentionnée.

E. DEVILLE,
20–4 Arpenteur général.

DEMANDES AU PARLEMENT.

RÈGLES *in re* AVIS DE BILLS PRIVÉS.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos "Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.
JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

SUBSTANCE DES RÈGLES ET FORMES DE PROCÉDER DU SÉNAT CONCERNANT LES BILLS DE DIVORCE.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.

NOTICE TO MARINERS.

No. 51 of 1894.

I. CHANGE IN EDDY POINT LIGHT.

A new lighthouse tower has been erected on the eastern side of the old light building at Eddy Point, or Sand Point, south entrance to Gut of Canso, Guysboro County, Nova Scotia.

Lat. N. 45° 31' 30"
Long. W. 61° 14' 40"

On the 1st January, 1895, the two fixed white horizontal lights hitherto shown from the windows in each end of the old building will be discontinued, and a single fixed white light will be exhibited from the lantern of the new tower. This light will be elevated 55 feet above high water mark, and should be visible 12 miles from all points of approach seaward. The illuminating apparatus is dioptric, of the 5th order.

The tower is a square wooden, pyramidal, building, painted white, surmounted by an iron lantern painted red. Its height, from its base to the vane on the lantern, is 44 feet. It is connected to the old building, which will be continued in use as a dwelling house for the keeper.

This notice affects Admiralty charts Nos. 1651, 2342, 2516, 2666, 2727 and 2756, and Canadian List of Lights and Fog Signals No. 240.

II. GILLIS POINT LIGHT.

A lighthouse erected by the Government of Canada on Gillis Point, on the western side of the entrance to Boulaceet Harbour, on the northern side of Little Bras d'Or Lake, in the County of Victoria, Cape Breton, will be put in operation on the 1st January next.

Lat. N. 46° 1' 32"
Long. W. 60° 46' 18"

The light will be fixed white, elevated 74 feet above high water mark, and should be visible 14 miles from all points of approach by water. The illuminating apparatus is dioptric of the 7th order.

The light building, which is of wood, stands about 300 feet westerly from the extremity of the point, and consists of a square, pyramidal tower, with a small dwelling for the keeper attached. It is painted white, and the tower is surmounted by an iron lantern painted red. The height of the tower from its base to the vane on the lantern is 38 feet.

The light is intended to guide vessels into Boulaceet Harbour, and as an aid in navigating Little Bras d'Or Lake.

This notice affects Admiralty charts Nos. 2516, 2666, 2687 and 2727, and the substance of it should be entered in the Canadian List of Lights and Fog Signals under the No. 285.

III. DISCONTINUANCE OF GRAND NARROWS LIGHT.

From and after the 1st January, 1895, the light heretofore maintained on Uniacke Point, on the north side of Barra Strait or Grand Narrows, between Great and Little Bras d'Or Lakes, Cape Breton, will be permanently discontinued.

Lat. N. 45° 58' 0"
Long. W. 60° 48' 0"

This light will no longer be required in consequence of the establishment of the light on Gillis Point above described, and in consequence of the maintenance of the lights on the swing of the railway bridge crossing Grand Narrows.

This notice affects Admiralty charts Nos. 2516, 2666, 2687 and 2727, and Canadian List of Lights and Fog Signals No. 286.

IV. IMPROVEMENT OF LIGHTS AT EASTERN HARBOUR, CHETICAMP.

The range lights in Eastern Harbour, Cheticamp, have been improved by removing the two masts with sheds at their bases, on which lanterns were hoisted, and erecting in their place enclosed towers. The tower in each case is a square pyramidal wooden building, painted white, surmounted by a square wooden lantern painted red.

The front range tower is 30 feet high from its base to the vane on the lantern.

Lat. N. 46° 38' 15"
Long. W. 61° 0' 25"

The light shown from it will be a fixed red catoptric light, elevated 45 feet above high water mark, and should be visible 8 miles in, and over a small arc on each side of, the line of range.

The back tower, which stands 990 feet S. by W. ¾ W. from the front one, is 38 feet high. From it will be shown a fixed white catoptric light, elevated 62 feet above high water mark. It should be visible 13 miles in, and over a small arc on each side of, the line of range.

This notice affects Admiralty charts Nos. 2034, 2516, 2666 and 2727, and Canadian List of Lights and Fog Signals Nos. 310 and 311.

HOTEL DU GOUVERNEMENT À OTTAWA.

Samedi, le 10e jour de novembre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

IL plaît à Son Excellence, en vertu des pouvoirs qui lui sont conférés par les articles 137 et 138 qui sont ajoutés à l'Acte des Sauvages par l'article onze du chapitre 32 des actes 57-58 Victoria, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de faire des règlements suivants :—

1. Tous enfants Sauvages âgés de sept à seize ans devront assister à une école de jour sur la réserve où ils résident pendant tout le temps que l'école est ouverte, à moins d'en être exemptée pour les raisons spécifiées ci-après.

2. Quiconque reçoit dans sa maison un enfant de toute autre personne, entre les âges susdits, lequel enfant demeure avec lui, ou sous ses soins ou a son emploi, sera censé par ce fait être chargé du même devoir au sujet de l'éducation de cet enfant pendant cette résidence qu'un parent, et sera passible d'être poursuivi comme dans le cas d'un parent s'il néglige de faire instruire cet enfant au même degré qu'un parent est obligé de le faire par les présents règlements ; mais le devoir du parent en vertu des présents règlements ne sera pas par là affecté ou amoindri, et continuera en pleine force.

3. Nul parent, tuteur ou autre personne ne sera assujéti à aucune des peines établies par les présents règlements au sujet de cet enfant.

(1.) Si l'enfant reçoit une instruction efficace ;
(2.) Si l'enfant est incapable d'assister à l'école à raison de maladie ou autre cause inévitable ;

(4.) Si l'enfant a été exempté, tel que prévu ci-après, d'assister à l'école ;
(5.) Si l'enfant a passé l'examen pour les lycées.

4. Si un agent des Sauvages, ou un instituteur autorisé par cet agent à émettre le certificat mentionné plus loin, croit que les services de cet enfant sont nécessaires aux travaux de la terre, ou à des devoirs urgents et nécessaires du ménage, ou à l'entretien nécessaire de cet enfant, ou de quelque personne à la charge de cet enfant, cet agent des Sauvages ou instituteur pourra, au moyen d'un certificat énonçant les raisons à l'appui, relever cet enfant d'assister à l'école pour une période n'excédant pas deux semaines, pendant chacun des quatre termes ou trimestres scolaires.

5. Les agents des Sauvages pourront nommer une ou plusieurs personnes pour agir en qualité de préposés à l'assiduité sur chaque réserve pour la mise à exécution des présents règlements, et ces préposés à l'assiduité seront, pour les fins des présents règlements revêtus des pouvoirs de constables, et rempliront tels services que les agents des Sauvages qui les auront nommés jugeront nécessaires pour l'exécution des présents règlements.

6. Il sera du devoir des préposés à l'assiduité nommés en vertu des présents règlements d'examiner tous les cas d'absence de l'école qui pourront leur être soumis, d'avertir le parent, le tuteur ou autre personne ayant la charge ou le contrôle de tout enfant âgé de sept à seize ans lorsque cet enfant n'assiste pas à l'école, et d'exiger que ce parent, tuteur ou autre personne envoie cet enfant à quelque école, sous les trois jours.

7. Si le parent, tuteur ou autre personne ayant la charge légale ou le contrôle d'un enfant, néglige ou refuse de faire assister cet enfant à une école, après avoir été requis de le faire comme susdit (à moins que cet enfant n'ait été exempté d'y assister comme susdit) le préposé à l'assiduité déposera ou fera déposer une plainte contre ce parent, tuteur ou autre personne, par-devant un juge de paix ayant juridiction dans le comté ou district dans lequel l'offense est commise, ou par-devant l'agent des Sauvages de la

localité ; et sur conviction de tel refus ou négligence, ce parent, tuteur ou autre personne encourra une amende de pas moins de deux piastres, ou un emprisonnement pour une période n'excédant pas dix jours, ou les deux.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos " Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.
JOHN GEORGE BOURINOT,
Greffier des Communes.

RÈGLES ADDITIONNELLES DE LA CHAMBRE DES COMMUNES CONCERNANT LES BILLS PRIVÉS.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

ORDRE SPÉCIAL DE LA CHAMBRE DES COMMUNES.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

SUBSTANCE DES RÈGLES ET FORMES DE PROCÉDER DU SÉNAT CONCERNANT LES BILLS DE DIVORCE.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. NOTICE TO MARINERS.

No. 52 of 1894.

I. DURATION OF BUOYAGE SEASON IN CANADA.

Buoys in the Dominion of Canada as a rule are maintained in position during the season of navigation. In districts where the lights are maintained in operation throughout the year the buoys are kept in position all the year round; in districts where navigation is closed in winter, buoys are kept out in the autumn until the last vessels have cleared, or as late as the ice will allow, with due regard to their safety; and replaced in spring as soon as the state of the ice will admit of their being placed in position.

All the can buoys in the River St. Lawrence below Quebec are removed after the 14th November; all the gas buoys in the same river are set out as soon as possible after the 11th May each spring, and taken up as soon as convenient after the 10th November each autumn.

II. WINTER BUOYS IN THE RIVER ST. LAWRENCE.

The following buoys in this district, when removed for winter, are replaced by large wooden spar buoys, each topped by an evergreen bush to make it more conspicuous:—

Barret Ledge Gas Buoy.
Pilgrims Shoal Gas Buoy.
St. Roch Wooden Can Buoy.
Middle Ground Gas Buoy.
Channel Patch Gas Buoy.
Crane Island Patch Wooden Can Buoy.
Crane Island Flats Gas Buoy.
Beaujeu Bank West End Gas Buoy.

The gas buoy on Trembles shoal, and off St. Croix, in the River St. Lawrence above Quebec, will also be replaced by spar buoys if the last heavy draft vessel has not passed these points before it is necessary to remove them.

These spar buoys are intended for the use of belated vessels in the autumn. They are left out through the winter, but mariners cannot count on finding them in position on the opening of navigation in the spring.

This notice affects the last paragraph of the announcements on page three of the Canadian List of Lights and Fog Alarms and Buoys Nos. 605, 609, 625, 629, 633 and 634 of the same list.

III. REMOVAL OF WHITE ISLAND LIGHT-SHIP TO WINTER QUARTERS.

The light-ship now maintained off the north-west extremity of White Island reef leaves her station each year for winter quarters in Quebec on the 15th November, the same day as the other light-ships below Quebec.

She returns to her station in the spring as early as ice will permit.

This notice affects the 3rd paragraph of the announcements on page 3 of the Canadian List of Lights and Fog Signals, and Light-ship No. 604 of the same list.

WM. SMITH,
Deputy-Minister of Marine and Fisheries.

Ottawa, Canada, 28th November, 1894.

☞All bearings, unless otherwise noted, are magnetic and are given from seaward, miles are nautical miles, heights are above high water, and all depths are at mean low water.

Pilots, masters, or others interested are earnestly requested to send information of dangers, changes in aids to navigation, notice of new shoals or channels, errors in publications, or any other facts affecting the navigation of Canadian waters, to the Deputy-Minister of Marine and Fisheries, Ottawa, Canada. 25-3

I. ESTABLISHMENT OF A NEW LIGHT AT GAGETOWN.

A lighthouse erected by the Government of Canada, at the mouth of Gagetown Creek, on the west side of the River St. John, in Queen's County, New Brunswick, will be put in operation on the opening of navigation next spring.

Lat.	N.	45°	46'	0"
Long.	W.	66°	11'	0"

The light will be fixed white, elevated 53 feet above the ordinary level of the river, and should be visible down the river to the bend at Musquash Island, up Gagetown Creek, and up the river to the bend at Jemseg. The illuminating apparatus is dioptric, of the seventh order.

The lighthouse tower stands upon a cribwork pier built on the bank of the river. It is a square wooden pyramidal building, painted white, surmounted by a square wooden lantern painted red. The height from the deck of the pier to the vane on the lantern is 47 feet.

The light is intended to guide vessels between Jemseg and Musquash Island, and to show the turn in the river at Buzzas.

This notice affects Admiralty chart No. 2670, and the substance of it should be entered in the Canadian List of Lights and Fog Signals instead of No. 58.

II. DISCONTINUANCE OF NO MAN'S FRIEND LIGHT.

From and after the opening of navigation next spring the light heretofore maintained at No Man's

Friend, or Buzzas, on the River St. John, in Queen's County, New Brunswick, nearly opposite the new light at Gagetown, will be permanently discontinued.

Lat.	N.	45°	46'	0"
Long.	W.	66°	10'	0"

This light will no longer be required in consequence of the establishment of the light at Gagetown above described. The old open-frame structure being out of repair and requiring renewal the opportunity was taken to improve the location of the light, by removing it to the west shore, where it will guide both up and down the river.

The old mast with open framework will be removed.

This notice affects Admiralty chart No. 2670, and Canadian List of Lights and Fog Signals No. 58.

On the 1st January, 1895, the two fixed white horizontal lights hitherto shown from the windows in each end of the old building will be discontinued, and a single fixed white light will be exhibited from the lantern of the new tower. This light will be elevated 55 feet above high water mark, and should be visible 12 miles from all points of approach seaward. The illuminating apparatus is dioptric, of the 5th order.

The tower is a square wooden, pyramidal, building, painted white, surmounted by an iron lantern painted red. Its height, from its base to the vane on the lantern, is 44 feet. It is connected to the old building, which will be continued in use as a dwelling house for the keeper.

This notice affects Admiralty charts Nos. 1651, 2342, 2516, 2666, 2727 and 2756, and Canadian List of Lights and Fog Signals No. 240.

II. GILLIS POINT LIGHT.

A lighthouse erected by the Government of Canada on Gillis Point, on the western side of the entrance to Boulaceet Harbour, on the northern side of Little Bras d'Or Lake, in the County of Victoria, Cape Breton, will be put in operation on the 1st January next.

Lat.	N.	46°	1'	32"
Long.	W.	60°	46'	18"

The light will be fixed white, elevated 74 feet above high water mark, and should be visible 14 miles from all points of approach by water. The illuminating apparatus is dioptric of the 7th order.

The light building, which is of wood, stands about 300 feet westerly from the extremity of the point, and consists of a square, pyramidal tower, with a small dwelling for the keeper attached. It is painted white, and the tower is surmounted by an iron lantern painted red. The height of the tower from its base to the vane on the lantern is 38 feet.

The light is intended to guide vessels into Boulaceet Harbour, and as an aid in navigating Little Bras d'Or Lake.

This notice affects Admiralty charts Nos. 2516, 2666, 2687 and 2727, and the substance of it should be entered in the Canadian List of Lights and Fog Signals under the No. 285.

III. DISCONTINUANCE OF GRAND NARROWS LIGHT.

From and after the 1st January, 1895, the light heretofore maintained on Uniacke Point, on the north side of Barra Strait or Grand Narrows, between Great and Little Bras d'Or Lakes, Cape Breton, will be permanently discontinued.

Lat.	N.	45°	58'	0"
Long.	W.	60°	48'	0"

This light will no longer be required in consequence of the establishment of the light on Gillis Point above described, and in consequence of the maintenance of the lights on the swing of the railway bridge crossing Grand Narrows.

This notice affects Admiralty charts Nos. 2516, 2666, 2687 and 2727, and Canadian List of Lights and Fog Signals No. 286.

IV. IMPROVEMENT OF LIGHTS AT EASTERN HARBOUR, CHETICAMP.

The range lights in Eastern Harbour, Cheticamp, have been improved by removing the two masts with sheds at their bases, on which lanterns were hoisted, and erecting in their place enclosed towers. The tower in each case is a square pyramidal wooden building, painted white, surmounted by a square wooden lantern painted red.

The front range tower is 30 feet high from its base to the vane on the lantern.

Lat.	N.	46°	38'	15"
Long.	W.	61°	0'	25"

The light shown from it will be a fixed red catoptric light, elevated 45 feet above high water mark, and should be visible 8 miles in, and over a small arc on each side of, the line of range.

The back tower, which stands 990 feet S. by W. ¾ W. from the front one, is 38 feet high. From it will be shown a fixed white catoptric light, elevated 62 feet above high water mark. It should be visible 13 miles in, and over a small arc on each side of, the line of range.

This notice affects Admiralty charts Nos. 2034, 2516, 2666 and 2727, and Canadian List of Lights and Fog Signals Nos. 310 and 311.

HOTEL DU GOUVERNEMENT À OTTAWA.

Vendredi, le 16e jour de novembre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Il plaît à Son Excellence, en vertu des dispositions de "l'Acte concernant les épizooties," et dans le but de prévenir l'introduction de la tuberculose chez les bêtes à cornes importées pour l'amélioration des animaux canadiens, et par et avec l'avis du Conseil privé de la Reine pour le Canada, d'ordonner que les règlements ci-dessous pour la gouverne de tous les officiers en charge de quarantaines d'animaux en Canada, soient et ils sont par le présent adoptés :—

RÈGLEMENTS.

Que toutes bêtes à cornes arrivant à ces quarantaines soient éprouvées au moyen de la lymphe tuberculine de Koch, afin de découvrir chez eux la présence ou autrement de la tuberculose dans aucune de ses phases.

Que nul animal qui, d'après la dite épreuve réactive de la lymphe, sera trouvé affecté de cette maladie, ne pourra quitter les limites de la quarantaine, à moins que ce soit pour renvoyer cet animal à l'endroit d'où il vient, le propriétaire ayant l'alternative soit de reprendre l'animal trouvé affecté de la tuberculose ou de le faire abattre sans compensation. Le Ministre de l'Agriculture fournira la lymphe tuberculine dans le but de faire les épreuves nécessaires.

JOHN J. McGEE,
22-4 Greffier du Conseil privé.

AVIS DU GOUVERNEMENT.

AVIS AUX MARINS.

No. 52 de 1894.

I. DURÉE DE LA SAISON DE BALISAGE EN CANADA.

Règle générale, les bouées sont maintenues en position pendant la saison de navigation en Canada. Dans les districts où les feux sont entretenus en opération durant toute l'année les bouées sont gardées en position d'un bout de l'année à l'autre ; dans les districts où la navigation est fermée en hiver, les bouées sont laissées en place en automne jusqu'à ce que les derniers navires soient partis, ou aussi tard que la glace le permet, eu égard à leur sûreté, et replacées au printemps aussitôt que l'état de la glace permet de les mettre en position.

Toutes les bouées-boîtes dans le fleuve Saint-Laurent en aval de Québec sont enlevées après le 14 de novembre ; toutes les bouées à gaz dans le même fleuve sont placées aussitôt que possible après le 11 de mai chaque printemps, et relevées aussitôt que possible après le 10 de novembre chaque automne.

II. BOUÉES D'HIVER DANS LE FLEUVE SAINT-LAURENT.

Les bouées ci-dessous dans ce district, lorsqu'elles sont enlevées pour l'hiver, sont remplacées par de grandes bouées-espars surmontées d'un bouquet de verdure qui les rend plus remarquables :—

La bouée à gaz de Barret Ledge.
La bouée à gaz de la batture des Pèlerins.
La bouée-boîte en bois de St. Roch.
La bouée à gaz de Middle Ground.
La bouée à gaz de Channel Patch.
La bouée-boîte en bois de la pièce de l'ile aux Grues.
La bouée à gaz de la batture de l'île aux Grues.
La bouée à gaz sur le bout ouest de la batture de Beaujeu.

Les bouées à gaz sur la batture des Trembles, et au large de Ste. Croix, dans le fleuve Saint-Laurent, en amont de Québec, seront aussi remplacées par des bouées-espars si le dernier navire d'un fort tirant d'eau n'a pas passé ces endroits avant qu'il soit nécessaire de les enlever.

Ces bouées-espars sont destinées à servir aux navires qui sont retardés en automne. Elles sont laissées dehors tout l'hiver, mais les marins ne peuvent être certains de les trouver en position à l'ouverture de la navigation le printemps.

Cet avis affecte le dernier paragraphe des annonces sur la page 3 de la Liste des phares et signaux de brume canadiens, et des bouées Nos 605, 609, 625, 629, 633 et 634 de la même liste.

III. HIVERNEMENT DU PHARE FLOTTANT DE L'ILE BLANCHE.

Le phare flottant qui est maintenant entretenu vis-à-vis l'extrémité nord-ouest du récif de l'île Blanche, laisse sa station chaque année pour aller en hivernement à Québec le 15 de novembre, en même temps que les autres phares flottants en aval de Québec.

Au printemps il retourne à sa station aussitôt que la glace le permet.

Cet avis affecte le 3e paragraphe des annonces sur la page 3 de la Liste des phares et signaux de brume canadiens, et le phare flottant No. 604 de la même liste.

DEMANDES AU PARLEMENT.

Règles *in re* Avis de bills privés.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos "Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.
JOHN GEORGE BOURINOT,
Greffier des Communes.

Règles additionnelles de la Chambre des Communes concernant les bills privés.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a*.) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS, by the Order in Council of the 17th March, 1894, Sections 35 and 36 in Township 49, Range 27, West of the 2nd Meridian, and an equal area of unsurveyed land adjoining and immediately to the north thereof, were set apart as a reserve for a band of Sioux Indians;

And whereas it now appears that some of these lands are unsuitable for farming and therefore useless for the purposes of the Indians;

[3564]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Tuesday, the 11th day of December, 1894.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON a Report dated 12th November, 1894, from the Minister of the Interior, stating that an application was made in April, 1894, by William Roderick Ross, of Winnipeg, on behalf of himself and his mother, Mrs. Ann Ross, for a grant of scrip, amounting to $160, as heirs-at-law of Donald Ross, deceased, who was the son of an original white settler who went to the Red River country in the year 1815.

The Minister further states that the evidence which has been submitted in this case shows that the late Donald Ross was a resident, on the 26th of May, 1874, of Fort Chipewyan, at which place he died intestate in the year 1878, leaving his widow and son, the said Ann Ross and William Roderick Ross, his only heirs-at-law.

The Minister, in view of the fact that this is the only claim of this kind which has been received since the adoption of the Order in Council of the 28th February, 1894, authorizing him to deal with the three similar claims, recommends that he be empowered to deal with Mr. Ross' claim above referred to, notwithstanding the residence of the deceased on the 26th of May, 1874, in a portion of the North West Territories not ceded by the Indians under treaty, and to grant scrip to the heirs of the deceased to the value of $160.

The Committee submit the foregoing for Your Excellency's approval.

JOHN J. McGEE,
Clerk of the Privy Council.

2. 3. No parent, guardian or other person shall be liable to any of the penalties of these regulations in respect of any child—

(1.) If the child is under efficient instruction ;

5. Indian Agents may appoint one or more persons to act as truant officers on each reserve for the enforcement of these regulations, and such truant officers shall, for the purposes of these regulations, be vested with police powers, and shall perform such services as shall be deemed necessary by the Indian Agents by whom they are appointed for the enforcement of these regulations.

6. It shall be the duty of truant officers appointed under these regulations to examine into all cases of non-attendance at school which may be brought to their notice, to notify the parent, guardian or other person having the charge or control of any child between seven and sixteen years of age when such child is not attending school, and to require such parent, guardian or other person to cause the child to attend some school within three days.

7. 11. The share of annuity or interest money, or other band revenue, belonging to a child committed to an industrial or boarding school, may be retained by the Superintendent General of Indian Affairs, and may be expended by the Superintendent General for the maintenance and education of such child or funded for its benefit.

12. If any child, placed under these regulations in an industrial or boarding school should leave such school without permission of the Superintendent General, the Assistant Indian Commissioner, or of the Principal of the School, or should any child who has been allowed out, fail to return at the stipulated time, any Indian Agent or Justice of the Peace shall, on information made to that effect by any officer of such school, issue a warrant authorizing the person named therein to search for and take such child back to the school in which it had been previously placed as aforesaid. But notwithstanding anything in this section it shall be competent for any employee of the Indian Department, or any constable, to arrest without a warrant any child found in the act of escaping from any industrial or boarding school, and to convey such child to the school from which it escaped.

13. Any person authorized by warrant under these regulations to search for and take any child to an industrial or boarding school may enter (if need be by force) any house, building or other place specified in the warrant, and may remove the child therefrom. (2) The warrant may be addressed to any policeman or constable, or to any truant officer appointed under these regulations, or to the principal of any industrial or boarding school, or to any employee of the Department of Indian Affairs.

NOTICE TO MARINERS.

No. 52 of 1894.

I. DURATION OF BUOYAGE SEASON IN CANADA.

Buoys in the Dominion of Canada as a rule are maintained in position during the season of navigation. In districts where the lights are maintained in operation throughout the year the buoys are kept in position all the year round; in districts where navigation is closed in winter, buoys are kept out in the autumn until the last vessels have cleared, or as late as the ice will allow, with due regard to their safety; and replaced in spring as soon as the state of the ice will admit of their being placed in position.

All the can buoys in the River St. Lawrence below Quebec are removed after the 14th November; all the gas buoys in the same river are set out as soon as possible after the 11th May each spring, and taken up as soon as convenient after the 10th November each autumn.

II. WINTER BUOYS IN THE RIVER ST. LAWRENCE.

The following buoys in this district, when removed for winter, are replaced by large wooden spar buoys, each topped by an evergreen bush to make it more conspicuous:—

Barret Ledge Gas Buoy.
Pilgrims Shoal Gas Buoy.
St. Roch Wooden Can Buoy.
Middle Ground Gas Buoy.
Channel Patch Gas Buoy.
Crane Island Patch Wooden Can Buoy.
Crane Island Flats Gas Buoy.
Beaujeu Bank West End Gas Buoy.

The gas buoy on Trembles shoal, and off St. Croix, in the River St. Lawrence above Quebec, will also be replaced by spar buoys if the last heavy draft vessel has not passed these points before it is necessary to remove them.

These spar buoys are intended for the use of belated vessels in the autumn. They are left out through the winter, but mariners cannot count on finding them in position on the opening of navigation in the spring.

This notice affects the last paragraph of the announcements on page three of the Canadian List of Lights and Fog Alarms and Buoys Nos. 605, 609, 625, 629, 633 and 634 of the same list.

III. REMOVAL OF WHITE ISLAND LIGHT-SHIP TO WINTER QUARTERS.

The light-ship now maintained off the north-west extremity of White Island reef leaves her station each year for winter quarters in Quebec on the 15th November, the same day as the other light-ships below Quebec.

She returns to her station in the spring as early as ice will permit.

This notice affects the 3rd paragraph of the announcements on page 3 of the Canadian List of Lights and Fog Signals, and Light-ship No. 604 of the same list.

WM. SMITH,
Deputy-Minister of Marine and Fisheries.
Department of Marine and Fisheries,
Ottawa, Canada, 28th November, 1894.

☞All bearings, unless otherwise noted, are magnetic and are given from seaward, miles are nautical miles, heights are above high water, and all depths are at mean low water.

Pilots, masters, or others interested are earnestly requested to send information of dangers, changes in aids to navigation, notice of new shoals or channels, errors in publications, or any other facts affecting the navigation of Canadian waters, to the Deputy-Minister of Marine and Fisheries, Ottawa, Canada. 25-3

NOTICE TO MARINERS.

No. 53 of 1894.

I. ESTABLISHMENT OF A NEW LIGHT AT GAGETOWN.

A lighthouse erected by the Government of Canada, at the mouth of Gagetown Creek, on the west side of the River St. John, in Queen's County, New Brunswick, will be put in operation on the opening of navigation next spring.

Lat. N. 45° 46' 0"
Long. W. 66° 11' 0"

The light will be fixed white, elevated 53 feet above the ordinary level of the river, and should be visible down the river to the bend at Musquash Island, up Gagetown Creek, and up the river to the bend at Jemseg. The illuminating apparatus is dioptric, of the seventh order.

The lighthouse tower stands upon a cribwork pier built on the bank of the river. It is a square wooden pyramidal building, painted white, surmounted by a square wooden lantern painted red. The height from the deck of the pier to the vane on the lantern is 47 feet.

The light is intended to guide vessels between Jemseg and Musquash Island, and to show the turn in the river at Buzzas.

This notice affects Admiralty chart No. 2670, and the substance of it should be entered in the Canadian List of Lights and Fog Signals instead of No. 58.

II. DISCONTINUANCE OF NO MAN'S FRIEND LIGHT.

From and after the opening of navigation next spring the light heretofore maintained at No Man's Friend, or Buzzas, on the River St. John, in Queen's County, New Brunswick, nearly opposite the new light at Gagetown, will be permanently discontinued.

Lat. N. 45° 46' 0"
Long. W. 66° 10' 0"

This light will no longer be required in consequence of the establishment of the light at Gagetown above described. The old open-frame structure being out of repair and requiring renewal the opportunity was taken to improve the location of the light, by removing it to the west shore, where it will guide both up and down the river.

The old mast with open framework will be removed.

This notice affects Admiralty chart No. 2670, and Canadian List of Lights and Fog Signals No. 58.

WM. SMITH,
Deputy-Minister of Marine and Fisheries.
Department of Marine and Fisheries,
Ottawa, Canada, 7th December, 1894.

Samedi, le 10e jour de novembre 1894.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Il plaît à Son Excellence, en vertu des pouvoirs qui lui sont conférés par les articles 137 et 138 qui sont ajoutés à l'Acte des Sauvages par l'article onze du chapitre 32 des actes 57-58 Victoria, et par et avec l'avis du Conseil privé de la Reine pour le Canada, de faire des règlements suivants :—

1. Tous enfants Sauvages âgés de sept à seize ans devront assister à une école de jour sur la réserve où ils résident pendant tout le temps que l'école est ouverte, à moins d'en être exemptée pour les raisons spécifiées ci-après.

2. Quiconque reçoit dans sa maison un enfant de toute autre personne, entre les âges susdits, lequel enfant demeure avec lui, ou sous ses soins ou à son emploi, sera censé par ce fait être chargé du même devoir au sujet de l'éducation de cet enfant pendant cette résidence qu'un parent, et sera passible d'être poursuivi comme dans le cas d'un parent s'il néglige de faire instruire cet enfant au même degré qu'un parent est obligé de le faire par les présents règlements ; mais le devoir du parent en vertu des présents règlements ne sera pas par là affecté ou amoindri, et continuera en pleine force.

3. Nul parent, tuteur ou autre personne ne sera assujéti à aucune des peines établies par les présents règlements au sujet de cet enfant.

(1.) Si l'enfant reçoit une instruction efficace ;
(2.) Si l'enfant est incapable d'assister à l'école à raison de maladie ou autre cause inévitable ;
(3.) S'il n'existe pas d'école dans un rayon de deux milles, mesurés par le chemin le plus proche de la résidence de cet enfant, si cet enfant a moins de dix ans, ou dans un rayon de trois milles s'il dépasse cet âge ;
(4.) Si l'enfant a été exempté, tel que prévu ci-après, d'assister à l'école ;
(5.) Si l'enfant a passé l'examen pour les lycées.

4. Si un agent des Sauvages, ou un instituteur autorisé par cet agent à émettre le certificat mentionné plus loin, croit que les services de cet enfant sont nécessaires aux travaux de la terre, ou à des devoirs urgents et nécessaires du ménage, ou à l'entretien nécessaire de cet enfant, ou de quelque personne à la charge de cet enfant, cet agent des Sauvages ou instituteur pourra, au moyen d'un certificat énonçant les raisons à l'appui, relever cet enfant d'assister à l'école pour une période n'excédant pas deux semaines, pendant chacun des quatre termes ou trimestres scolaires.

5. Les agents des Sauvages pourront nommer une ou plusieurs personnes pour agir en qualité de préposés à l'assiduité sur chaque réserve pour la mise à exécution des présents règlements, et ces préposés à l'assiduité seront, pour les fins des présents règlements revêtus des pouvoirs de constables, et rempliront tels services que les agents des Sauvages qui les auront nommés jugeront nécessaires pour l'exécution des présents règlements.

6. Il sera du devoir des préposés à l'assiduité nommés en vertu des présents règlements d'examiner tous les cas d'absence de l'école qui pourront leur être soumis, d'avertir le parent, le tuteur ou autre personne ayant la charge ou le contrôle de tout enfant âgé de sept à seize ans lorsque cet enfant n'assiste pas à l'école, et d'exiger que ce parent, tuteur ou autre personne envoie cet enfant à quelque école, sous les trois jours.

7. Si le parent, tuteur ou autre personne ayant la charge légale ou le contrôle d'un enfant, néglige ou refuse de faire assister cet enfant à une école, après avoir été requis de le faire comme susdit (à moins que cet enfant n'ait été exempté d'y assister comme susdit) le préposé à l'assiduité déposera ou fera déposer une plainte contre ce parent, tuteur ou autre personne, par-devant un juge de paix ayant juridiction dans le comté ou district dans lequel l'offense est commise, ou par-devant l'agent des Sauvages de la localité ; et sur conviction de tel refus ou négligence, ce parent, tuteur ou autre personne encourra une amende de pas moins de deux piastres, ou un emprisonnement pour une période n'excédant pas dix jours, ou les deux.

8. Pour les fins de l'article 138, qui est ajouté à l'Acte des Sauvages par l'article 11 du chapitre 32, 57-58 Victoria, les écoles suivantes sont déclarées être des écoles industrielles :—L'institut de Mount-Elgin, à Muncey ; l'institut Mohawk, à Brantford ; les asiles de Shingwauk et Wawanosh au Sault Sainte-Marie ; l'école industrielle de Wikwemikon, à Wikwemikon—tous dans la province d'Ontario ; l'école industrielle de Brandon, à Brandon ; l'école industrielle de Saint-Boniface, à Saint-Boniface ; l'école industrielle de la Terre de Rupert, à Middle Church ; l'asile Washakada, à Elkhorn—tous dans la province du Manitoba ; l'orphélinat McDougall, à Morley ; l'école industrielle de Battleford, à Battleford ; l'école industrielle de Saint-Joseph, à Rivière-Haute ; l'école industrielle de Régina, à Régina ; l'école industrielle de Qu'Appelle, à Qu'Appelle ; l'école industrielle de Red-Deer, à Red-Deer ; l'école industrielle de Saint-Albert, dans l'agence d'Edmonton ; l'école préparatoire d'Emmanuel, à Prince-Albert—tous dans les Territoires du Nord-Ouest ; l'école industrielle de l'île Kuper, à l'île Kuper ; l'école industrielle de Kamloops, à Kamloops ; l'école industrielle de Kootenay, à Kootenay ; l'école industrielle de la Baie de l'Alerte, à la Baie de l'Alerte ; l'école industrielle de Metlakahtla, à Metlakahtla ; l'école industrielle de Williams Lake, à Williams Lake ; l'asile de Coqualeetza, à Chilliwack, tous dans la province de la Colombie-Britannique. 9. Un agent des Sauvages ou juge de paix, qui prouve qu'un enfant Sauvage âgé de six à seize ans, ne reçoit pas les soins nécessaires, ou ne reçoit pas d'instruction, et que le parent, tuteur ou autre personne ayant la charge ou le contrôle de cet enfant est incapable ou ne veut pas pourvoir à l'éducation de l'enfant, pourra émettre un mandat autorisant la personne y nommée de rechercher l'enfant et de le prendre et le placer dans une école industrielle ou un pensionnat, dans lequel il y a une vacance pour cet enfant, et un enfant ainsi placé dans une école industrielle ou un pensionnat pourra y être retenu jusqu'à ce qu'il ait atteint l'âge de dix-huit ans ; mais nul enfant ne sera confié à une école industrielle ou à un pensionnat avant que le parent, tuteur ou autre personne ayant la charge ou le contrôle de cet enfant ne soit notifié de vive voix ou par écrit par un juge de paix, agent des Sauvages, ou préposé à l'assiduité, de l'intention de confier ainsi l'enfant, et il s'écoulera quatre jours entre la signification de cet avis et l'internement de l'enfant, sauf dans la province du Manitoba et les Territoires du Nord-Ouest, où un enfant Sauvage pourra être interné par un agent des Sauvages ou un juge de paix comme susdit, sans avis.

10. Si un tel parent, tuteur ou autre personne qui a été notifié comme susdit, s'oppose sous les susdits quatre jours, au placement de l'enfant dans une école industrielle ou un pensionnat, l'agent des Sauvages, ou le juge de paix, pourra fixer un jour pour une enquête formelle dans l'affaire, et pourra recevoir des témoignages sous serment quant à la manière dont l'enfant est traité et instruit, et s'il est démontré qu'il est pris ou sera pris des mesures convenables pour le soin et l'éducation de l'enfant, l'enfant pourra être laissé à la garde de ce parent, tuteur ou autre personne.

AVIS AUX MARINS.

No. 52 de 1894.

I. DURÉE DE LA SAISON DE BALISAGE EN CANADA.

Règle générale, les bouées sont maintenues en position pendant la saison de navigation en Canada. Dans les districts où les feux sont entretenus en opération durant toute l'année les bouées sont gardées en position d'un bout de l'année à l'autre ; dans les districts où la navigation est fermée en hiver, les bouées sont laissées en place en automne jusqu'à ce que les derniers navires soient partis, ou aussi tard que la glace le permet, eu égard à leur sûreté, et replacées au printemps aussitôt que l'état de la glace permet de les mettre en position.

Toutes les bouées-boîtes dans le fleuve Saint-Laurent en aval de Québec sont enlevées après le 14 de novembre ; toutes les bouées à gaz dans le même fleuve sont placées aussitôt que possible après le 11 de mai chaque printemps, et relevées aussitôt que possible après le 10 de novembre chaque automne.

II. BOUÉES D'HIVER DANS LE FLEUVE SAINT-LAURENT.

Les bouées ci-dessous dans ce district, lorsqu'elles sont enlevées pour l'hiver, sont remplacées par de grandes bouées-espars surmontées d'un bouquet de verdure qui les rend plus remarquables :—

La bouée à gaz de Barret Ledge.
La bouée à gaz de la batture des Pèlerins.
La bouée-boîte en bois de St. Roch.
La bouée à gaz de Middle Ground.
La bouée à gaz de Channel Patch.
La bouée-boîte en bois de la pièce de l'île aux Grues.
La bouée à gaz de la batture de l'île aux Grues.
La bouée à gaz sur le bout ouest de la batture de Beaujeu.

Les bouées à gaz sur la batture des Trembles, et au large de Ste. Croix, dans le fleuve Saint-Laurent, en amont de Québec, seront aussi remplacées par des bouées-espars si le dernier navire d'un fort tirant d'eau n'a pas passé ces endroits avant qu'il soit nécessaire de les enlever.

Ces bouées-espars sont destinées à servir aux navires qui sont retardés en automne. Elles sont laissées dehors tout l'hiver, mais les marins ne peuvent être certains de les trouver en position à l'ouverture de la navigation le printemps.

Cet avis affecte le dernier paragraphe des annonces sur la page 3 de la Liste des phares et signaux de brume canadiens, et des bouées Nos 605, 609, 625, 629, 633 et 634 de la même liste.

III. HIVERNEMENT DU PHARE FLOTTANT DE L'ILE BLANCHE.

Le phare flottant qui est maintenant entretenu vis-à-vis l'extrémité nord-ouest du récif de l'île Blanche, laisse sa station chaque année pour aller en hivernement à Québec le 15 de novembre, en même temps que les autres phares flottants en aval de Québec.

Au printemps il retourne à sa station aussitôt que la glace le permet.

Cet avis affecte le 3e paragraphe des annonces sur la page 3 de la Liste des phares et signaux de brume canadiens, et le phare flottant No. 604 de la même liste.

DEMANDES AU PARLEMENT.

Règles *in re* Avis de bills privés.

Dans le cas de toute demande de bills privés, proprement du ressort législatif du Parlement du Canada suivant les dispositions de l'Acte de l'Amérique Britannique du Nord, 1867, ayant pour objet la concession à une ou plusieurs personnes de certains droits ou privilèges exclusifs ou particuliers, ou le pouvoir de faire quelque chose qui, dans ses effets, pourrait toucher aux droits ou à la propriété d'autrui, ou concerner une classe particulière de la société ; ou ayant pour objet quelque amendement à un acte antérieur,—un avis, énonçant d'une manière claire et intelligible la nature et l'objet de la demande (sauf s'il s'agit de corporations déjà existantes) par les pétitionnaires ou de leur part, est nécessaire et doit être publié comme il suit :—

Dans les provinces de Québec et du Manitoba.

Dans la *Gazette du Canada* en anglais et en français, ainsi que dans un journal anglais et un journal français, du district intéressé, ou en anglais et en français dans le même journal, s'il ne s'en publie qu'un seul dans ce district ; ou s'il n'y paraît pas de journal, alors la publication de l'avis en anglais et en français doit se faire dans un journal du district le plus voisin où il s'en publie.

Dans les autres provinces ou territoires.

Dans la *Gazette du Canada*, et dans un journal du comté, du district ou des comtés-unis intéressés, ou s'il n'y paraît pas de journal alors la publication doit se faire dans un journal du comté ou district le plus voisin où il s'en publie. La publication de ces avis durera, dans chaque cas, la période de deux mois au moins pendant l'intervalle de temps qui s'écoulera entre la clôture de la session précédente et la prise en considération de la pétition. Chaque fois qu'un bill doit opérer dans plus d'une province, territoire ou district, l'avis sera publié dans la *Gazette du Canada* et dans un journal bien établi publié dans chaque province, territoire ou district où le bill doit opérer. Des exemplaires marqués de tous les numéros des journaux reproduisant la première et la dernière insertion de l'avis, devront être transmis au greffier de chaque Chambre, et porter à l'endos "Demande de bill privé."

Si la pétition demande l'autorisation de présenter un bill privé ayant pour objet la construction d'un pont de péage, les pétitionnaires devront aussi, en même temps et de la même manière, donner avis du taux de péages projeté, de l'étendue du privilège, de la hauteur des arches, de l'espace à laisser libre entre les culées ou les piles pour le passage des radeaux et des navires ; et, si c'est un pont mobile, quelles en seront les dimensions.

Toute personne désirant obtenir un bill privé devra, dans les huit jours au moins qui précéderont l'ouverture du parlement, déposer au bureau du greffier de la Chambre dans laquelle le bill doit prendre naissance, une copie de ce bill en langue anglaise ou en langue française, avec une somme suffisante pour en payer la traduction et l'impression. Après la seconde lecture et avant la prise en considération du bill par tout comité, le pétitionnaire aura aussi à payer au greffier du Sénat, ou au comptable de la Chambre des Communes (selon le cas) un honoraire de $200, plus une somme suffisante pour défrayer le coût de l'impression de l'acte dans les Statuts, et remettra le reçu de ce paiement au greffier du comité auquel ce bill aura été renvoyé.

L'honoraire de $200 payable sur tout bill privé, ne sera payé que dans la Chambre où ce bill a pris naissance ; mais les frais de réimpression et de traduction nécessités par ce bill seront payés dans la Chambre où ces frais sont encourus.

Aucune pétition pour l'obtention d'un bill privé ne sera reçue par le Sénat ou par la Chambre des Communes, après les premières trois semaines de la session.

Aucun bill privé ne pourra être présenté au Sénat ou à la Chambre des Communes après les premières quatre semaines de la session.

EDOUARD J. LANGEVIN,
Greffier du Sénat.
JOHN GEORGE BOURINOT,
Greffier des Communes.

Règles additionnelles de la Chambre des Communes concernant les bills privés.

Tous les bills privés demandant des actes constitutifs devront être rédigés de manière à y incorporer, en les spécifiant, les *clauses* des Actes généraux concernant les détails qui font l'objet de ces bills ; des raisons spéciales seront données chaque fois que l'on aura l'intention de se départir de ce principe, ou que l'on voudra y introduire d'autres dispositions touchant ces détails ; et une note sera annexée au bill indiquant les dispositions au sujet desquelles l'on entend s'écarter de l'Acte général ; les bills qui ne seront pas rédigés conformément à cette Règle, devront être remodelés par les auteurs et réimprimés à leurs frais, avant qu'aucun comité en examine les clauses.

51*a*. Tous les bills privés pour chartes ou pour modification de chartes de compagnies de chemins de fer seront rédigés conformément au bill-modèle dont copie peut être obtenue du greffier de la Chambre ;

(*a*.) Les dispositions contenues dans un bill quelconque qui ne seront pas conformes au bill-modèle, seront insérées entre crochets, et après avoir été revisées par l'officier compétent, elles seront imprimées ainsi ; et les bills qui ne seront pas rédigés en conformité de cette règle seront renvoyés aux auteurs pour être remodelés avant leur revision et impression ;

(*b*.) Toutes clauses d'actes existants que l'on proposera de modifier, seront imprimées en entier, avec les amendements insérés en leur lieu et place, et entre crochets ;

(*c*.) Toutes dispositions exceptionnelles que l'on proposera d'insérer dans un bill quelconque, seront imprimées dans l'avis publié.

51*b*. Nul bill pour la constitution légale d'une compagnie de chemin de fer ou pour changer le tracé du chemin de fer d'une compagnie déjà constituée ne sera pris en considération par le comité des chemins de fer à moins qu'il n'ait été donné au comité, au moins une semaine avant la prise en considération du bill—

(*a.*) Une carte ou plan à l'échelle de pas moins d'un demi-pouce au mille, indiquant le territoire sur lequel l'on se propose de construire les travaux projetés, ainsi que les lignes de travaux analogues existants ou autorisés, dans les limites du district, ou partie du district que la ligne projetée doit desservir, ou affectant le dit district en aucune manière ; cette carte ou plan devra être signé par l'ingénieur ou toute autre personne qui l'aura fait ;

(*b.*) Un exhibit faisant connaître le montant total du capital que l'on se propose de prélever pour les fins de l'entreprise, et la manière dont on se propose de le prélever, soit au moyen d'actions ordinaires, obligations, débentures ou autres garanties, et le montant respectif de chacune.

JOHN GEORGE BOURINOT,
Greffier des Communes.

Ordre spécial de la Chambre des Communes.

Résolu,—Que le greffier de la Chambre adresse une copie de la Règle 49 modifiée aux personnes qui signifient dans la *Gazette du Canada* leur intention de s'adresser au parlement pour la passation d'un bill privé, ainsi qu'un avis portant que la dite Règle sera strictement appliquée à l'avenir :—

49. Les pétitions pour bills privés ne seront reçues par la Chambre que pendant les trois premières semaines de la session, et les bills privés ne pourront être présentés à la Chambre que pendant les quatre premières semaines de la session ; et tout comité auquel aura été renvoyé un bill privé devra le prendre en considération et en faire rapport à la Chambre avec toute la diligence convenable.

2. Qu'il soit enjoint à tous les comités sur bills privés, dans le cas où les promoteurs ne seraient point prêts à procéder avec leurs mesures quand celles-ci auront été appelées deux fois en deux occasions différentes devant le comité pour y être considérées, de rapporter ces mesures à la Chambre sans délai, faisant connaître les faits, et avec la recommandation que ces bills soient retirés."

JOHN GEORGE BOURINOT,
Greffier des Communes.

Substance des règles et formes de procéder du Sénat concernant les bills de divorce.

L'époux qui a l'intention de demander un bill de divorce doit faire connaître cette intention, ainsi que les noms de l'autre époux et la cause du divorce, par avis inséré durant six mois avant la présentation de sa pétition pour obtenir le bill, dans la *Gazette du Canada* et dans deux journaux du district où il avait sa résidence habituelle à l'époque de séparation d'avec son conjoint, s'il résidait alors dans la province de Québec, le Manitoba, la Colombie-Britannique, ou les Territoires du Nord-Ouest,—ou du comté ou des comtés-unis, s'il résidait dans une autre province ; mais si ce nombre de journaux ne s'y trouve pas, l'avis sera publié dans le district, le comté ou les comtés-unis voisins. Dans les provinces de Québec et de Manitoba, les insertions seront faites dans un journal anglais et un journal français, s'il en existe des deux langues dans le district : autrement, elles se feront en anglais et en français au même journal.

Il doit être signifié, à la diligence de l'époux pétitionnaire, un mois au moins avant la présentation de la pétition, une copie de cet avis à l'autre époux en personne, si cela est possible.

Aucune pétition en divorce n'est reçue après l'expiration des trente premiers jours de la session.

Toute pétition en divorce devra être écrite lisiblement et porter la signature du pétitionnaire. Elle énoncera sommairement le fait du mariage, le lieu et l'époque de sa célébration, les noms du célébrant, les griefs qui donnent lieu à la demande de redressement et la nature du redressement demandé, et en outre contiendra assurance qu'il n'y a pas eu réconciliation, collusion ni connivence. Les allégations de la pétition seront appuyées de la déclaration du pétitionnaire, faite en vertu de "l'Acte concernant les serments extra-judiciaires."

Huit jours avant l'ouverture du Parlement, le pétitionnaire déposera au bureau du greffier du Sénat, une copie en langue anglaise ou française du bill de divorce qui doit être présenté, et en même temps une somme suffisante pour payer la traduction et l'impression et tirage à 600 exemplaires anglais et 200 exemplaires français de ce bill.

La pétition en obtention d'un bill de divorce n'est présentée que lorsque le pétitionnaire a versé au bureau du greffier du Sénat une somme de $200.

La pétition, au moment de sa présentation, doit être accompagnée de la preuve de la publication d'avis, d'une déclaration qu'il a été signifié une copie de l'avis, et d'une copie du bill qui doit être présenté.
